Introduction

We have reviewed the accompanying condensed interim statement of financial position **Hascol Petroleum Limited** (the Company) as at June 30, 2019 and the related condensed interim profit and loss account, condensed interim statement of comprehensive income, condensed interim statement of changes in equity, and condensed interim statement of cash flows, and notes to the condensed interim financial statements for the six months period then ended (here-in-after referred to as the "condensed interim financial statements"). Management is responsible for the preparation and fair presentation of these condensed interim financial statements in accordance with accounting and reporting standards as applicable in Pakistan for interim financial reporting. Our responsibility is to express a conclusion on these condensed interim financial statements based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of condensed interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

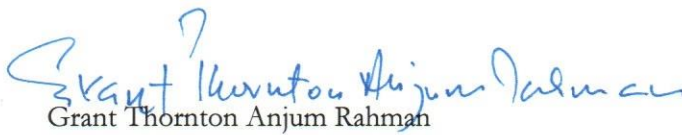

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed interim financial statements is not prepared, in all material respects, in accordance with the accounting and reporting standards as applicable in Pakistan for interim financial reporting.

Other Matter

The figures for the quarter ended June 30, 2019 in the condensed interim profit and loss account and condensed interim statement of comprehensive income have not been reviewed and we do not express a conclusion on them.

The engagement partner on the review resulting in this independent auditor's review report is **Muhammad Shaukat Naseeb**.

Chief Executive Officer

Chief Financial Officer

Director

HASCOL PETROLEUM LIMITED
NOTES TO THE CONDENSED INTERIM FINANCIAL INFORMATION
FOR THE SIX MONTHS PERIOD ENDED JUNE 30, 2019

1 STATUS AND NATURE OF BUSINESS

- 1.1** Hascol Petroleum Limited (the Company) was incorporated in Pakistan as a private limited company on March 28, 2001. On September 12, 2007 the Company was converted into a public unlisted company and on May 12, 2014 the Company was listed on the Pakistan Stock Exchange Limited. The registered office of the Company is situated at Suite No.105-106, The Forum, Khayaban-e-Jami, Clifton, Karachi.
- 1.2** The Company is engaged in the business of procurement, storage and marketing of petroleum, chemicals, LPG and related products. The Company obtained oil marketing license from Ministry of Petroleum and Natural Resources in the year 2005 and acquired assets of LPG licenced company in the year 2018.
- 1.3** The economic down trend and reduction in overall market size has impacted the company's profitability. During the period under review, the Company reported Loss of Rs. 11 billion. Major contributory of this extra ordinary loss are lower gross profit due to dip in sales volume , inventory losses and substantial increase in finance cost due to a sharp rise in the discount rate by SBP, and higher average borrowing levels vs. same period last year. However, the company managed to control its operating cost at the same level despite mounting inflation.

The management of the Company has taken the following steps to improve the Company's financial position.

1) Financial support from major shareholder

Vitol Dubai Limited has agreed to provide facilities of USD 42 million, details of which includes:

	USD in millions
Bank Guarantee facility	15
Open Credit Limit facility:	12
Stock availability at HTL Port Qasim Terminal	15
	42

2) Monitoring of the Company's operating cash flows

The company has taken various measures to tighten cost controls over operating costs and expenses with the aim to attain profitable and positive cash flow operations. The directors are taking steps to improve the company's liquidity and financial performance including active cost-saving and other measures to improve the company's operating cash flows and financial position.

3) Financial support from directors of the Company

In addition, a director of the Company has confirmed to provide financial support to the company to meet its financial obligations as they fall due, if required.

The directors of the Company have reviewed the Company's cash flow projections prepared by management. The cash flow projections covered a period of not less than twelve months from the end of the reporting period. They are of the opinion that, taking into account the above-mentioned plans and measures, the company would have sufficient working capital to finance its operations and to meet its financial obligations as and when they fall due within the next twelve months from the end of the reporting period.

2 BASIS OF PREPARATION

2.1 Statement of Compliance

The condensed interim financial information of the Company for the six month period ended June 30, 2019 is unaudited and have been prepared in accordance with the requirements of the International Accounting Standard 34 - 'Interim Financial Reporting' and provisions of and directives issued under the Companies Act, 2017 (the Act). In case where requirements differ, the provisions of or directives issued under the Act have been followed.

