Nature of **Business**

Introduction

The company is a pioneer in Pakistan's wires and cables industry. It is principally engaged in the manufacture of wires, cables and conductors for transmission and distribution of electricity since 1953. In 1984, the company started extrusion of anodized aluminium profile sections for architectural applications. In 1996, the company set up a state-of-the-art plant to manufacture copper rod. Due to the increased requirement of rods for manufacturing wire and cables because of growing customer demand, the production capacity of the plant has been regularly enhanced over recent years. In 2008, the company set up a PVC compounding plant to manufacture high quality electric cable grade pvc compound. The company also set up a 2-MW gas fired tri-generation power plant, allowing it to be mostly self-sufficient for its electricity needs.

Industry

Pakistan Cables is the only listed company in the cable industry, which comprises of a few large players, a handful of small localized producers, as well as imports. The prices of cables, copper rod, conductors and aluminium extrusions are closely

linked to the global markets for copper and aluminium. Both base metals are traded on the London metal exchange (LME), the world's premier non-ferrous metals market. The price of both these metals is therefore determined at the LME and any fluctuations in copper or aluminium prices have a direct effect on the pricing of our products. The Company has established itself as a key player in the manufacturing sector with more than 68 years of experience in the wire and cables business. Its business is driven by growth prospects and activity in the end markets where its products are used, which are primarily in projects of all kinds, including infrastructure, facilities, factories, commercial and residential construction. There is also a growing demand for cables in the renewable energy space, particularly for solar. Cable and conductors are also used in the transmission and distribution of electricity by the country's utility companies. An extensive array of world-class quality wires and cables is manufactured by the company to meet the diverse, dynamic and time-sensitive needs of its customers.

Business Model

- I) to continue to generate market awareness of the brand – Pakistan Cables and educate the consumer about the benefits of cables and wires that are of the highest quality thereby remaining the customers' first preference;
- II) to identify profitable markets and optimal product mix and tailor our product offerings accordingly;
- III) to ensure that products are made easily available to the customer through our network of dealers, distributors, stockists and warehouses, and by providing optimal direct sales coverage (where relevant); and
- IV) to penetrate targeted markets through cost benefit analysis and customized service offering.
- V) to explore opportunities for enhancing exports and growing the contribution of exports in the company's overall revenue mix.

- VI) to continuously identify evolving needs of customers and bring new products to market accordingly.

Legal Environment

The Company operates under the Companies Act 2017, which replaced the Companies Ordinance 1984, and the listed companies (Code of Corporate Governance) regulations 2019. Insofar it is registered and licensed by the Securities and Exchange Commission of Pakistan. The Company is also listed on the Pakistan Stock Exchange and is regulated by the PSX rule book and all circulars/notifications issued thereunder. The company's trade network covers over 200 town and cities across Pakistan, including warehouses and power cable stockists in major cities of the country. Over the year, the company successfully won large orders for underground infrastructure cabling for housing societies, as well as for customers in the Textile, Oil & Gas, Energy and Cement sectors. Moreover, the Company was successful in winning selective orders from utility companies and won export orders from various customers.

Urban Forest

Pakistan Cables recognizes the need for environmental conservation. With a keen awareness of the importance of those resources, Pakistan Cables supports the call for climate change and promotes Urban forestry with its green initiative, the Pakistan Cables Urban Forest, a national first on an industrial estate.

The tree plantation commenced in 2020, spearheaded by Mr. Kamal A. Chinoy, who envisioned it be one of the earliest activities undertaken at the Company's upcoming factory located at Nooriabad, Sindh.

Today, the Urban Forest is home to over 40,000 trees, spread across 2.5 acres and 59 species of trees native to the geographical area (Nooriabad) such as Almond, Amla, Fig, Mango, Neem, Sukh Chan, Pomegranate, Peepal, Peelu, Keekar, Olive.

To the best of our knowledge, the Pakistan Cables Urban Forest is the first and largest Miyawaki based urban forest located on an industrial estate in Pakistan. The Miyawaki approach was developed by Mr. Akira Miyawaki from Japan. It has been implemented by Mr. Shahzad Qureshi in Pakistan.

At the outset of the financial year 2020-2021, the Company was faced with a highly challenging economic scenario, which was further compounded by the impacts of the COVID-19 pandemic. The scenario evolved for the better and the demand for wire and cable began to grow in line with the improving economic situation. During the year, the Board of Directors and its Sub-Committees worked with a marked level of diligence and proficiency to best advice and guide the Company.

Management put in considerable efforts to overcome the challenges and make a recovery and this is reflected by the record turnover and profitability.

Performance of Business

The financial year 2021 has been a challenging year for Pakistan's economy. The COVID-19 pandemic has been a source of stress and adversity, the world over. Pakistan economy showed its resilience and braced the negative impacts of the global pandemic far better than expected. Market demand started to rebound as a result of the ongoing construction activity due to various policy initiatives undertaken by the government including the Construction Package and activity centered around investment in new plant and equipment through SBPs Temporary Economic Refinance Facility. Furthermore, the State Bank of Pakistan (SBP) kept the Policy Rate unchanged at 7% p.a. throughout the year to provide impetus to the economy.

Commercial activity and industrial demand for your Company's products continued to remain upbeat during the year on the back of the Construction Package announced by the government. The Company's top line has shown a remarkable growth of 45% with sales of Rs. 13.1 billion. This is the highest ever sale in the history of the Company. The growth in sales compared to last year is mainly due to higher sales volumes and is also a function of rationalization of prices of our products attributed to the sharp rise in copper prices during the year, which had a spiraling effect on our revenues. Strong sales performance was witnessed in all the segments of wire and cable business.

	2020-21	2019-20
Sales - Rs. in Million	13,145	9,086
Gross Profit - Rs. in Million	1,526	860

Gross profit for the year amounted to Rs. 1,526.4 million (11.6 % of sales), compared to last year's gross profit of Rs. 860.3 million (9.5% of sales). The higher gross profit is attributed mainly due to volume growth and productivity improvement.

Marketing, selling and distribution cost for the year amounted to Rs. 519.8 million as compared to Rs. 435.1 million in the last year. The increase is mainly on account of higher carriage and forwarding expenses. Finance cost for the year are Rs. 192.5 million compared to Rs. 283.3 million in the last year. The decrease is due to lower interest rates during the year as compared to last year.

As a result of the above factors, the Company earned a record profit after tax of Rs. 553.6 million. This resulted in earnings per share of Rs. 15.56 in the current year.

Business Review

With various initiatives taken by the Government to support the construction industry, along with policies that support renewable energy and industrial investment (Temporary Economic Refinance Facility), the demand for wire and cable has started to grow. This is reflected in the improving performance of the Company for the outgoing year. However, the domestic wire and cable industry has sufficient capacity to cater to further growth.

In parallel, the international price of copper as quoted on the London Metal Exchange (LME) had an upward trajectory throughout the year, trading just over \$6,000 / Metric Ton in July 2020 and reaching a record high all-time of over \$10,700 / Metric Ton in May 2021. Increasing copper prices resulted in increasing prices for wire and cable and also had an impact in terms of a higher working capital financing requirement.

