MACRO PERSPECTIVE

Pakistan's economy continued to witness robust growth where the pace of the economy has exceeded expectations of the State Bank of Pakistan (SBP). However, the aforementioned growth comes at a cost of a widening Current Account Deficit amid rising domestic demand, PKR depreciation, and an unprecedented increase in international commodity prices.

The SBP opted to prudently remain cautious due to inflationary pressures; hence, increasing the discount rate by 2.75% to 9.75% during the first half of FY22. While approval of the next tranche of USD 1bn from IMF under the Extended Fund Facility is expected to be a catalyst for the economy and provide somewhat respite to the pak rupee.

The external account for 1HFY22 reported a CAD of \$9.09bn (5.7% of GDP) as compared to a surplus of \$1.25 bn (0.9% of GDP) reported during the same period last year (SPLY) owing to an increase in commodity prices, import of plants and machineries under TERF and LTFF loan facilities provided by the SBP and import of Covid vaccines. The Balance of Trade of goods and services surged by \$10.68bn YoY to \$23.01bn as total imports increased by whopping 54% YoY to \$41.7bn. However, the export of goods and services posted 27.27% growth to stand at \$18.65bn. Also, foreign workers continued to support the external account as workers' remittances surged by 11.30% to \$15.81bn. The Government's efforts to attract Non-Resident Pakistani money paid off, with an impressive inflow of \$3.16bn through Roshan Digital Accounts (RDA) from more than 320,000 accounts.

According to press reports, the Federal Board of Revenue (FBR) has made net revenue collections of PKR 2,920bn during 1HFY22, up by 32.5%YoY as compared to PKR 2,204bn recorded during SPLY. FBR has exceeded its given target of PKR 2,633bn by a margin of PKR 287 billion. The amount of refunds disbursed was PKR 148bn during 1HFY22 compared to PKR 111bn paid last year, showing an increase of 33%.

As per the Pakistan Bureau of Statistics (PBS), the average National Consumer Price Index (NCPI) in 1HFY22 was recorded at 9.81%YoY as compared to 8.63%YoY recorded during 1HFY21. Core Inflation - excluding food and energy prices, clocked in at 7.03% YoY and 7.18% YoY for Urban and Rural areas respectively, as compared to 5.53% YoY and 7.65% YoY during the SPLY.

The Large Scale Manufacturing (LSM) sector witnessed an increase of 3.26% YoY for July-November FY22 as compared to 6.85% YoY reported during SPLY. During the period under review, major contribution towards the growth came from Automobiles, Iron & Steel Products, Paper & Board, Coke & Petroleum Products to name a few. However, overall growth during the period was kept in check by sectors that posted negative growth including Fertilizers, Electronics, and Rubber Products.

EQUITY MARKET REVIEW

During the first half of FY22, KSE-100 Index declined by 2,760pts, down by 5.83% to close at 44,596.07 pts. The Equity market remained under pressure owing to Political unrest following senate elections, MSCI downgrade from Emerging Market to Frontier Market, surge in commodity prices leading to a ballooning CAD, and higher inflation were a few key factors that kept the investor sentiment cautious at best despite record breaking earnings in some instances.

Average daily turnover also decreased by 23.78%YoY to 340.88 million shares and down by 44.31% as compared to the second half FY21. Market participants remained sidelined owing to skepticism over the resumption of the IMF program and resultant contractionary fiscal policies introduced by the

Government of Pakistan (GoP). Moreover, investor interest diverted to second and third-tier stocks as depicted by a decrease in the ratio of KSE-100 volumes over total turnover.

Some of the news flow that weighed on investor sentiments included: 1) Pakistan remaining on FATF's grey list, 2) International commodity prices soar, 3) MSCI downgrades PSX from Emerging market to Frontier market, 4) SBP increased the policy rate by 275bps to 9.75%, 5) Political unrest amid DG ISI appointment, and 6) CAD increases significantly 7) Saudi Arabia announces \$3bn support to Pakistan, 8) SBP receives Inflows of US\$2.7bn under IMF SDR allocation and 9) Cabinet approves PKR 1.4bn payment to the IPPs.

