Directors' Review

The Board of Directors of Sindh Modaraba Management Limited, Management Company of Sindh Modaraba, is pleased to present the un-audited Financial Statements of Sindh Modaraba for the nine months' period ended March 31, 2024.

Operating Results

During the nine months' period under review, the Modaraba earned a profit before tax of Rs. 241.01 million as compared to profit before tax of Rs. 134.89 million during the preceding period. The profit before tax increased by Rs. 106.21 million due to an increase in financing income, prudent treasury management on investment portfolio and proactive recovery strategy of NPLs. The total revenue has increased to Rs.306.67 million as at 31 March 2024 from Rs.199.91 million during the comparative period. The operating expenses of Modaraba have also increased due to upsurge in inflation and operational cost. However, it remained under control during the period under review.

Future Prospects

In a cautious move, SBP policy rate was kept steady at 22%. Despite inflation, the SBP emphasized that the external front must also be taken into account, including the level of inflows, CAD and FX rate. There are risks of elevated inflation due to the second round impact from hikes in administered prices and anticipated additional taxes for fiscal consolidation. Similarly, SBP also took note that while the inflation trend in advanced and emerging economies has been smoother, they are maintaining a cautious monetary policy in the country.

Recently, inflation has dropped below 18% Y/Y. The NCPI in Apr-24 is expected to drop below 18% due to easing food prices. Despite increase in recent fuel prices, it is expected that inflation may remain on a similar level, assuming the PKR/USD remains largely stable. The FY24 average inflation is expected to be around 24.5% Y/Y.

Current account deficit is expected to stay under control. Ex food and petroleum group, imports have risen in period under review by 7.2% Y/Y because of higher imports under telecom sector. The overall demand of import is weak, however rising energy prices may once again put pressure on imports. The remittances must have been increased in the month of Ramadan and textile exports may also witness increase due to rising cotton prices (up ~15% in CYTD) as volumetrically textile exports are better from last year. Therefore, it is expected that current account deficit to remain within lower band of the SBP's set target of 0.5-1.5% of GDP.

With the slowdown in the economy, the management will continue to focus cautious lending approach and will concentrate available funds deployment in comparably safe investments zone. At current policy rate level, consumer financing has shrunk to its extreme as major part of the eligible population has now been excluded from the targeted market. The economic slowdown has also reduced the financing facility demand from the SME and corporate sector as well and only risky sectors are approaching for the funded facility in financial institutions. Considering the environment, timely recovery from the customers against the existing facilities remains the first priority of the management. Therefore, the management has preferred more to invest its funds in low risk portfolio during the period. Further, we expect to continue the same economic trend in current financial year and expect the economy to bounce back after few months. Management geared up to grasp any opportunity without compromising on the quality of the asset as being practiced in the past.

Acknowledgment

On behalf of the Board of Directors, I would like to thanks the Sponsors, the Regulators and our Shariah Advisor for their valuable guidance and support. We would also like to acknowledge the continued patronage of our clients and put on record the dedication and hard work of employees of the Modaraba to achieve the desired results.

2.3 Functional and presentation currency

Items included in the condensed interim financial information are measured using the currency of the primary economic environment in which the Modaraba operates. The condensed interim financial information is presented in Pakistani Rupee, which is the Modaraba's functional and presentational currency. Figures have been rounded off to the nearest Rupee, unless stated otherwise.

NOTES TO THE CONDENSED INTERIM FINANCIAL INFORMATION

FOR THE NINE-MONTHS ENDED MARCH 31, 2024

2.4 Use of significant estimates and judgments

The preparation of condensed interim financial information in conformity with the approved accounting standards requires the management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities, income and expenses. It also requires the management to exercise judgment in application of the Modaraba's accounting policies. The estimates, judgments and associated assumptions are based on the management's experience and various other factors that are believed to be reasonable under the circumstances. These estimates and assumptions are reviewed on on-going basis.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies and methods of computation adopted in the preparation of this condensed interim financial information are the same as those applied in the preparation of audited annual financial statements of the Modaraba for the year ended June 30, 2023.

11.1 This represents interest free loan provided by the Management Company (related party) to the Modaraba. The loan is sub-ordinated to senior debt and is repayable at the discretion of Modaraba. The Modaraba has the option to issue modaraba certificates in future against this loan, subject to necessary regulatory approvals.

12. CONTINGENCIES AND COMMITMENTS

The Modaraba received a letter from the Assistant Commissioner - Sindh Revenue Board (SRB), wherein, it is mentioned that during scrutiny of the financial statements of the Modaraba from July-2014 to March 2018 he came to know that the Modaraba is engaged in providing / rendering taxable services which falls under the Second Schedule of Sindh Sales Tax on Services Act, 2011 (the Act), and the sales tax on such services mainly ljarah/lease rentals aggregates to Rs. 27.67 million which is outstanding. Such letters were also received by some other Modarabas and collectively, a petition against the same was filed through a common legal counsel in the Honorable High Court of Sindh challenging levy of Services Sales Tax on ljarah/lease financing transactions. The Honorable High Court has granted a stay stating that no adverse order in respect of the proposed treatment shall be made against the Petitioners.

The management of the Modaraba based on discussions with its legal counsel is of the view that the Sindh Sales Tax is not applicable on Ijarah transactions and expect that the matter will be decided in Modarabas' favour. Accordingly, no liability in respect of the above has been recognized in these financial statements.

14. SEGMENT INFORMATION

13.

As per IFRS 8: "Operating Segments", segments are reported in a manner consistent with the internal reporting used by the chief operating decision-maker. The Chief Executive Officer has been identified as the chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments.

The Chief Executive Officer is responsible for the Modaraba's entire product portfolio and considers the business to have a single operating segment. The Modaraba's asset allocation decisions are based on a single integrated investment strategy and the Modaraba's performance is evaluated on an overall basis.

The internal reporting provided to the Chief Executive Officer for the Modaraba's assets, liabilities and performance is prepared on a consistent basis with the measurement and recognition principles of approved accounting standards as applicable in Pakistan.

The Modaraba is domiciled in Pakistan. All of the Modaraba's income is from investments in entities incorporated in Pakistan.

16. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the amount for which an asset could be exchanged, or liability settled, between knowledgeable willing parties in an arm's length transaction. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Modaraba is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

International Financial Reporting Standard (IFRS) 7, 'Financial Instruments: Disclosures' requires the Modaraba to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1);
- inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices) (level 2); and
- inputs for the assets or liability that are not based on observable market data (i.e., unobservable inputs) (level 3).

As at the balance sheet date, there were no financial instruments which were measured at fair values in the financial statements.