This condensed interim financial information is being submitted to the shareholders in accordance with section 237 of the Act and should be read in conjunction with the audited financial statements of the Company for the year ended December 31, 2018.

3 Initial application of standards, amendments or an interpretation to existing standards.

Standards, interpretations and amendments to published approved accounting standards that became effective during the period The following accounting standards became effective during the period as applicable in Pakistan for the first time for the period ended June 30, 2019 and are relevant to the Company.

3.1 IFRS 15 - Revenue from Contracts with Customers

Effective July 1, 2018, the Company has applied IFRS 15 "Revenue from Contracts with Customers" for determining its revenue recognition policy. IFRS 15 replaces IAS 18 "Revenue" and IAS 11 "Construction Contracts" and related interpretations. IFRS 15 addresses revenue recognition for contracts with customers as well as treatment of incremental costs incurred in acquiring a contract with a customer.

IFRS 15 establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. Specifically, the standard introduces a 5 - step approach to revenue recognition:

- Step 1: Identify the contract with a customer.
- Step 2: Identify the performance obligations in the contract.
- Step 3: Determine the transaction price.
- Step 4: Allocate the transaction price to the performance obligations in the contract.
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation.

Under IFRS 15, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer.

The Company is engaged in the procurement, storage and marketing of petroleum and related products. It also blends and markets various kinds of lubricating oils. The Company has assessed that significant performance obligations in contracts with customers is based on transfer of control of related goods and is discharged at that point of time. The transfer of goods takes place upon delivery of goods to customers. The standard requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers.

Based on the above, the Company considers that its existing accounting policies are substantially in compliance with the requirements of IFRS 15.

3.2 IFRS 9 - 'Financial instruments'

IFRS 9 'Financial instruments' - 'This standard replaces the guidance in IAS 39. "Financial instruments: Recognition and measurement"

IFRS 9 introduces new requirements for:

- i) the classification and measurement of financial assets and financial liabilities;
- ii) Impairment of financial assets and;
- iii) hedge accounting.

IFRS 9 permits either a full retrospective or a modified retrospective approach for adoption. The Company has adopted the standard using the modified retrospective approach for classification, measurement and impairment. This means that the cumulative impact, if any, of the adoption is recognized in unappropriated profit as of July 1, 2018 and comparatives are not restated. Details of these new requirements as well as their impact on the Company's financial statements are described below:

3.2.1 Classification and measurement of financial assets and financial liabilities

This new standard requires the Company to assess the classification of financial assets in its statement of financial position in accordance with the cash flow characteristics of the financial assets and the relevant business model that the Company has for a specific class of financial asset.

IFRS 9 no longer has an "Available for Sale" classification for financial assets. IFRS 9 has different requirements for debt and equity financial assets.

Debt instrument should be classified and measured at either:

- amortised cost, where the effective interest rate method will apply;
- fair value through other comprehensive income (FVTOCI), with subsequent recycling to the profit or loss upon disposal of the financial asset; or
- fair value through profit or loss (FVTPL).

Investment in equity instruments, other than those to which consolidation or equity accounting applies should be classified and measured at:

- fair value through other comprehensive income (FVTOCI), with no subsequent recycling to the profit or loss upon disposal of the financial asset; or
- fair value through profit or loss (FVTPL).

Application of IFRS 9 had no impact on financial assets and financial liabilities of the Company except long term investment in PRL classified as FVTOCI.

3.2.2 Impairment of financial

IFRS 9 introduces the Expected Credit Loss (ECL) model, which replaces the incurred loss model of IAS 39 whereby an allowance for doubtful debt was required only in circumstances where a loss event has occurred. By contrast, the ECL model requires the Company to recognize an allowance for doubtful debt on all financial assets carried at amortized cost (including, for example, trade debts and other receivables), as well as debt instruments classified as financial assets carried at fair value through other comprehensive income, since initial recognition, irrespective whether a loss event has occurred.

HASCOL PETROLEUM LIMITED
NOTES TO THE CONDENSED INTERIM FINANCIAL INFORMATION
FOR THE SIX MONTHS PERIOD ENDED JUNE 30, 2019

For trade debts, the Company applies IFRS 9 simplified approach to measure the expected credit losses (loss allowance) which uses a life time expected loss allowance while general 3-stage approach for other financial assets (deposits and other receivables, PIBs, T-Bills and cash and bank balances) i.e to measure ECL through loss allowance at an amount equal to 12-month ECL if credit risk on a financial instrument or a group of financial instruments has not increased significantly since initial recognition.