Foreign investors continued to remain net sellers with net outflows of US\$250.35mn. Individuals, Insurance Companies, Corporates were major buyers with net inflows of US\$72.00mn, US\$65.84mn, US\$59.80mn, respectively. Whereas Mutual Funds and brokers were net sellers with net outflows of US\$10.57mn and US\$12.11mn respectively.

The sectors that dragged the KSE-100 down the most included Cement (-18.48%), Tobacco (-17.23%), Refinery (-43.03%), Automobile Assemblers (-15.61%), and Food and Personal Care Products (-7.26%). However, some of the losses were compensated by Commercial banks (6.58%), Miscellaneous (35.76%), Technology and Communication (3.85%), Modarabas (65.83%), Synthetic and Rayon (7.80%).

In terms of valuation, the KSE-100 Index closed at a forward Price to Earnings multiple of 4.96x, which is a 66.04% discount as compared to MSCI Frontier Markets P/E of 14.61x and offering a healthy dividend yield of 7.75%.

MONEY MARKET REVIEW

During 1HYF22, thirteen (13) MTB auctions were carried out by the SBP, where the government managed to raise PKR 7.73trn cumulatively. Weighted average yield of 3, 6 and 12 months MTB were 8.09%, 8.37%, and 8.25% respectively, up by 1.07%, 1.30%, and 1.08% as compared to 7.02%, 7.07%, and 7.16% same period last year.

SBP also conducted three (3) auctions of Fixed Rate Pakistan Investment Bonds (PIBs) and was successful in raising PKR 696.84bn during 1HFY22. The weighted average yield for 3, 5, and 10 years PIBs increased by 1.23%, 1.18%, and 1.22% to 9.25%, 9.58%, and 10.17% respectively as compared to 8.02%, 8.40%, and 8.95% for the same period last year.

The Monetary Policy Committee announced four (4) Monetary Policy Statements during 1HFY22 where the Committee decided to raise the policy rate by 275 basis points to 9.75% to counter inflationary pressures and a deteriorating trade deficit. The SBP conducted 52 Open Market Operations (OMO) of different maturities and injected an average amount of PKR 1.11trn at an average cut-off yield of 7.86% and the mopped-up average amount of PKR 0.11trn at an average cut off yield of 7.23%.

As per the auction target calendar for January – March 2022, the SBP targets to raise PKR 4.40trn by issuing MTB against the maturing amount of PKR 4.53trn. In addition, SBP targets to raise another PKR 300bn through 3 – 30 years Fixed Rate PIBs during the period.

FUTURE OUTLOOK

On a forward-looking basis, we remain optimistic about the economic outlook for FY22, where the SBP expects the growth rate to be in the upper range of 4 to 5 percent.

The CAD is expected to clock in at 4.5-5% of GDP in FY22, higher than SBP's projection of 4%, \$13bn. This is because the CAD for 1HFY22 was reported at over \$9.09bn as international commodity prices particularly oil which trades around its 7 year high despite onset of Omicron variant of COVID-19. More importantly, the external funding requirement will correspondingly increase from earlier expectations of \$26bn, which was based on a lower CAD estimate by SBP.

The local currency witnessed a steep decline in the 1HFY22 period and now stands at PKR/USD 178.17 which is a 11.58% depreciation in just six months alone. We expect the exchange rate to however stabilize in the months following the much awaited IMF Board's approval in February. While the Real Effective Exchange Rate (REER) of 96.74 at the end of December 2021 is in line with overall market consensus that the pak rupee, should stabilize to appreciate in the near term.

We concur with the SBP and expect commodity prices to reverse by the end of FY22-23 on the back of anticipated monetary tightening by the US Fed owing to a sharp increase in inflation. Indeed, this shall bode well and provide much needed fiscal space to Pakistan's external account and draw down on inflation. Reportedly, SBP in its last monetary policy communication highlighted that 'the end goal of mildly positive real interest rates on a forward-looking basis was now close to being achieved', hence, forward looking it seems the Central Bank while cognizant of the external account and inflationary pressures is somewhat satisfied with the current dollar/rupee parity and interest rates respectively.

We believe the reclassification of Pakistan to the MSCI Frontier Market category will reduce foreign selling which has been recorded since FY16 as the local bourse would have a more significant weight of a much smaller fund allocated to frontier markets, unlike the case in the emerging markets.

