MACRO PERSPECTIVE:

Pakistan Economy witnessed a strong rebound during the nine months of fiscal year 2021 on the back of growth in Large Scale Manufacturing Index, which showed a growth of 7.45%YoY during 8MFY21 as compared to same period last year. Net collections by Federal Board of Revenue (FBR) surpassed the target owing to improvement in business activities. Moreover, better external account numbers provided fiscal space for appreciation of local currency against greenback.

Major contributions towards LSM growth came from Food, Beverages & Tobacco (weight 12.40%), Non Metallic Mineral Products (weight 5.40%), and Pharmaceuticals (weight 3.60%) which increased by 15.75%, 20.77%, and 12.09% respectively. However, some of the increase was eroded by negative contribution from Electronics (weight 2.0%), and Leather Products (weight 0.90%), which decreased by 24.36%, and 40.49% respectively during July-February FY21.

During the period under review, the external account turned positive after witnessing consecutive current account deficits since 4QFY15, resulted in strengthening of local currency by 10.01% since year ended FY20. During nine months of FY21, external account of the country clocked in at a surplus of USD 0.959 billion (0.45% of GDP) as compared to a deficit of USD 4.147 billion (2.07% of GDP) recorded during the same period last year. Improvement in external account can be attributed to a 26.22%YoY surge in workers' remittances we suspect from laid offs and to constraints through informal channels after closure of international flights. The Exports of Goods & Services surged by 1.97%YoY to USD 23.07 billion owing to improvement in exports of textile products. Imports of Goods & Services increased by 4.23%YoY to USD 43.09 billion due to rise in international commodity prices coupled with import of capital goods i.e Plant and Equipment and raw material.

During the 9MFY21, Pakistan was able to attract only USD 1.395 billion in gross FDI as compared to USD 2.150 billion in SPLY, exhibiting a decrease of 35.13% YoY. Portfolio Investment witnessed net an outflow of USD 265.2 million as compared to outflow of USD 103.6 million during SPLY. Moreover, investment in debt securities also turned negative to USD 3.50 million from positive USD 331.40 million owing to a decrease in interest rates. Net open position by foreign investors stood at USD 3.03 billion,

USD 0.38 billion, and USD 0.345 billion in Equity, T-Bills, and PIBs respectively as compared to USD 2.73 billion, USD 0.59 billion, and USD 0.096 billion respectively at the end of FY20.

Total liquid foreign exchange reserves of Pakistan stood at USD 20.84 billion by March 2021 (USD 13.67 billion net reserves with State Bank of Pakistan and USD 7.16 billion net reserves with banks) as compared to USD 17.10 billion in SPLY.

On the fiscal front, the Federal Board of Revenue (FBR) made net revenue collection of PKR 3,394 billion during first nine months of FY21, exceeding its target of PKR 3,287 billion by PKR 107 billion. Net revenue collection surged by 10.34%YoY as compared to PKR 3,076 billion recorded during SPLY owing to faster recovery in the economy. During the period under review, refunds of PKR 177 billion were issued compared to PKR 102 billion for the SPLY. Government is expected to achieve its collection target of PKR 4.69 trillion for FY21, up by 17.3% as compared to FY20 collection of PKR ~4.00 trillion.

As per the Pakistan Bureau of Statistics (PBS), National Consumer Price Index (NCPI) for March 2021 stood at 9.05%YoY which pulled down the average inflation for 9MFY21 to 8.34% as compared to 11.53% SPLY. This significant increase in monthly inflation was primarily due to an increase in prices of Food and Non-alcoholic Beverages (weight 34.58%) by 11.58%YoY.

EQUITY REVIEW:

During nine months of fiscal year 2021, local market continued to make gains where the benchmark KSE-100 index surged by 10,165 points, showing an increase of 29.53%, to close at 44,588 points level. On sequential basis, index surged by 832 points during 3QFY21, an increase of 1.90%QoQ as compared to an increase of 7.85%QoQ witnessed during 2QFY21. Local bourse witnessed healthy participation during the period under review as average daily turnover surged by 1.46x to 483.46 million shares as compared to 196.34 million shares recorded during FY20. Average daily traded value also surged by 59.57% to PKR 18.74 billion as compared to PKR 7.22 billion recorded during FY20. Investor interest was concentrated in second and third tier stocks, with KSE-100 contribution to total volumes decreasing to 55.77% from 68.92% recorded during FY20.