Application of IFRS 9 had no impact on financial liabilities of the Company.

Assessment of financial impact of measurement requirements on adoption of IFRS 9 as at June 30, 2019 is as follows:

	Measurement category		Carrying amount		Difference Rs ‘000
	Original (IAS 39)	New (IFRS 9)	Original Rs ‘000	New Rs ‘000	
Current financial assets					
Trade receivables	Amortised Cost	Amortised Cost	13,156,147	12,317,258	838,889
Deposits and other receivables	Amortised Cost	Amortised Cost	3,342,179	3,342,179	-
Short term investments - TFC	Amortised Cost	Amortised Cost	105,000	105,000	-
Cash and bank balances	Amortised Cost	Amortised Cost	7,027,561	7,027,561	-
Non-current financial assets					
Long term investments					
equity shares	Available sale	for FVTOCI	698,912	698,912	-
long term investments					
equity shares	Cost	Cost	378,000	378,000	-
Current financial liabilities					
Trade and other payables	Amortised Cost	Amortised Cost	48,943,824	48,943,824	-
Unclaimed dividend	Amortised Cost	Amortised Cost	357,365	357,365	-

3.2.2 IFRS 16 - Leases

IFRS 16 supersedes IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The new standard also sets out the principles for the recognition, measurement, presentation and disclosure of leases. Under the new standard, distinction between operating and finance leases has been removed and all lease contracts, with limited exceptions, will be recognized in statement of financial position by way of right-of-use assets along with their corresponding lease liabilities.

The right-of-use assets were recognized based on the amount equal to lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognized. Lease liabilities were recognized based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application. However the management assessed that IFRS 16 is not applicable on the Company as all the rental properties having lease term less than 12 months and other leased assets are obtained via Islamic financing.

4 ACCOUNTING POLICIES

The accounting policies and the methods of computation adopted in the preparation of this condensed interim financial information are the same as those applied in the preparation of audited annual financial statements of the Company for the year ended December 31, 2018.

5 ACCOUNTING ESTIMATES AND JUDGEMENTS

- 5.1** The preparation of this condensed interim financial information in conformity with the approved accounting standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectation of future events that are believed to be reasonable under the circumstances. However, actual results may differ from these estimates.

- 5.2 During the preparation of this condensed interim financial information, the significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that were applied to the audited annual financial statements for the year ended December 31, 2018.

Financial instruments

Financial assets and financial liabilities are recognized in the statement of financial position when the Company becomes a party to the contractual provisions of the instrument. All the financial assets are derecognized at the time when the Company loses control of the contractual rights that comprise the financial assets. All financial liabilities are derecognized at the time when they are extinguished that is, when the obligation specified in the contract is discharged, cancelled, or expires. Any gains or losses on de-recognition of the financial assets and financial liabilities are taken to the statement of profit or loss.

a) Financial assets

Classification

Effective July 1, 2018, the Company classifies its financial assets in the following measurement categories:

- i) Amortized cost where the effective interest rate method will apply;
- ii) fair value through profit or loss;
- iii) fair value through other comprehensive income.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in statement of profit or loss or other comprehensive income (OCI). For investment in equity instruments that are not held for trading, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI). The Company reclassifies debt investments when and only when its business model for managing those assets changes.

Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Company commits to purchase or sell the asset. Further financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in statement of profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

a) Amortised cost

Assets that are held for collection of contractual cash flows where the contractual terms of the financial assets give rise on specified dates to cash flows that represent solely payments of principal and interest, are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other income together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the profit or loss.

b) Fair value through other comprehensive income (FVTOCI)

Assets that are held for collection of contractual cash flows and for selling the financial assets, where the contractual terms of the financial asset give rise on specified dates to cash flows that represent solely payments of principal and interest, are measured at FVTOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to statement of profit or loss and recognised in other income. Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other income and impairment expenses are presented as separate line item in the statement of profit or loss.

c) Fair value through profit and loss (FVTPL)

Assets that do not meet the criteria for amortised cost or FVTOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL is recognised in the statement of profit or loss and presented in finance income/cost in the period in which it arises.

Equity instruments

The Company subsequently measures all equity investments at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the Company's right to receive payments is established.