On the Fixed Income front, nominal increases in interest rates cannot be ruled out as agreed with International Monetary Fund in its staff-level agreement, will bode well for yields of fixed income instruments.

We maintain our bullish stance on the stock market as the international commodity prices shift their direction, coupled with an increase in the adoption of Covid-19 vaccines and boosters will stabilize the negative sentiment of the economy. With the beginning of monetary contraction, we expect inflation to normalize and the CAD to improve as a result of an foreseeable decrease in imports. We reiterate our positive market outlook for FY22 based on (i) strong earnings growth of the corporate sector, (ii) resumption of the IMF program, (iii) compelling Price to Earnings multiple of 4.96x, (iv) Healthy dividend yield of 7.75% (iv) negative real interest rates.

On a forward-looking basis, we remain optimistic about the economic outlook for FY22, where the SBP expects the growth rate to be in the upper range of 4 to 5 percent.

The CAD is expected to clock in at 4.5-5% of GDP in FY22, higher than SBP's projection of 4%, \$13bn. While the Real Effective Exchange Rate (REER) of 96.74 at the end of December 2021 is in line with overall market consensus that the pak rupee, should stabilize to appreciate in the near term.

We concur with the SBP and expect commodity prices to reverse by the end of FY22-23 on the back of anticipated monetary tightening by the US Fed owing to a sharp increase in inflation. Indeed, this shall bode well and provide much needed fiscal space to Pakistan's external account and draw down on inflation. Reportedly, SBP in its last monetary policy communication highlighted that 'the end goal of mildly positive real interest rates on a forward-looking basis was now close to being achieved', hence, forward looking it seems the Central Bank while cognizant of the external account and inflationary pressures is somewhat satisfied with the current dollar/rupee parity and interest rates respectively.

We believe the reclassification of Pakistan to the MSCI Frontier Market category will reduce foreign selling which has been recorded since FY16 as the local bourse would have a more significant weight of a much smaller fund allocated to frontier markets, unlike the case in the emerging markets.

The development was discussed at MUFAP level and has also been taken up with the SECP and all the AMCs, in consultation with SECP, have reversed the cumulative provision for SWWF recognised in the financial statements of the

18. FAIR VALUE OF FINANCIAL INSTRUMENTS

IFRS 13 - 'Fair Value Measurement' establishes a single source of guidance under IFRS for all fair value measurements and disclosures about fair value measurement where such measurements are required as permitted by other IFRSs. It defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the close of trading i.e. period end date. The estimated fair value of all other financial assets and financial liabilities is considered not significantly

The following table shows financial instruments recognized at fair value based on:

- Level 1: quoted prices in active markets for identical assets or liabilities;
- Level 2: those involving inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
- Level 3: those with inputs for the asset or liability that are not based on observable market data (unobservable inputs).

MACRO PERSPECTIVE

Pakistan's economy continued to witness robust growth where the pace of the economy has exceeded expectations of the State Bank of Pakistan (SBP). However, the aforementioned growth comes at a cost of a widening Current Account Deficit amid rising domestic demand, PKR depreciation, and an unprecedented increase in international commodity prices.

The SBP opted to prudently remain cautious due to inflationary pressures; hence, increasing the discount rate by 2.75% to 9.75% during the first half of FY22. While approval of the next tranche of USD 1bn from IMF under the Extended Fund Facility is expected to be a catalyst for the economy and provide somewhat respite to the pak rupee.

The external account for 1HFY22 reported a CAD of \$9.09bn (5.7% of GDP) as compared to a surplus of \$1.25 bn (0.9% of GDP) reported during the same period last year (SPLY) owing to an increase in commodity prices, import of plants and machineries under TERF and LTFF loan facilities provided by the SBP and import of Covid vaccines. The Balance of Trade of goods and services surged by \$10.68bn YoY to \$23.01bn as total imports increased by whopping 54% YoY to \$41.7bn. However, the export of goods and services posted 27.27% growth to stand at \$18.65bn. Also, foreign workers continued to support the external account as workers' remittances surged by 11.30% to \$15.81bn. The Government's efforts to attract Non-Resident Pakistani money paid off, with an impressive inflow of \$3.16bn through Roshan Digital Accounts (RDA) from more than 320,000 accounts.