Market participants hailed positive macro developments giving little attention to political noise and rising Covid infection ratio. Some of the key triggers were, (1) country selling USD 2.5 billion in three-tranche Euro bonds, (2) receipt of USD 499 million IMF tranche, (3) PM winning vote of confidence from parliament (4) Current Account Surplus of USD 0.88 billion during 8MFY21 resulting in appreciation of local currency by 10.01%, (5) FBR collection +10.34% during nine months of FY2021, exceeding target of PKR 107 billion, (6) LSM posted growth of 7.45% YoY during July-February FY21, (7) Roshan Digital Account (RDA) received an exuberant response with a deposit of USD 800 million in six months, (8) monthly remittances sustaining USD 2.0 billion mark for 10 consecutive months, and (9) FATF extending action timeline till Jun'21 to complete action plan.

Foreign investors remained net sellers for sixth consecutive quarter with a net outflow of USD 16.48 million. During 9MFY21 Individuals, Companies and Insurance companies were the major net buyers with net inflows of USD 248.13 million, USD 117.83 million, and USD 52.98 million respectively.

However, Banks/DFI and Broker Proprietary Trading were the net sellers with a net outflow of USD 90.56 million and USD 35.23 million respectively.

There was a major outperformance witnessed in different sectors during 9MFY21 which helped the KSE-100 Index maintain its momentum. Sector wise market capitalization i.e. Cement, Commercial Banks, Technology and Communication, Chemicals, and Refinery increased by 54.2%, 17.8%, 129.5%, 31.7%, and 168.5%, respectively. In terms of valuation, KSE-100 Index closed at FY21 Price to Earnings Multiple of 5.92x, 56% discount compared to MSCI Emerging Market P/E of 13.44x, offering a healthy dividend yield of 6.45%.

MONEY MARKET REVIEW:

During 9MFY21, nineteen (19) MTB auctions were conducted, where the State Bank of Pakistan (SBP) managed to raise PKR 9.83 trillion cumulatively. Weighted average yield of 3 months, 6 months, and 12 months MTB were 7.08%, 7.19%, and 7.32%, respectively as compared to 13.38%, 13.35%, and 13.27% for same period last year. It is pertinent to note that the yield curve has been on an increasing trend since touching its low of 6.43%, 6.47%, and 6.55% for 3 months, 6 months, and 12 months MTB, respectively in July 2020 auction, depicting an upward slope in the yield curve within short tenure paper as well. Additionally, upward sloping yield curve for recent MTB auctions further suggests future increase in the interest rates.

To further address demand for liquidity, the SBP conducted nine (9) auctions of fixed rate Pakistan Investment Bonds (PIBs) and was successful in raising PKR 473.92 billion cumulatively during 9MFY21. The weighted average yield of 3 years, 5 years, 10 years, and 20 years fixed rate PIBs were 8.29%, 8.76%, 9.29%, and 10.51% respectively, as compared to 12.56%, 12.11%, 11.87%, and 11.08% during same period last year. Moreover, SBP conducted auction for 30 years fixed rate PIBs during 3QFY21, however no bids were received. The Monetary Policy Committee (MPC) announced four (4) Monetary Policy Statements in 9MFY21, where the Committee maintained the policy rate at 7% amid the Covid-19 pandemic with an aim to cushion the slowdown in growth rate while maintaining its inflation outlook and financial stability. The SBP conducted 67 Open Market Operations (OMO) in 9MFY21 of different maturities, in which it injected an average amount of PKR 669.36 billion per OMO at an average cut-off yield of 7.04%, and mopped up an average amount of PKR 45.59 billion per OMO at an average cut-off yield of 6.91%.

As per the auction target calendar for April – June 2021, the SBP targets to raise PKR 4.70 trillion by issuing 3 months, 6 months, and 12 months MTB against maturity amount of PKR 4.03 trillion. Moreover, SBP targets to raise PKR 375 billion by issuing 3 - 30 years fixed rate PIBs during the period.

FUTURE OUTLOOK:

Going into the fourth quarter of FY2021, the market is expected to follow Budget related news for the fiscal year 2022 along with FATF related news where deadline for compliance had been extended till June 2021. Any Fresh tax imposed may hinder the growth and sentiments of the local market. Pakistan

has committed with IMF to implement PKR 1.272 trillion fresh taxes, PKR 176 billion on salaried class alone, in the upcoming budget FY2021.

IMF has upward revised the estimated growth for FY21 to 1.5% where inflation and current account deficit are expected to clock in at 8.70% and 1.50% of GDP respectively during FY21. IMF has projected the economic growth rate of 4.0% for FY22, which is to reach 5.0% by FY26. The Fund estimates inflation and current account deficit to clock in at 8.0% and 1.80% of GDP during FY22.