Impairment of financial assets

Effective July 1, 2018, the Company assess on a historical as well as forward-looking basis, the expected credit loss (ECL) as associated with its debt instruments, trade debts, short term investment and deposits and other receivables carried at amortised cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

Following are financial instruments that are subject to the ECL model:

- Trade debts
- Deposits and other receivables
- Short term investments
- cash and bank Balances

(i) General approach for short term investment, deposits and other receivables and cash and bank balances.

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information (adjusted for factors that are specific to the counterparty, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate). As for the exposure at default for financial assets, this is represented by the assets' gross carrying amount at the reporting date. Loss allowances are forward looking, based on 12 month expected credit losses where there has not been a significant increase in credit risk rating, otherwise allowances are based on lifetime expected losses.

Expected credit losses are a probability weighted estimate of credit losses. The probability is determined by the risk of default which is applied to the cash flow estimates. In the absence of a change in credit rating, allowances are recognised when there is reduction in the net present value of expected cash flows. On a significant increase in credit risk, allowances are recognised without a change in the expected cash flows, although typically expected cash flows do also change; and expected credit losses are rebased from 12 month to lifetime expectations.

Significant increase in credit risk

The Company considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk, the Company compares the risk of a default occurring on the instrument as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportable forward-looking information.

The following indicators are considered while assessing credit risk

- actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the debtor's ability to meet its obligations;
- actual or expected significant changes in the operating results of the debtor;
- significant increase in credit risk on other financial instruments of the same debtor; and
- significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees, if applicable.

Definition of default

The Company considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that receivables that meet either of the following criteria are generally not recoverable.

- when there is a breach of financial covenants by the counterparty; or
- information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Company, in full (without taking into account any collaterals held by the Company).

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- significant financial difficulty of the issuer or the borrower;
- a breach of contract, such as a default or past due event;

the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider;

(ii) Simplified approach for trade debts

The Company recognises life time ECL on trade debts, using the simplified approach. The measurement of ECL reflects:

- an unbiased and probability-weighted Amount that is determined by evaluating A range of possible outcomes;
- reasonable and supportable information that is available at the reporting Date about Past events, current conditions and forecasts of future economic conditions.

Trade debts with individually significant balance are separately assessed for ECL measurement. All other trade debts are grouped and assessed collectively based on shared credit risk characteristics and the days past due. To measure ECL, trade debts have been grouped by amounts due from individual customers, corporate customers and other miscellaneous customer groups based on similar credit risk characteristics and ages. The expected credit losses on these financial assets are estimated using a provision matrix approach based on the Company's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

Where lifetime ECL is measured on a collective basis to cater for cases where evidence of significant increases in credit risk at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

- Nature of financial instruments;
- Past-due status;
- Nature, size and industry of debtors; and
- external credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics. current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

Write-off

The Company writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor's sources of income or assets to generate sufficient future cash flows to repay the amount. The Company may write-off financial assets that are still subject to enforcement activity.

b) Financial Liabilities

Classification, initial recognition and subsequent measurement

Financial liabilities are classified in the following categories:

a) Fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held-for trading and financial liabilities designated upon initial recognition as being at fair value through profit or loss.

The Company has not designated any financial liability upon recognition as being at fair value through profit or loss.

- fair value through profit or loss; and
- other financial liabilities.

The Company determines the classification of its financial liabilities at initial recognition. All financial liabilities are recognized initially at fair value and, in case of other financial liabilities also include directly attributable transaction costs. The subsequent measurement of financial liabilities depends on their classification, as follows:

b) Other financial liabilities

After initial recognition, other financial liabilities which are interest bearing subsequently measured at amortized cost, using the effective interest rate method. Gain and losses are recognized in profit or loss for the year, when the liabilities are derecognized as well as through effective interest rate amortisation process.

Derecognition of financial liabilities

The Company derecognises financial liabilities when and only when the Company's obligations are discharged, cancelled or expire.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when there is a legally enforceable right to offset the recognised amount and there is an intention to settle on a net basis, or realise the asset and

6 SUMMARY OF SIGNIFICANT EVENTS AND TRANSACTIONS

- The Company made an irrevocable election for its equity investment in Pakistan refinery limited, therefore any change in its fair value will be route through other comprehensive income (OCI) . During the period the unrealise loss amounting to Rs. 257 million is recorded in OCI.
- The Company sustained abnormal losses during the period due to fluctuation in foreign currency and decrease in petroleum product prices internationally refer note 19.
- Significant related party transactions are disclosed in note 20.
- During the period the company has transfer to PPE from CWIP amounting to Rs. 412 million.
- Due to devaluation of Pak Rupee during the period ended June 30, 2019 the Company suffered exchange loss amounting to Rs. 2,292 million for liabilities denominated in US Dollar.
- During the period the entity has recorded life time Expected credit loss on trade receivables of amounting to Rs. 839 million.