According to press reports, the Federal Board of Revenue (FBR) has made net revenue collections of PKR 2,920bn during 1HFY22, up by 32.5%YoY as compared to PKR 2,204bn recorded during SPLY. FBR has exceeded its given target of PKR 2,633bn by a margin of PKR 287 billion. The amount of refunds disbursed was PKR 148bn during 1HFY22 compared to PKR 111bn paid last year, showing an increase of 33%.

As per the Pakistan Bureau of Statistics (PBS), the average National Consumer Price Index (NCPI) in 1HFY22 was recorded at 9.81%YoY as compared to 8.63%YoY recorded during 1HFY21. Core Inflation - excluding food and energy prices, clocked in at 7.03% YoY and 7.18% YoY for Urban and Rural areas respectively, as compared to 5.53% YoY and 7.65% YoY during the SPLY.

The Large Scale Manufacturing (LSM) sector witnessed an increase of 3.26% YoY for July-November FY22 as compared to 6.85% YoY reported during SPLY. During the period under review, major contribution towards the growth came from Automobiles, Iron & Steel Products, Paper & Board, Coke & Petroleum Products to name a few. However, overall growth during the period was kept in check by sectors that posted negative growth including Fertilizers, Electronics, and Rubber Products.

EQUITY MARKET REVIEW

During the first half of FY22, KSE-100 Index declined by 2,760pts, down by 5.83% to close at 44,596.07 pts. The Equity market remained under pressure owing to Political unrest following senate elections, MSCI downgrade from Emerging Market to Frontier Market, surge in commodity prices leading to a ballooning CAD, and higher inflation were a few key factors that kept the investor sentiment cautious at best despite record breaking earnings in some instances.

Average daily turnover also decreased by 23.78%YoY to 340.88 million shares and down by 44.31% as compared to the second half FY21. Market participants remained sidelined owing to skepticism over the resumption of the IMF program and resultant contractionary fiscal policies introduced by the

Government of Pakistan (GoP). Moreover, investor interest diverted to second and third-tier stocks as depicted by a decrease in the ratio of KSE-100 volumes over total turnover.

Some of the news flow that weighed on investor sentiments included: 1) Pakistan remaining on FATF's grey list, 2) International commodity prices soar, 3) MSCI downgrades PSX from Emerging market to Frontier market, 4) SBP increased the policy rate by 275bps to 9.75%, 5) Political unrest amid DG ISI appointment, and 6) CAD increases significantly 7) Saudi Arabia announces \$3bn support to Pakistan, 8) SBP receives Inflows of US\$2.7bn under IMF SDR allocation and 9) Cabinet approves PKR 1.4bn payment to the IPPs.

Foreign investors continued to remain net sellers with net outflows of US\$250.35mn. Individuals, Insurance Companies, Corporates were major buyers with net inflows of US\$72.00mn, US\$65.84mn, US\$59.80mn, respectively. Whereas Mutual Funds and brokers were net sellers with net outflows of US\$10.57mn and US\$12.11mn respectively.

The sectors that dragged the KSE-100 down the most included Cement (-18.48%), Tobacco (-17.23%), Refinery (-43.03%), Automobile Assemblers (-15.61%), and Food and Personal Care Products (-7.26%). However, some of the losses were compensated by Commercial banks (6.58%), Miscellaneous (35.76%), Technology and Communication (3.85%), Modarabas (65.83%), Synthetic and Rayon (7.80%).

In terms of valuation, the KSE-100 Index closed at a forward Price to Earnings multiple of 4.96x, which is a 66.04% discount as compared to MSCI Frontier Markets P/E of 14.61x and offering a healthy dividend yield of 7.75%.

MONEY MARKET REVIEW

During 1HYF22, thirteen (13) MTB auctions were carried out by the SBP, where the government managed to raise PKR 7.73trn cumulatively. Weighted average yield of 3, 6 and 12 months MTB were 8.09%, 8.37%, and 8.25% respectively, up by 1.07%, 1.30%, and 1.08% as compared to 7.02%, 7.07%, and 7.16% same period last year.

SBP also conducted three (3) auctions of Fixed Rate Pakistan Investment Bonds (PIBs) and was successful in raising PKR 696.84bn during 1HFY22. The weighted average yield for 3, 5, and 10 years PIBs increased by 1.23%, 1.18%, and 1.22% to 9.25%, 9.58%, and 10.17% respectively as compared to 8.02%, 8.40%, and 8.95% for the same period last year.