Global Copper and Aluminum Scenario

The prices of cables, copper rod and aluminium extrusions are closely linked to the global markets for Copper and Aluminium. Both base metals are traded on the London Metal Exchange (LME), the world's premier non-ferrous metals market. The Average daily volumes (ADV) of contracts traded on LME in 2020 was down by 12.1% from 2019. The price of both these metals are determined at the LME and any fluctuations in Copper or Aluminium prices have a direct effect on the pricing of our products.

Copper Prices on London Metal Exchange rallied to a record high of \$ 10,724/t in May 2021 surpassing its previous peak set in 2011 as the world economy recovers from COVID-19 slump, surging demand for renewables and a global supply deficit. The prices started to ease off in the month of June and closed at \$ 9,385/ton on 30th June 2021.

**Avg. Monthly L.M.E. of Copper US\$/ ton

Cash Flow and Liquidity

The Company is constantly monitoring cash flow to ensure overall liquidity. During the financial

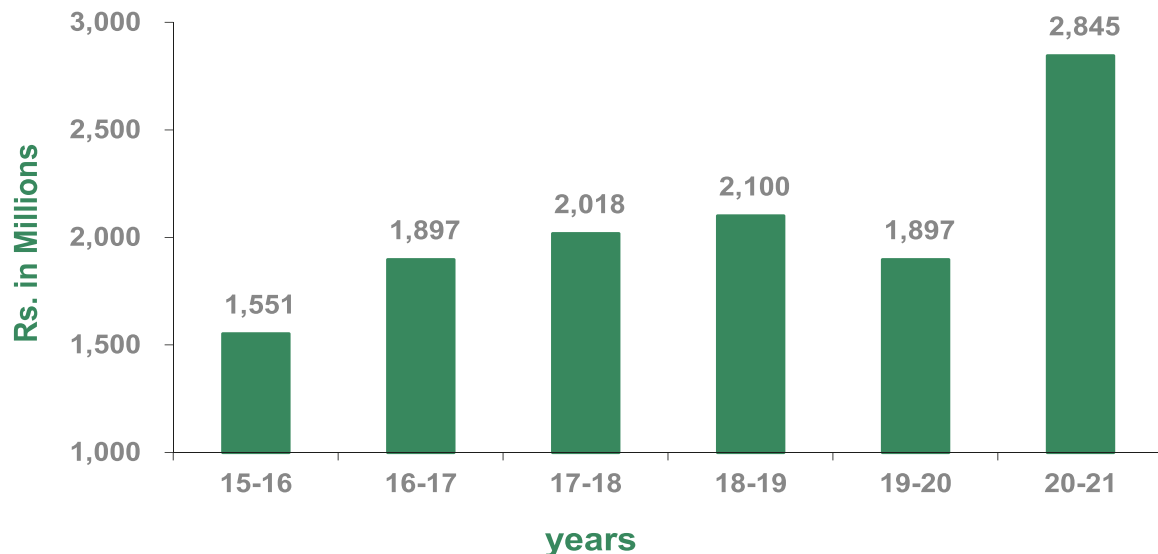

year, the Company's cash flow from operations remained restricted due to higher working capital requirements, as the value of inventory increased

substantially due to rising raw material prices, particularly, of copper in the international market and Trade Debts were elevated due to exceptionally high sales in the last month of the financial year.

The Company continued to monitor interest and foreign exchange rates to take advantage of any potential saving or hedging opportunities.

Contribution to National Economy

Forward Looking Statement

As can be seen from the results of your Company for the outgoing year, the demand for wire and cable has grown post the rebound from the initial COVID shock. The Government of Pakistan has taken several steps to support the growth of the construction industry and the impact of these steps is expected to remain positive going forward. The Company anticipates demand for its products to remain reasonably strong due to ongoing activity in the construction sector, continued interest in renewable energy - in particular solar and the electrification demand for new equipment being purchased by industrial concerns under the Temporary Economic Refinance Facility (TERF). Moreover, as utilities work towards enhancing their grid capabilities, the cable industry should benefit. There is, however, a concern that with a surging fourth wave of COVID, lockdowns and other measures undertaken by the Government could result in a suppression of demand.

The volatility in metals pricing coupled with fluctuations in the value of the rupee against international currencies also creates uncertainty. To a large extent, the Company has been able to pass on the rising prices of copper and the weakening rupee to customers. However, major fluctuations may have an impact on margins going forward.

Mustapha A. Chinoy
Chairman

In context of these expectations, the Company will continue its focus towards developing efficiencies and emphasizing aggressive sales efforts to be able to benefit from the potential growth in demand, while remaining watchful for any sudden changes linked to the uncertainties described above.

Acknowledgement

The Directors would like to place on record their sincere appreciation for the hard work and dedication shown by the management and the employees of the Company throughout the year. On behalf of the Board of Directors and employees of the Company, we express our gratitude and appreciation to all our valued customers, distributors, stockists, dealers and bankers for the trust and confidence reposed in the Company and look forward to their continued support and participation in sustaining the growth of the Company in the coming years.

آئندہ کالائبر عمل

کردہ وائرس کے ابتدائی چھکوں سے پیدا صورت حال کے برعکس آپ کی کمپنی کے گزشتہ برس کے نتائج کی روشنی میں وائرس اور کیبل کی طلب میں اضافہ ہوا ہے۔ حکومت پاکستان نے تعمیراتی صنعت کو سہارا دینے کے لئے کئی اقدامات اٹھائے ہیں اور مستقبل

منجانب بورڈ آف ڈائریکٹرز

مصطفیٰ اے چٹائے

چیرمین

کراچی: 12 اگست، 2021ء

میں ان اقدامات کے مثبت اثرات مرتب ہوں گے۔ تعمیراتی شعبہ میں جاری سرگرمیوں، خصوصاً سول انرجی میں قابل تجدید توانائی میں مسلسل دلچسپی اور عارضی اکٹماک ری فائینس پالیسی (TERF) کے تحت صنعتوں کی جانب سے نئے سامان کے لئے الیکٹریکلین ڈیمانڈ کی خریداری کے باعث کمپنی مصنوعات کی طلب میں بہت زیادہ اضافہ ہوا ہے۔ مزید برآں، گرو کی صلاحیت میں اضافہ کے لئے جاری کام سے کمپنی کو مستفید ہونا چاہئے۔ تاہم خطرات موجود ہیں کہ کردہ وائرس کی چوتھی لہر، لاک ڈاؤن اور دیگر حکومتی اقدامات کی وجہ سے طلب متاثر ہو سکتی ہے۔

دھات کی قیمتوں میں عدم استحکام اور بین الاقوامی کرنسی کے مقابلہ میں روپے کی قدر میں اتار چڑھاؤ سے بے یقینی کی کیفیت پیدا ہوئی ہے۔ کافی حد تک کمپنی کا پرک بڑھتی ہوئی قیمتوں اور کمزور روپے سے پیدا صورت حال کو اپنے صارفین کو منتقل کرنے میں کامیاب ہوئی ہے۔ تاہم، مستقبل میں زیادہ اتار چڑھاؤ کے منافع پراثرات مرتب ہو سکتے ہیں۔