7 FINANCIAL RISK MANAGEMENT

The financial risk management objectives and policies are consistent with those disclosed in the annual audited financial statements of the Company as at and for the year ended December 31, 2018.

HASCOL PETROLEUM LIMITED
NOTES TO THE CONDENSED INTERIM FINANCIAL INFORMATION
FOR THE SIX MONTHS PERIOD ENDED JUNE 30, 2019

18 CONTINGENCIES AND COMMITMENTS

18.1 Contingencies

As per the deliberations of the main committee of the Oil Companies Advisory Committee (OCAC) held in their meeting number MCM-168 dated September 20, 2007, the financial costs on outstanding Price Differential Claims (PDCs) should be worked and billed to the Government of Pakistan (GOP) through OCAC by the Oil Marketing Companies (OMCs) on a regular basis. Although the Company had billed Rs 65.97 million (December 31, 2018: Rs 65.97 million) to the GOP/ OCAC, the management had not accounted for its impact in these financial statements as the inflow of economic benefits, though probable, is not virtually certain.

18.2 Commitments

- (i) The facility for opening letters of credit (LCs) acceptances as at June 30, 2019 amounted to Rs 68,750 million (December 31, 2018: Rs 68,250 million) of which the amount remaining unutilized as at that date was Rs 3,749 million (December 31, 2018: Rs 6,433 million).

19 DISTRIBUTION AND MARKETING

This includes provisions for ECL amounting to Rs 838 million (2018 Rs: nil). This provision was made under the requirements of IFRS 9 as disclosed in note 3.2.2.

20 OTHER EXPENSE

This represents incurred loss amounting to Rupees 6,324 million caused by an unfavorable fluctuation in the international oil prices, market volatility in the backdrop of uncertain global and / or local economic conditions coupled with massive devaluation of Pakistani Rupee caused an increase in product cost. Regulated eventual selling prices verses the product cost resulted in the reported loss.

Deferred	21.1 <u>(4,062,703)</u>	<u>(170,812)</u>
	<u>(3,506,527)</u>	<u>587,951</u>

- 21.1** The Company has recorded deferred tax assets of Rs 3,382 million which represents management's best estimate of the probable benefits expected to be realised in future years in the form of reduced tax liability as the company would be able to set off the profits earned in those years against taxable temporary difference relating to prior years. The Company has prepared five years financial projects for future taxable profits, which have been approved by the Board of Directors of the Company, to assess the recoverability of deferred tax assets. The projections involved certain key management assumptions underline the estimation of future taxable profits. the determination of future taxable profits is most sensitive to certain key assumption such as growth of low cost deposits, growth in high yield consumer advances, investment returns, retail outlet expansion plans, potential provision against assets, interest rate, cost of funds and expected recoveries of classified loans.

Any significant change in such assumptions may have an effect on the recoverability of the deferred tax asset. Managment believe that it is probable that is the Company will be able to achieve profits and consequently, the deferred

The Company measures fair value using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

Level 1: Quoted market price (unadjusted) in an active market.

Level 2: Valuation techniques based on observable inputs.

HASCOL PETROLEUM LIMITED
NOTES TO THE CONDENSED INTERIM FINANCIAL INFORMATION
FOR THE SIX MONTHS PERIOD ENDED JUNE 30, 2019

Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data.

Fair values of financial assets that are traded in active markets are based on quoted market prices. For all other financial instruments the Company determines fair values using valuation techniques unless the instruments do not have a market / quoted price in an active market and whose fair value cannot be reliably measured.

Valuation techniques used by the Company include discounted cash flow model. Assumptions and inputs used in valuation techniques includes risk-free rates, bonds and equity prices, foreign currency exchange rates, equity and equity index prices. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the balance sheet date that would have been determined by market participants acting at arm's length.

Valuation models for valuing securities for which there is no active market requires significant unobservable inputs and a higher degree of management judgment and estimation in the determination of fair value. Management judgment and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued and selection of appropriate discount rates.