The Monetary Policy Committee announced four (4) Monetary Policy Statements during 1HFY22 where the Committee decided to raise the policy rate by 275 basis points to 9.75% to counter inflationary pressures and a deteriorating trade deficit. The SBP conducted 52 Open Market Operations (OMO) of different maturities and injected an average amount of PKR 1.11trn at an average cut-off yield of 7.86% and the mopped-up average amount of PKR 0.11trn at an average cut off yield of 7.23%.

As per the auction target calendar for January – March 2022, the SBP targets to raise PKR 4.40trn by issuing MTB against the maturing amount of PKR 4.53trn. In addition, SBP targets to raise another PKR 300bn through 3 – 30 years Fixed Rate PIBs during the period.

FUTURE OUTLOOK

On a forward-looking basis, we remain optimistic about the economic outlook for FY22, where the SBP expects the growth rate to be in the upper range of 4 to 5 percent.

The CAD is expected to clock in at 4.5-5% of GDP in FY22, higher than SBP's projection of 4%, \$13bn. This is because the CAD for 1HFY22 was reported at over \$9.09bn as international commodity prices particularly oil which trades around its 7 year high despite onset of Omicron variant of COVID-19. More importantly, the external funding requirement will correspondingly increase from earlier expectations of \$26bn, which was based on a lower CAD estimate by SBP.

The local currency witnessed a steep decline in the 1HFY22 period and now stands at PKR/USD 178.17 which is a 11.58% depreciation in just six months alone. We expect the exchange rate to however stabilize in the months following the much awaited IMF Board's approval in February. While the Real Effective Exchange Rate (REER) of 96.74 at the end of December 2021 is in line with overall market consensus that the pak rupee, should stabilize to appreciate in the near term.

We concur with the SBP and expect commodity prices to reverse by the end of FY22-23 on the back of anticipated monetary tightening by the US Fed owing to a sharp increase in inflation. Indeed, this shall bode well and provide much needed fiscal space to Pakistan's external account and draw down on inflation. Reportedly, SBP in its last monetary policy communication highlighted that 'the end goal of mildly positive real interest rates on a forward-looking basis was now close to being achieved', hence, forward looking it seems the Central Bank while cognizant of the external account and inflationary pressures is somewhat satisfied with the current dollar/rupee parity and interest rates respectively.

We believe the reclassification of Pakistan to the MSCI Frontier Market category will reduce foreign selling which has been recorded since FY16 as the local bourse would have a more significant weight of a much smaller fund allocated to frontier markets, unlike the case in the emerging markets.

On the Fixed Income front, nominal increases in interest rates cannot be ruled out as agreed with International Monetary Fund in its staff-level agreement, will bode well for yields of fixed income instruments.

We maintain our bullish stance on the stock market as the international commodity prices shift their direction, coupled with an increase in the adoption of Covid-19 vaccines and boosters will stabilize the negative sentiment of the economy. With the beginning of monetary contraction, we expect inflation to normalize and the CAD to improve as a result of an foreseeable decrease in imports. We reiterate our positive market outlook for FY22 based on (i) strong earnings growth of the corporate sector, (ii) resumption of the IMF program, (iii) compelling Price to Earnings multiple of 4.96x, (iv) Healthy dividend yield of 7.75% (iv) negative real interest rates.

MACRO PERSPECTIVE

Pakistan's economy continued to witness robust growth where the pace of the economy has exceeded expectations of the State Bank of Pakistan (SBP). However, the aforementioned growth comes at a cost of a widening Current Account Deficit amid rising domestic demand, PKR depreciation, and an unprecedented increase in international commodity prices.

The SBP opted to prudently remain cautious due to inflationary pressures; hence, increasing the discount rate by 2.75% to 9.75% during the first half of FY22. While approval of the next tranche of USD 1bn from IMF under the Extended Fund Facility is expected to be a catalyst for the economy and provide somewhat respite to the pak rupee.