ان توقعات کے تناظر میں کمپنی کارکردگی میں اضافہ اور طلب میں ممکنہ اضافہ سے مستفید ہونے کے لئے فروخت پر جارحانہ حکمت عملی مرتب کرنے پر اپنی توجہ مرکوز رکھے گی۔ جب کہ کمپنی مذکورہ بالا بے یقینی کی صورت حال سے منسلک فوری تبدیلیوں پر بھی تیزی نگرانی رکھے گی۔

کمپنی مستقل بنیادوں پر کیش فلو کی نگرانی کر رہی ہے تاکہ مجموعی سطح پر لیکویڈیٹی کو یقینی بنایا جاسکے۔ مالیاتی سال کے دوران ورکنگ کپٹل کی زیادہ طلب کی وجہ سے آپریشنز سے کمپنی کا کیش فلو محدود رہا۔ کیونکہ خصوصاً عالمی منڈیوں میں کارپریس خام مال کی بڑھتی ہوئی قیمتوں کے باعث انوینٹری میں اضافہ ہوا اور مالیاتی سال کے آخری ماہ میں زیادہ سیلز کی وجہ سے تجارتی قرضے بڑھے۔

عالمی کارپورایٹو منظر نامہ

کیبلو، کارپورایٹ اور ایلیو منیم ایکسٹرنز کی قیمتیں کارپورایٹو منیم کی عالمی منڈیوں سے مضبوطی سے جڑی ہوئی ہیں۔ دونوں اساسی دھاتوں کی تجارت دنیا کی سب سے بڑی غیر فولادی دھاتی مارکیٹ لندن میٹل ایکسچینج (LME) میں ہوتی ہے۔ سال 2020ء میں LME پر معاہدوں کا روزانہ کا اوسط حجم (ADV) سال 2019ء کے مقابلہ میں 12.1 فی صد کم ہوا۔ ان دونوں دھاتوں کی قیمتوں کا تعین LME پر کیا جاتا ہے۔ ہماری مصنوعات کی قیمتوں پر کارپورایٹو منیم کی قیمتوں میں اتار چڑھاؤ کا براہ راست اثر ہوتا ہے۔

مئی 2021ء میں LME پر کارپورکی قیمت سال 2011ء میں بلند ترین قیمت کے مقابلہ میں 10,724 ڈالر فی ٹن کی ریکارڈ سطح پر پہنچی گئی۔ چونکہ کرونا وائرس کی وجہ سے اہتر عالمی معیشت کی بحالی ہو رہی ہے لہذا طلب میں اضافہ اور عالمی سپلائی کے فقدان کی وجہ سے یہ اضافہ دیکھنا پڑا۔ جون کے مہینے میں قیمتوں میں بہتری آئی اور 30 جون 2021ء کو کارپورکی قیمت 9,385 ڈالر فی ٹن پر بند ہوئی۔

کاروباری جائزہ

تعمیراتی صنعت کو فروغ دینے کے لئے حکومت کی جانب سے کئے گئے متعدد اقدامات اور تجدیدی توانائی اور صنعتی سرمایہ داری کو سہارا دینے کے لئے پالیسیوں (عارضی معاشی ریمی فیکس سہولت) کے اعلان کے باعث کیبل اور وائر کی طلب میں اضافہ جاری ہے۔ گڈنٹ برس کے لئے کمپنی کی بہتر کارکردگی اس کی عکاسی کرتی ہے۔ تاہم، ملکی وائر اینڈ کیبل انڈسٹری مزید اضافہ کو برداشت کرنے کے لئے مناسب صلاحیت رکھتی ہے۔

اس کے برعکس، سال بھر میں لندن میٹل ایکسچینج (LME) کے مطابق کارپورکی بین الاقوامی قیمتوں میں اضافہ کا رجحان رہا اور جولائی 2020ء میں 6,000 ڈالر فی میٹرک ٹن تجارت ہوئی جب کہ مئی 2021ء میں یہ قیمتیں ریکارڈ 10,700 ڈالر فی میٹرک ٹن کی سطح تک پہنچ گئیں۔ کارپورکی قیمتوں میں اضافہ کے باعث وائر اور کیبل کی قیمتوں میں بھی اضافے کا رجحان رہا۔ جس کی وجہ سے ورلڈ کیپٹل فیکس کی ضرورت میں بھی اضافہ ہوا۔

کاروباری کارکردگی

مالیاتی سال 2021 پاکستانی معیشت کے لئے انتہائی نازک سال رہا۔ کرونا وائرس کی وبا دنیا بھر کے کاروباری حلقوں میں تناؤ اور بے چینی کی بنیادی وجہ رہی۔ پاکستانی معیشت نے عالمگیر وبا کے منفی اثرات پر توقع سے زیادہ بہتر مزاحمت دکھائی۔ حکومت کی جانب سے تعمیراتی پیکج جیسی متعدد پالیسیوں کے اعلان کی وجہ سے تعمیراتی سرگرمیاں جاری رہیں اور مارکیٹ کی مانگ میں اضافہ ہونا شروع ہوا۔ نئے پلانٹ میں سرگرمیوں کو جاری رکھنے کے لئے اور آلات میں سرمایہ کاری کیلئے SBP کی جانب سے عارضی اقتصادی ری فائنس سہولت نے بھی اہم کردار ادا کیا۔ مزید برآں، بینک دولت پاکستان (SBP) نے معیشت کو سہارا دینے کے لئے پالیسی شرح 7 فی صد سالانہ پر برقرار رکھی۔

تجارتی سرگرمی اور آپ کی کمپنی کی مصنوعات کے لئے صنعتی سطح پر طلب اور حکومت کی جانب سے تعمیراتی پیکج کی وجہ سے سال بھر اضافہ ہوتا رہا۔ کمپنی کی ٹاپ لائن نے 13.1 بلین روپے کی فروخت کے ساتھ 45 فی صد کی نمایاں نمو ظاہر کی۔ کمپنی کی تاریخ میں یہ فروخت کا سب سے زیادہ حجم ہے۔ گزشتہ برس کے مقابلہ میں نیلز میں اضافہ نیلز کے اعلیٰ حجم اور سال کے دوران کارپری قیمتوں میں تیزی سے اضافہ کی وجہ سے ہماری مصنوعات کی قیمتوں میں ردوبدل کے باعث ہوا۔ ہماری آمدنی پر دور رس اثرات اسی وجہ سے ظاہر ہوئے۔ وائر اور کیبل کے کاروبار کے تمام شعبوں میں نیلز میں اچھی کارکردگی سامنے آئی۔

Saving the planet means **saving lives**

In 2012, an estimated 12.6 million deaths were attributable to deteriorating environment conditions. The United Nations Environment Program (UNEP) estimated, an extra 250,000 deaths may occur per year between 2030 and 2050 as a result of climate change, leading to malnutrition, malaria, diarrhoea and heat stress. Hence estimated number of deaths by pollution and global warming may be causing millions more deaths than conflicts.

Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* as adopted by the Institute of Chartered Accountants of Pakistan (the Code) and we have fulfilled our other ethical responsibilities in accordance with the Code. Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Following are the Key audit matters:

S. No.	Key audit matters	How the matter was addressed in our audit
1.	Revenue Recognition	
	<p>Refer notes 3.9 and 25 to the financial statements.</p> <p>The Company generates revenue from sale of goods to domestic as well as export customers.</p> <p>We identified recognition of revenue (against the sale of goods) as a key audit matter because revenue is one of the key performance indicators of the Company which gives rise to an inherent risk of the existence and the accuracy of the revenue.</p>	<p>Our audit procedures to assess the recognition of revenue recognized from the sale of products included the following:</p> <ul style="list-style-type: none">• Obtaining an understanding of and assessing the design and testing of the implementation and operating effectiveness of controls to ensure that revenue is recognized in the appropriate accounting period;• assessing the appropriateness of the Company's accounting policies for revenue recognition and compliance of those policies with applicable accounting standards;

S. No.	Key audit matters	How the matter was addressed in our audit
		<ul style="list-style-type: none"> comparing, on a sample basis, specific revenue transactions recorded before and after the reporting date with underlying documentation to assess whether revenue has been recognized in the appropriate accounting period; and inspecting credit notes issued to record sales returns subsequent to year end, if any.
2.	Valuation of Trade Debts	
	<p>Refer notes 3.14, 3.18 and 11 to the financial statements.</p> <p>The Company has a significant balance of trade debts.</p> <p>Provision against doubtful trade debts is based on loss allowance for Expected Credit Loss (ECLs).</p> <p>We identified recoverability of trade debts as a key audit matter as it involves significant judgement in determining the recoverable amount of trade debts.</p>	<p>Our audit procedures to assess the valuation of trade debts, amongst others, included the following:</p> <ul style="list-style-type: none"> obtaining an understanding of and assessing the design and testing implementation of management's key internal controls relating to credit control process (including credit account application approvals and credit limit review); obtaining an understanding of the basis for the determination of provision required at the year end and the receivables collection process; assessing the method used by the company for recognition of the allowance for ECL in accordance with the applicable standard and assessing the reasonableness of assumptions used; and testing accuracy of the data on a sample basis extracted from the Company's accounting system which has been used to calculate the provision required including subsequent recoveries.
3.	Valuation of Stock-in-Trade	
	<p>Refer notes 3.6 and 10 to the financial statements.</p> <p>As at 30 June 2021, the Company's stock-in-trade amounted to Rs. 2,503.86 million. This significantly comprised of Copper Cathode, Copper rods and Aluminum billets.</p> <p>We identified the valuation of stock-in-trade as a key audit matter because determining an appropriate write-down as a result of net realizable value (NRV) being lower than their cost involves significant judgement and estimation.</p>	<p>Our audit procedures to assess the valuation of stock-in-trade included the following:</p> <ul style="list-style-type: none"> obtaining an understanding of internal controls over purchases and valuation of stock-in-trade and testing, on a sample basis, their design, implementation and operating effectiveness; obtaining an understanding of the basis for the determination of NRV and the key estimates adopted, including future selling prices and costs necessary to make the sales and the basis of the calculation and justification for the amount of the write-downs and provisions; assessing the NRV of stock-in-trade by comparing, on a sample basis, estimation of future selling prices for the products with the selling prices achieved subsequent to the end of the reporting period; and comparing NRV to the cost of a sample of stock-in-trade and comparison to the associated provision to assess whether stock-in-trade provisions are complete.

S. No.	Key audit matters	How the matter was addressed in our audit
4.	Capitalization of Property, Plant and Equipment	
	<p>Refer notes 3.15 and 4 to the financial statements.</p> <p>The Company has made significant capital expenditure on expansion of manufacturing facilities.</p> <p>We identified capitalization of property, plant and equipment as a key audit matter because there is a risk that amounts being capitalized may not meet the capitalization criteria with related implications on capitalization of borrowing costs and depreciation charge for the year.</p>	<p>Our audit procedures to assess the capitalization of property, plant and equipment, amongst others, included the following:</p> <ul style="list-style-type: none"> • understanding the design and implementation of controls over capitalization and performing tests of control over authorization of capital expenditure and accuracy of its recording in the system; • testing, on sample basis, the costs incurred on projects with supporting documentation and contracts; • assessing the nature of costs incurred including borrowing costs for the capital projects through testing, on sample basis, of amounts recorded and considering whether the expenditure meets the criteria for capitalization as per the accounting policy and applicable accounting standards; and • inspecting supporting documents for the date of capitalization when project was ready for its intended use to assess whether depreciation commenced and further capitalization of costs including borrowing cost ceased from that date and assessing the useful life assigned to the respective asset including testing the calculation of related depreciation.

Information Other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the information included in the Company's Annual Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, then we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Companies Act, 2017(XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the board of directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the board of directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Based on our audit, we further report that in our opinion:

- a) proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);
- b) the statement of financial position, the statement of profit or loss account, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes thereon have been drawn up in conformity with the Companies Act, 2017 (XIX of 2017) and are in agreement with the books of account and returns;
- c) investments made, expenditure incurred and guarantees extended during the year were for the purpose of the Company's business; and
- d) no Zakat was deductible at source under the Zakat and Ushr Ordinance, 1980 (XVIII of 1980).

The engagement partner on the audit resulting in this independent auditor's report is **Moneeza Usman Butt**.

2 BASIS OF PREPARATION

2.1 Statement of compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards as applicable in Pakistan comprise of:

- International Financial Reporting Standards (IFRS) issued by the International Accounting Standard Board (IASB) as notified under the Companies Act, 2017; and
- Provisions of and directives issued under the Companies Act, 2017.

Where the provisions of and directives issued under the Companies Act, 2017 differ with the requirements of IFRS, the provisions of and directives issued under the Companies Act, 2017 have been followed.

2.2 Basis of measurement

These financial statements have been prepared under the historical cost convention except for the Company's liability under defined benefit plan that is determined based on the present value of defined benefit obligation less fair value of plan assets and categories of fixed assets including leasehold land and buildings thereon that are stated at fair values determined by an independent valuer.

2.3 Functional and presentation currency

These financial statements are presented in Pakistani rupee which is the Company's functional currency. All financial information presented in Pakistani rupee has been rounded off to the nearest thousand, unless otherwise stated.

2.4 Use of estimates and judgements

In preparing these financial statements, management has made judgment, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to estimates are recognized prospectively. Information about judgments made in applying accounting policies that have the most significant effects on the amount recognized in the financial statements and to the carrying amount of the assets and liabilities and assumptions and estimation uncertainties that have a significant risk resulting in a material adjustment in the subsequent year are set forth below:

- Staff retirement benefits and other benefits (refer note 3.2)
- Trade debts, loans, advances, deposits, prepayments and other receivables (refer note 3.14)
- Property, plant and equipment and intangible assets (refer notes 3.15 and 3.16)
- Stock-in-trade and stores and spares (refer notes 3.6 and 3.5)
- Investment in associate - equity method (refer note 3.1)
- Taxation (refer note 3.3)
- Provisions (refer note 3.10)
- Impairment (refer notes 3.18 and 3.21)
- Leases (refer note 3.25)

2.5 Change in accounting standards, interpretations and amendments to published approved accounting standards

a) Standards, interpretations and amendments to published approved accounting standards that are effective

COVID-19-Related Rent Concessions (Amendment to IFRS 16) – the International Accounting Standards IASB (the IASB) has issued amendments to IFRS 16 (the amendments) to provide practical relief for lessees in accounting for rent concessions. The amendments are effective for periods beginning on or after 1 June 2020, with earlier application permitted. Under the standard's previous requirements, lessees assess whether rent concessions are lease modifications and, if so, apply the specific guidance on accounting for lease modifications. This generally involves remeasuring the lease liability using the revised lease payments and a revised discount rate. In light of the effects of the COVID-19 pandemic, and the fact that many lessees are applying the standard for the first time in their financial statements, the IASB has provided an optional practical expedient for lessees. Under the practical expedient, lessees are not required to assess whether eligible rent concessions are lease modifications, and instead are permitted to account for them as if they were not lease modifications.