With the upcoming result season, near term market performance will largely be guided by earning reads. The benchmark KSE – 100 index is likely to remain in the bull-run trajectory due to upward revision in valuation multiples. We reiterate our stance for positive market outlook based on (i) Expected growth in GDP owing to robust earnings profile (ii) enticing Price to Earnings multiple of 6.1x, (iii) healthy dividend yield of 6.19%, (iv) low profit rate on other asset classes, and (v) increase inflow of funds.

Recent inflows of USD 2.5 billion coupled with a rollover of USD 2.0 billion repayment by UAE along with Government's initiatives for attracting investments from Non-Resident Pakistanis (NRPs) are expected to bode well for the USD PKR parity. Reportedly, Roshan Digital Account has attracted deposits of more than USD 1 billion in more than one hundred thousand accounts as of April 24th, 2021. The RDA initiative is expected to attract USD 1.5 billion during FY21. The new initiative allows Pakistani diaspora to invest in equity market and will bring fresh liquidity to the capital market.

As far as fixed income is concerned, in the latest Monetary Policy Meeting held during March 2021, the Monetary Policy Committee has kept the policy rate at 7.0%, deviating from its policy-setting framework to support economic recovery. The MPC has indicated to keep interest rates stable in the near term where the Central Bank has indicated a shift from stability to growth. Additionally, recent money market auctions on April 21, 2021 by SBP have shown yields of issuances coming down by up to 10 bps, which may lead the market to believe that stability of interest rates and even a potential rate cut may be on the horizon in the next MPC meeting scheduled for May 2021.

IMF has upward revised the estimated growth for FY21 to 1.5% where inflation and current account deficit are expected to clock in at 8.70% and 1.50% of GDP respectively during FY21. IMF has projected the economic growth rate of 4.0% for FY22, which is to reach 5.0% by FY26. The Fund estimates inflation and current account deficit to clock in at 8.0% and 1.80% of GDP during FY22.

With the upcoming result season, near term market performance will largely be guided by earning reads. The benchmark KSE – 100 index is likely to remain in the bull-run trajectory due to upward revision in valuation multiples. We reiterate our stance for positive market outlook based on (i) Expected growth in GDP owing to robust earnings profile (ii) enticing Price to Earnings multiple of 6.1x, (iii) healthy dividend yield of 6.19%, (iv) low profit rate on other asset classes, and (v) increase inflow of funds.

Recent inflows of USD 2.5 billion coupled with a rollover of USD 2.0 billion repayment by UAE along with Government's initiatives for attracting investments from Non-Resident Pakistanis (NRPs) are expected to bode well for the USD PKR parity. Reportedly, Roshan Digital Account has attracted deposits of more than USD 1 billion in more than one hundred thousand accounts as of April 24th, 2021. The RDA initiative is expected to attract USD 1.5 billion during FY21. The new initiative allows Pakistani diaspora to invest in equity market and will bring fresh liquidity to the capital market.

As far as fixed income is concerned, in the latest Monetary Policy Meeting held during March 2021, the Monetary Policy Committee has kept the policy rate at 7.0%, deviating from its policy-setting framework to support economic recovery. The MPC has indicated to keep interest rates stable in the near term where the Central Bank has indicated a shift from stability to growth. Additionally, recent money market auctions on April 21, 2021 by SBP have shown yields of issuances coming down by up to 10 bps, which may lead the market to believe that stability of interest rates and even a potential rate cut may be on the horizon in the next MPC meeting scheduled for May 2021.

15. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

The fair value of financial assets and liabilities traded in active markets (i.e. listed equity shares) are based on the quoted market prices at the close of trading on the reporting date. The quoted market price used for financial assets held by the Fund is current bid price.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

IFRS 13, 'Fair Value Measurements' requires the Fund to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- **Level-1:** Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- **Level-2:** Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- **Level-3:** Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy.

16. IMPACT OF COVID-19

On March 11, 2020, the World Health Organisation made an assessment that the outbreak of a coronavirus (COVID-19) can be characterised as a pandemic. As a result, businesses have subsequently been affected amongst others with temporary suspension of travel, and closure of recreation and public facilities.

To alleviate the negative impact of the COVID-19 pandemic, the Government, Central Banks including financial institutions affiliated to those banks, and regulators have taken measures and issued directives to support businesses, including extensions of deadlines, facilitating continued business through social-distancing and easing pressure on credit and liquidity in the market.

The Management Company has made an assessment in order to evaluate the impact of COVID-19 pandemic over the financial performance of the Fund as well as the going concern assessment. As a result of such assessment, the management has not identified any material adverse impact on its financial performance due to COVID-19 pandemic situation