The external account for 1HFY22 reported a CAD of \$9.09bn (5.7% of GDP) as compared to a surplus of \$1.25 bn (0.9% of GDP) reported during the same period last year (SPLY) owing to an increase in commodity prices, import of plants and machineries under TERF and LTFF loan facilities provided by the SBP and import of Covid vaccines. The Balance of Trade of goods and services surged by \$10.68bn YoY to \$23.01bn as total imports increased by whopping 54% YoY to \$41.7bn. However, the export of goods and services posted 27.27% growth to stand at \$18.65bn. Also, foreign workers continued to support the external account as workers' remittances surged by 11.30% to \$15.81bn. The Government's efforts to attract Non-Resident Pakistani money paid off, with an impressive inflow of \$3.16bn through Roshan Digital Accounts (RDA) from more than 320,000 accounts.

According to press reports, the Federal Board of Revenue (FBR) has made net revenue collections of PKR 2,920bn during 1HFY22, up by 32.5%YoY as compared to PKR 2,204bn recorded during SPLY. FBR has exceeded its given target of PKR 2,633bn by a margin of PKR 287 billion. The amount of refunds disbursed was PKR 148bn during 1HFY22 compared to PKR 111bn paid last year, showing an increase of 33%.

As per the Pakistan Bureau of Statistics (PBS), the average National Consumer Price Index (NCPI) in 1HFY22 was recorded at 9.81%YoY as compared to 8.63%YoY recorded during 1HFY21. Core Inflation - excluding food and energy prices, clocked in at 7.03% YoY and 7.18% YoY for Urban and Rural areas respectively, as compared to 5.53% YoY and 7.65% YoY during the SPLY.

The Large Scale Manufacturing (LSM) sector witnessed an increase of 3.26% YoY for July-November FY22 as compared to 6.85% YoY reported during SPLY. During the period under review, major contribution towards the growth came from Automobiles, Iron & Steel Products, Paper & Board, Coke & Petroleum Products to name a few. However, overall growth during the period was kept in check by sectors that posted negative growth including Fertilizers, Electronics, and Rubber Products.

EQUITY MARKET REVIEW

During the first half of FY22, KSE-100 Index declined by 2,760pts, down by 5.83% to close at 44,596.07 pts. The Equity market remained under pressure owing to Political unrest following senate elections, MSCI downgrade from Emerging Market to Frontier Market, surge in commodity prices leading to a ballooning CAD, and higher inflation were a few key factors that kept the investor sentiment cautious at best despite record breaking earnings in some instances.

Average daily turnover also decreased by 23.78%YoY to 340.88 million shares and down by 44.31% as compared to the second half FY21. Market participants remained sidelined owing to skepticism over the resumption of the IMF program and resultant contractionary fiscal policies introduced by the Government of Pakistan (GoP). Moreover, investor interest diverted to second and third-tier stocks as depicted by a decrease in the ratio of KSE-100 volumes over total turnover.

Some of the news flow that weighed on investor sentiments included: 1) Pakistan remaining on FATF's grey list, 2) International commodity prices soar, 3) MSCI downgrades PSX from Emerging market to Frontier market, 4) SBP increased the policy rate by 275bps to 9.75%, 5) Political unrest amid DG ISI appointment, and 6) CAD increases significantly 7) Saudi Arabia announces \$3bn support to Pakistan, 8) SBP receives Inflows of US\$2.7bn under IMF SDR allocation and 9) Cabinet approves PKR 1.4bn payment to the IPPs.

Foreign investors continued to remain net sellers with net outflows of US\$250.35mn. Individuals, Insurance Companies, Corporates were major buyers with net inflows of US\$72.00mn, US\$65.84mn, US\$59.80mn, respectively. Whereas Mutual Funds and brokers were net sellers with net outflows of US\$10.57mn and US\$12.11mn respectively.

The sectors that dragged the KSE-100 down the most included Cement (-18.48%), Tobacco (-17.23%), Refinery (-43.03%), Automobile Assemblers (-15.61%), and Food and Personal Care Products (-7.26%). However, some of the losses were compensated by Commercial banks (6.58%), Miscellaneous (35.76%), Technology and Communication (3.85%), Modarabas (65.83%), Synthetic and Rayon (7.80%).

In terms of valuation, the KSE-100 Index closed at a forward Price to Earnings multiple of 4.96x, which is a 66.04% discount as compared to MSCI Frontier Markets P/E of 14.61x and offering a healthy dividend yield of 7.75%.