The practical expedient introduced in the 2020 amendments only applied to rent concessions for which any reduction in lease payments affected payments originally due on or before 30 June 2021. In light of persistence of economic challenges posed by the COVID-19 pandemic, the IASB has extended the practical expedient for COVID-19 related rent concessions by one year i.e. permitting lessees to apply it to rent concessions for which any reduction in lease payments affects only payments originally due on or before 30 June 2022.

Rent concessions are eligible for the practical expedient if they occur as a direct consequence of the COVID-19 pandemic and if all the following criteria are met:

- the change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change;
- any reduction in lease payments affects only payments originally due on or before 30 June 2022; and
- there is no substantive change to the other terms and conditions of the lease.

b) Standards, interpretations and amendments to published approved accounting standards that are effective but not relevant

There are certain new standards, amendments to the approved accounting standards and new interpretations that are mandatory for accounting periods beginning on or after 1 July 2020. However, these do not have any significant impact on the Company's financial reporting and therefore have not been detailed in these financial statements.

The following International Financial Reporting Standards (IFRS Standards) as notified under the Companies Act, 2017 and the amendments and interpretations thereto will be effective for accounting periods beginning on or after 01 July 2021:

- Interest Rate Benchmark Reform – Phase 2 which amended IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 is applicable for annual financial periods beginning on or after 1 January 2021, with earlier application permitted. The amendments introduce a practical expedient to account for modifications of financial assets or financial liabilities if a change results directly from IBOR reform and occurs on an 'economically equivalent' basis. In these cases, changes will be accounted for by updating the effective interest rate. A similar practical expedient will apply under IFRS 16 for lessees when accounting for lease modifications required by IBOR reform. The amendments also allow a series of exemptions from the regular, strict rules around hedge accounting for hedging relationships directly affected by the interest rate benchmark reforms. The amendments apply retrospectively with earlier application permitted. Hedging relationships previously discontinued solely because of changes resulting from the reform will be reinstated if certain conditions are met.
- Onerous Contracts – Cost of Fulfilling a Contract (Amendments to IAS 37) effective for the annual periods beginning on or after 1 January 2022 amends IAS 1 by mainly adding paragraphs which clarifies what comprises the cost of fulfilling a contract, Cost of fulfilling a contract is relevant when determining whether a contract is onerous. An entity is required to apply the amendments to contracts for which it has not yet fulfilled all its obligations at the beginning of the annual reporting period in which it first applies the amendments (the date of initial application). Restatement of comparative information is not required, instead the amendments require an entity to recognize the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings or other component of equity, as appropriate, at the date of initial application.

The following annual improvements to IFRS Standards 2018-2020 are effective for annual reporting periods beginning on or after 1 January 2022.

- IFRS 9 – The amendment clarifies that an entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf, when it applies the '10 per cent' test in paragraph B3.3.6 of IFRS 9 in assessing whether to derecognize a financial liability.
- IFRS 16 – The amendment partially amends Illustrative Example 13 accompanying IFRS 16 by excluding the illustration of reimbursement of leasehold improvements by the lessor. The objective of the amendment is to resolve any potential confusion that might arise in lease incentives.
- Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16) effective for annual periods beginning on or after 1 January 2022 clarifies that sales proceeds and costs of items produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management e.g. when testing etc., are recognized in profit or loss in accordance with applicable Standards. The entity measures the cost of those items applying the measurement requirements of IAS 2. The standard also removes the requirement of deducting the net sales proceeds from cost of testing. An entity shall apply those amendments retrospectively, but only to items of property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after the beginning of the earliest period presented in the financial statements in which the entity first applies the amendments. The entity shall recognize the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at the beginning of that earliest period presented.
- Reference to the Conceptual Framework (Amendments to IFRS 3) - Reference to the Conceptual Framework, issued in May 2020, amended paragraphs 11, 14, 21, 22 and 23 of and added paragraphs 21A, 21B, 21C and 23A to IFRS 3. An entity shall apply those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 January 2022. Earlier application is permitted if at the same time or earlier an entity also applies all the amendments made by Amendments to References to the Conceptual Framework in IFRS Standards, issued in March 2018.
- Classification of liabilities as current or non-current (Amendments to IAS 1) amendments apply retrospectively for the annual periods beginning on or after 1 January 2023. These amendments in the standards have been added to further clarify when a liability is classified as current. The standard also amends the aspect of classification of liability as non-current by requiring the assessment of the entity's right at the end of the reporting period to defer the settlement of liability for at least twelve months after the reporting period. An entity shall apply those amendments retrospectively in accordance with IAS 8.
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2) – the IASB has issued amendments on the application of materiality to disclosure of accounting policies and to help companies provide useful accounting policy disclosures. The key amendments to IAS 1 include:
 - requiring companies to disclose their material accounting policies rather than their significant accounting policies;
 - clarifying that accounting policies related to immaterial transactions, other events or conditions are themselves immaterial and as such need not be disclosed; and
 - clarifying that not all accounting policies that relate to material transactions, other events or conditions are themselves material to a company's financial statements.

The IASB also amended IFRS Practice Statement 2 to include guidance and two additional examples on the application of materiality to accounting policy disclosures. The amendments are effective for annual reporting periods beginning on or after 1 January 2023 with earlier application permitted.

- Definition of Accounting Estimates (Amendments to IAS 8) – The amendments introduce a new definition for accounting estimates clarifying that they are monetary amounts in the financial statements that are subject to measurement uncertainty. The amendments also clarify the relationship between accounting policies and accounting estimates by specifying that a company develops an accounting estimate to achieve the objective set out by an accounting policy. The amendments are effective for periods beginning on or after 1 January 2023, and will apply prospectively to changes in accounting estimates and changes in accounting policies occurring on or after the beginning of the first annual reporting period in which the company applies the amendments.
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12) – The amendments narrow the scope of the initial recognition exemption (IRE) so that it does not apply to transactions that give rise to equal and offsetting temporary differences. As a result, companies will need to recognise a deferred tax asset and a deferred tax liability for temporary differences arising on initial recognition of a lease and a decommissioning provision. For leases and decommissioning liabilities, the associated deferred tax asset and liabilities will need to be recognised from the beginning of the earliest comparative period presented, with any cumulative effect recognised as an adjustment to retained earnings or other components of equity at that date. The amendments are effective for annual reporting periods beginning on or after 1 January 2023 with earlier application permitted.
- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28) – The amendment amends accounting treatment on loss of control of business or assets. The amendments also introduce new accounting for less frequent transaction that involves neither cost nor full step-up of certain retained interests in assets that are not businesses. The effective date for these changes has been deferred indefinitely until the completion of a broader review.