FUTURE OUTLOOK

On a forward-looking basis, we remain optimistic about the economic outlook for FY22, where the SBP expects the growth rate to be in the upper range of 4 to 5 percent.

The CAD is expected to clock in at 4.5-5% of GDP in FY22, higher than SBP's projection of 4%, \$13bn. This is because the CAD for 1H FY22 was reported at over \$9.09bn as international commodity prices particularly oil which trades around its 7 year high despite onset of Omicron variant of COVID-19. The local currency witnessed a steep decline in the 1HFY22 period and now stands at PKR/USD 178.17 which is a 11.58% depreciation in just six months alone. We expect the exchange rate to however stabilize in the months following the much awaited IMF Board's approval in February. While the Real Effective Exchange Rate (REER) of 96.74 at the end of December 2021 is in line with overall market consensus that the pak rupee, should stabilize to appreciate in the near term.

We concur with the SBP and expect commodity prices to reverse by the end of FY22-23 on the back of anticipated monetary tightening by the US Fed owing to a sharp increase in inflation. Indeed, this shall bode well and provide much needed fiscal space to Pakistan's external account and draw down on inflation. Reportedly, SBP in its last monetary policy communication highlighted that 'the end goal of mildly positive real interest rates on a forward-looking basis was now close to being achieved', hence, forward looking it seems the Central Bank while cognizant of the external account and inflationary pressures is somewhat satisfied with the current dollar/rupee parity and interest rates respectively.

On the Fixed Income front, nominal increases in interest rates cannot be ruled out as agreed with International Monetary Fund in its staff-level agreement, will bode well for yields of fixed income instruments.

12.1 Provision for Sindh Workers' Welfare Fund (SWWF)

During the period, Sindh Revenue Board (SRB) through its letter dated August 12, 2021, has clarified the legal status of applicability of Sindh Workers' Welfare Fund (SWWF).

As per the said letter, having reference no. SRB/TP/70/2013/8772, the Asset Management Companies (AMC) are covered under the term "financial institutions" as per the section 2(g)(v) of the SWWF Act, 2014 and are therefore, subject to SWWF charge, whereas, the Mutual Funds / Pension Funds managed by those AMCs do not qualify as "Financial Institutions / Industrial Establishments" as per the SWWF Act, 2014 and are therefore, not liable to pay SWWF contributions.

The development was discussed at MUFAP level and has also been taken up with the SECP and all the AMCs, in consultation with SECP, have reversed the cumulative provision for SWWF recognised in the financial statements of the Funds.

Consequently, the management has reversed all the provision recognised in respect of SWWF amounting to Rs. 2.263 million.

13. CONTINGENCIES AND COMMITMENTS

There were no contingencies and commitments as at December 31, 2021 and June 30, 2021.

14. TOTAL EXPENSE RATIO

The total expense ratio (TER) of the Fund from July 1, 2021 to December 31, 2021 is 4.05% (annualised) (June 30, 2021: 4.96%) and this includes 0.34% (June 30, 2021: 1.20%) representing government levies on the Fund such as sales taxes, annual fees to SECP etc.

15. TAXATION

The Fund's income is exempt from income tax as per clause (99) of part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than 90% of the accounting income for the year as reduced by capital gains, whether realised or unrealised, is distributed amongst the unit holders by way of cash dividend. Furthermore, as per regulation 63 of the Non-Banking Finance Companies and Notified Entities Regulation, 2008, the Fund is required to distribute 90% of the net accounting income other than unrealised capital gains to the unit holders in cash. Since the management intends to distribute the income earned by the Fund during the period to the unit holders in cash in the manner as explained above, accordingly, no provision for taxation has been made in this condensed interim financial information. 17. FAIR VALUE OF FINANCIAL INSTRUMENTS

IFRS 13 - 'Fair Value Measurement' establishes a single source of guidance under IFRS for all fair value measurements and disclosures about fair value measurement where such measurements are required as permitted by other IFRSs. It defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the close of trading i.e. period end date. The estimated fair value of all other financial assets and financial liabilities is considered not significantly different from book value as these are short term in nature.

The following table shows financial instruments recognised at fair value based on:

- Level 1: quoted prices in active markets for identical assets or liabilities;
- Level 2: those involving inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
- Level 3: those with inputs for the asset or liability that are not based on observable market data (unobservable inputs).