The above amendments and improvements does not have a material impact on the financial statements.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all the periods presented in these financial statements.

3.1 Investment in associate - equity method

Investments in associate where the Company has significant influence but not control over the financial and operating policies are accounted for using equity basis of accounting, under which the investment in associate are initially recognised at cost and the carrying amounts are increased or decreased to recognise the Company's share of the profit or loss of the associate after the date of acquisition, less impairment losses, if any. The Company's share of the profit or loss of the associate is recognised in the Company's statement of profit or loss account.

Distributions received from associate reduce the carrying amount of the investment. Adjustments to the carrying amounts are also made for changes in the Company's proportionate interest in the associate arising from changes in the associate's other comprehensive income and surplus on revaluation of fixed assets. The Company's share of those changes are respectively recognised directly in other comprehensive income and surplus on revaluation of fixed asset account of the Company.

Gain / loss on sale of above investments, if any, are recognised in the period of sale. The carrying amount of the investment is tested for impairment, by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount and difference, if any is recognised in the statement of profit or loss account.

The recoverable amount of an investment in an associate company is assessed periodically. Any reversal of previously booked impairment is recognized in profit and loss to the extent that the recoverable amount of the net investment subsequently increases.

3.2 Staff retirement benefits and other benefits

Defined benefit plans

The Company operates a defined benefit funded pension scheme for permanent employees who are in the management cadre. However, the benefit is available to those employees only who had joined before 01 April 2009.

In addition, the Company operates an unfunded gratuity scheme, for all permanent unionized staff.

The Company's obligation under the pension and gratuity schemes are determined through actuarial valuations carried out under the "Projected Unit Credit Method". Actuarial valuations are conducted annually and the latest valuation was conducted at the reporting date (30 June 2021). When the calculation results in a potential asset for the Company, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reduction in future contributions to the plan. Service costs are recognised in statement of profit or loss account in the period in which they occur. Net interest on net defined benefit liability is also recognised in statement of profit or loss account. Net of tax remeasurement comprising actuarial gain / loss, the return on plan assets (excluding interest) and the effect of the asset ceiling (excluding interest) are recognised in statement of comprehensive income.

Defined contribution plan

The Company also operates a recognised provident fund scheme for its employees. Equal monthly contributions are made both by the Company and the employees to the fund at the rate of 10% of basic pay and dearness allowance.

Other long term employee benefit

The Company accounts for long term staff compensated absences on the basis of actuarial valuation carried out under the Projected Unit Credit Method.

3.3 Taxation

Income tax expense comprises current and deferred tax. Income tax expense is recognized in the statement of profit or loss account, except to the extent that it relates to items recognized directly in the other comprehensive income or in equity, in which case it is recognized in the other comprehensive income or equity respectively.

Current

Provision for current taxation is based on taxability of certain income streams under final tax regime at the applicable tax rates and remaining income streams chargeable at current rate of taxation under the normal tax regime after taking into account tax credits and tax rebates available, if any. Provision of current tax is determined using the tax rate enacted at the reporting date.

Deferred

Deferred tax is recognized using the balance sheet liability method, providing for temporary difference between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax recognized is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities using the tax rates enacted or substantively enacted at the reporting date.

The Company recognizes a deferred tax asset to the extent that it is probable that taxable profits in the foreseeable future will be available against which the assets can be utilized. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Further, the Company also recognizes deferred tax liability on surplus on revaluation of property, plant and equipment which is adjusted against the related surplus.

3.4 Mark-up bearing borrowings and borrowing cost

Mark-up bearing borrowings are recognized initially at fair value, less attributable transaction cost. Subsequent to initial recognition, mark-up bearing borrowings are stated at amortized cost, while the difference between the cost (reduced for periodic payments) and redemption value is recognized in the statement of profit or loss account over the period of the borrowings using the effective interest method. Borrowing costs are recognised as an expense in the period in which these are incurred, except that those which are directly attributable to the acquisition, construction or production of a qualifying asset (i.e. an asset that necessarily takes a substantial period of time to get ready for its intended use or sale) are capitalised as part of the cost of that asset.

3.5 Stores and spares

Stores and spares are stated at lower of weighted average cost and net realizable value. Items in transit are valued at cost comprising invoice value plus other charges incurred thereon.

Provision for obsolete and slow moving stores and spares is determined based on the management's estimate regarding their future usability.

Net realizable value signifies the estimated selling price in the ordinary course of business less the net estimated costs necessary to be incurred to make the sale.

3.6 Stock-in-trade

These are valued at lower of cost and net realizable value. Cost is determined under the weighted average basis. Cost of work-in-process and finished goods consists of direct materials, labour and applicable production overheads. Net realizable value signifies the estimated selling price in the ordinary course of the business less estimated cost of completion and selling expenses. The management continuously reviews its inventory for existence of any item which may be obsolete. Provision is made for slow moving inventory based on management's estimation. These are based on historical experience and are continuously reviewed. Items in-transit are valued at lower of cost and net realisable value. Cost comprises invoice value plus other charges paid thereon up to the reporting date.

Scrap is valued at estimated realizable value.

3.7 Cash and cash equivalents

Cash and cash equivalents comprise cash, bank balances on current and deposit accounts and running finance under mark-up arrangements. Short term running finances that are repayable on demand form an integral part of the Company's cash management and are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

3.8 Foreign currency translation

Transactions in foreign currencies are recorded in Pakistani rupees at the rates of exchange prevailing on the date of transaction. Monetary assets and liabilities in foreign currencies are reported in Pakistani rupees at the rates of exchange prevailing at the reporting date. Exchange gains and losses on translation are included in statement of profit or loss account currently.

3.9 Revenue recognition

- Revenue from sale of goods is measured at fair value of the consideration received or receivable. The Company records revenue from sale of goods at the point in time when control of the product has transferred, being when the products are delivered to the customer. Invoices are generated and revenue is recognised on delivery of products. Delivery occurs when the products have been shipped to or / and delivered to the customer's destination / specific location, the risks of loss have been transferred to the customer and the customer has accepted the product either as per the sales contract or lapse of acceptance provision or the Company has objective evidence that all criteria for acceptance have been satisfied. Further, a contract liability is also recognized for short term advances that the Company receives from its customers.
- Income on bank deposit and loan to employees is recognized on the time proportionate basis using effective interest method.
- Miscellaneous income is recognized on accrual basis.

3.10 Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made. Provisions are reviewed at each reporting date and adjusted to reflect current best estimate.

3.11 Offsetting of financial assets and liabilities

Financial assets and financial liabilities are only offset and the net amount reported in the statement of financial position when there is a legally enforceable right to set off the recognised amount and the Company intends to either settle on a net basis, or to realise the asset and settle the liability simultaneously.

3.12 Dividends and reserve appropriation

Dividends and reserve appropriations are recognized in the period in which these are declared / approved. Transfers between reserves made subsequent to reporting dates are considered as non-adjusting event and are recognised in the financial statement in the period in which these are approved.

3.13 Earnings per share

The Company presents basic and diluted earnings per share (EPS) for the shareholders. Basic EPS is calculated by dividing the profit after tax attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year.

Diluted EPS is calculated by adjusting basic EPS by the weighted average number of ordinary shares that would be issued on conversion of all dilutive potential ordinary shares into ordinary shares and post-tax effect of changes in profit or loss attributable to ordinary shareholders of the Company that would result from conversion of all dilutive potential ordinary shares into ordinary shares.

3.14 Trade debts, loans, advances, deposits and other receivables

These are initially measured at the fair value of the consideration receivable. Subsequently these are valued at amortised cost. These assets are written off when there is no reasonable expectation of recovery. Credit loss is based on the expected credit loss.

3.15 Property, plant and equipment

- The cost of an item of property, plant and equipment is recognized as an asset if it is probable that future economic benefits associated with the item will flow to the entity and the cost of such item can be measured reliably. Recognition of the cost in the carrying amount of an item of plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by the management.
- Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses, if any, except that building is stated at revalued amount less accumulated depreciation and impairment losses, if any, while land is stated at revalued amount (less impairment losses, if any). Leasehold land is not depreciated since the lease is renewable at nominal price at the option of the lessee.
- Capital work-in-progress is stated at cost accumulated to the balance sheet date less impairment losses, if any. Cost include expenditures directly attributable to the acquisition of an asset. Transfers are made to relevant asset category as and when asset are available for intended use.
- The cost of property, plant and equipment include:
 - (a) its purchase price including import duties, non refundable purchase taxes after deducting trade discounts and rebates;
 - (b) any other costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management; and
 - (c) borrowing cost, if any.
- Depreciation of all items except for land is charged on straight line method at the rates specified in respective note to the financial statements and is generally recognized in statement of profit or loss account. Depreciation on additions is charged from the month in which asset is available for use up to the month of disposal. Depreciation methods, useful lives and residual value of each part of property, plant and equipment that is significant in relation to the total cost of the asset are reviewed and adjusted if appropriate, at each reporting date.

- The assets' residual values and useful lives are reviewed at the reporting date and if expectations differ from previous estimates, the change is accounted for as a change in an accounting estimate.
- Leasehold land and building are revalued by independent professionally qualified valuer with sufficient regularity to ensure that the net carrying amount does not differ materially from the fair values. In case of building, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated at the revalued amount of the asset. Surplus on revaluation of assets are credited to a 'Surplus on revaluation' account on the statement of financial position in equity. Surplus on revaluation of building to the extent of incremental depreciation charged thereon is transferred from surplus on revaluation of building to retained earnings (unappropriated profit), net of deferred tax.
- Expenditure incurred subsequent to the initial acquisition of asset is capitalised only when it is probable that the future economic benefits associated with the expenditure will flow to the Company and it meets the recognition criteria mentioned in accounting and reporting standards. All other expenditure is recognised in the statement of profit or loss account as expense.
- Gains or losses on disposal are included in statement of profit or loss account currently and the related residual revaluation surplus on property, plant and equipment, if any after taking into account incremental depreciation, is transferred directly to retained earnings (unappropriated profit).

3.16 Intangible assets

Intangible assets are initially recognised at cost less accumulated amortization and impairment losses, if any. Costs that are directly associated with identifiable software product controlled by the Company and have probable economic benefits beyond one year are recognised as intangible asset. Costs associated with maintaining computer software are recognised as an expense as and when incurred.

Amortisation is charged to statement of profit or loss account by applying the straight line basis whereby the carrying amount of an asset is amortised over its estimated useful life to the Company unless such life is indefinite. Amortisation is charged from the month the asset is available for use, while in case of disposal it is charged up to the month of disposal.

The Company accounts for impairment, where indications exist, by reducing asset's carrying amount to the recoverable amount.

3.17 Financial assets

Financial assets are initially recognised at the time when the Company becomes a party to the contractual provision of the instrument.

Financial assets currently comprising of the assets 'measured at amortised cost', are initially measured at fair value plus transaction costs that are directly attributable to its acquisition. These assets are subsequently measured at amortised cost using the effective interest rate method. The amortised cost is reduced by impairment losses. Interest / markup income, foreign exchange gains and losses and impairments are recognized in the statement of profit or loss account.

Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership.

3.18 Impairment of financial assets

The Company recognises loss allowances for Expected Credit Loss (ECLs) in respect of financial assets measured at amortised cost.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the bank balance for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition (although in this case the measurement is at 12 month ECLs).

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment including forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than past due for a reasonable period of time. Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. The Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for the recovery of amounts due.

3.19 Financial liabilities

Financial liabilities include long-term borrowings, short-term borrowings from banking companies, trade and other payables, lease liabilities and mark-up accrued on bank borrowings are initially recognised at the time when the Company becomes party to the contractual provisions of the instruments. All financial liabilities are recognised initially at fair value plus directly attributable transactions costs, if any, and subsequently measured at amortised cost using effective interest rate method, where applicable. The Company derecognises the financial liabilities when they are extinguished, that is, when the obligation referred in the contract is discharged, cancelled or have expired. Gain or loss on derecognition is recognised in the statement of profit or loss account.

3.20 Hedging Instrument

The Company holds derivative financial instruments to hedge its foreign currency exposures.

The Company documents the risk management objective and strategy for undertaking the hedge. The Company also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedged item and hedging instrument are expected to offset each other.

The hedging instruments are initially measured at fair value. Subsequent to initial recognition, these instruments are measured at fair value. Unrealized foreign exchange differences on hedging instruments are matched and accounted for with those on the underlying asset or liability and changes therein are recognized in statement of profit or loss account.

The Company designates all derivatives as hedging instruments to hedge the variability in fair values associated with firm commitment arising from changes in foreign exchange rates.

3.21 Impairment of non - financial assets

The carrying amount of the Company's non-financial assets other than deferred tax assets and inventories are reviewed at each reporting date to determine whether there is any objective evidence that an asset or group of assets may be impaired. If any such an evidence exists, the asset's or group of assets' recoverable amount is estimated. An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. Recoverable amount is the higher of the value in use and fair value less cost to sell. Impairment losses are recognized in the statement of profit or loss account.

3.22 Contingent liabilities

A contingent liabilities is disclosed when the Company has a possible obligation as a result of past events, whose existence will be confirmed only by the occurrence or non-occurrence, at one or more uncertain future events not wholly within the control of the Company; or the Company has a present legal or constructive obligation that arises from past events, but it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation, or the amount of the obligation can not be measured with sufficient reliability.

3.23 Segment Reporting

Segment results that are reported to the Company's Chief Executive Officer (CEO), the chief operating decision maker include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items, if any, comprise mainly corporate assets, head office, expenses and tax assets and liabilities. Management has determined that the Company has a single reportable segment and therefore it has only presented entity wise disclosures.

3.24 Government grants

Government grants are transfers of resources to an entity by a government entity in return for compliance with certain past or future conditions related to the entity's operating activities - e.g. a government subsidy. The definition of "government" refers to governments, government agencies and similar bodies, whether local, national or international.

The Company recognizes government grants when there is reasonable assurance that grants will be received and the Company will be able to comply with conditions associated with grants.

Government grants are recognized at fair value, as deferred income, when there is reasonable assurance that the grants will be received and the Company will be able to comply with the conditions associated with the grants.

Grants that compensate the Company for expenses incurred, are recognized on a systematic basis in the income for the year in which the related expenses are recognized. Grants that compensate for the cost of an asset are recognized in income on a systematic basis over the expected useful life of the related asset.

A loan is initially recognized and subsequently measured in accordance with IFRS 9. IFRS 9 requires loans at below-market rates to be initially measured at their fair value - e.g. the present value of the expected future cash flows discounted at a market-related interest rate. The benefit that is the government grant is measured as the difference between the fair value of the loan on initial recognition and the amount received, which is accounted for according to the nature of the grant.

3.25 Leases

The Company assesses whether a contract is or contains a lease at inception of the contract. This assessment involves the exercise of judgement about whether it depends on a specified asset, whether the Company obtains substantially all the economic benefits from the use of that asset, and whether the Company has the right to direct the use of the asset.

The Company recognizes a right-of-use (ROU) asset and a lease liability at the lease commencement date, except for short term leases of 12 months or less and leases of low value items, which are expensed in the statement of profit or loss account on a straight-line basis over the lease term.

The lease liability is initially measured at the present value of the lease payment that are not paid at the commencement date, discounted using the interest rate implicit in the lease. If this rate cannot be readily determined, the Company uses the incremental borrowing rate applicable in the market for such leases.

The lease liability is subsequently measured at amortized cost using the effective interest rate method and remeasured (with a corresponding adjustment to the related ROU asset) when there is a change in future lease payments in case of renegotiation, changes of an index or rate or in case of reassessment of options.

At inception, the ROU asset comprises the initial lease liability, initial direct costs and the obligations to refurbish the asset, less any incentives granted by the lessors. The ROU asset is depreciated over the shorter of the lease term or the useful life of the underlying asset. The ROU asset is subject to testing for impairment if there is an indicator for impairment, as for owned assets.

Rental contracts for headoffices, warehouses and sales offices are made for a fixed period subject to renewal upon mutual consent of Company and lessor. Wherever practicable the Company seeks to include extension option to provide operational flexibility. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. Management exercises significant judgement in determining whether these extension and termination options are reasonably certain to be exercised. The future lease payments have been discounted using average borrowing rate applicable at inception of lease. The weighted average lessee's incremental borrowing rate applied to the lease liabilities at inception of lease is 14.28%.

36 FINANCIAL INSTRUMENTS

Financial risk management

The Board of Directors of the Company has the overall responsibility for the establishment and oversight of the Company's risk management framework. The Board of Directors is also responsible for developing and monitoring the Company's risk management policies. The Company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

36.1 Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss, without taking into account the fair value of any collateral. Concentration of credit risk arises when a number of counter parties are engaged in similar business activities or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economics, political or other conditions. Concentrations of credit risk indicate the relative sensitivity of the Company's performance to developments affecting a particular industry.

Credit risk of the Company arises principally from the trade debts, loans and advances, trade deposits, bank balances and other receivables. The carrying amount of financial assets represents the maximum credit exposure. To reduce the exposure to credit risk the Company has developed a formal approval process whereby credit limits are applied to its customers. The management continuously monitors the credit exposure towards the customers and makes provision against those balances considered doubtful of recovery (and also obtains security / advance payments, wherever considered necessary). Cash is held only with reputable banks with high quality credit worthiness.

The maximum exposure to credit risk at the reporting date is as follows:

	2021 (Rupees in '000)	2020
Trade debts	2,786,556	1,652,652
Loan to employees	12,429	9,789

Bank balances	107,295	84,813
Other receivables	56,607	26,793

Domestic (Pakistan)	2,973,158	1,800,719
Export	21,452	11,003
	2,994,610	1,811,722

36.1.2 The maximum exposure to credit risk for trade debts at the reporting date by type of customer is as follows:

Dealers and distributors	493,947	348,299
End-user customers	2,292,609	1,304,353
	2,786,556	1,652,652

36.1.3 As at the year end, the Company's most significant customers included a stockist from whom Rs. 266.25 million was due (Distributor - 2020: Rs. 216.83 million) and an end-user from whom Rs. 495.42 million was due (2020: Rs. 180.54 million).

36.1.4 Loans, advances and other receivables mentioned above include due from the employees of the Company, while the deposits are held with utility companies, etc. All the financial assets of the Company are unsecured (except as mentioned in note 8).

36.1.5 Other receivables includes derivative financial assets amounting to Rs 0.544 million (2020: Nil) which are classified at fair value through profit or loss. These do not have any material impact as these are placed with banks having good credit rating as mentioned in note 36.1.8 of these financial statements.

36.1.6 Impairment losses and past due balances

The following table provides information about the exposure to credit risk and ECLs for trade receivables as at reporting date.

	2021			2020		
	Gross	Impairment	Credit Impaired	Gross	Impairment	Credit Impaired
	(Rupees in '000)

Above balances are unsecured. None of the other financial assets are past due or impaired other than those which have been provided. Movement of provision against trade debts is disclosed in note 11.2.

Loss rates are based on historical credit loss experience and are adjusted to reflect differences between economic conditions during the period over which the historical data has been collected, current conditions and the Company's view of economic conditions over the expected lives of the receivables.

Based on the past experience, consideration of financial position, past track records and recoveries, the Company believes that impairment on trade debts past have been appropriately accounted for in these financial statements.

36.1.7 Settlement risk

All transactions are settled / paid for upon delivery as per the advice of the management. The Company's policy is to enter into financial instrument contract by internal guidelines such as approving counter parties and approving credits.

36.1.8 Bank balances

The Company maintain bank balances with banks having good credit rating. Currently the balances are held with banks having long term ratings of AAA Rs. 57.41 million (2020: Rs. 44.69 million) and AA+ Rs. 49.89 million (2020: Rs. 40.13 million) as per a credit rating Company.

36.2 Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial obligations as they fall due. Liquidity risk arises because of the possibility that the Company could be required to pay its liabilities earlier than expected or difficulty in raising funds to meet commitments associated with financial liabilities as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Following are the contractual maturities of undiscounted financial liabilities, including interest payments (based on the remaining period to maturity):

36.3 Market risk

Market risk is the risk that the value of the financial instrument may fluctuate as a result of changes in market interest rates or the market price due to a change in credit rating of the issuer or the instrument, change in market sentiments, speculative activities, supply and demand of securities and liquidity in the market. The Company is exposed to currency risk and interest rate risk only.

36.3.1 Currency risk

Foreign currency risk is the risk that the value of a financial asset or liability will fluctuate due to a change in foreign exchange rates. It arises mainly where receivables and payables exist due to transactions entered into foreign currencies.

The Company is exposed to currency risk on bank balance and import of raw materials that are denominated in a foreign currency. The Company's exposure to foreign currency risk is as follows:

	2021			
	Rupees	US Dollars	Euro	CNY
	(in '000)			
Trade debts	21,452	136	-	-
Bank balance	40,751	258	-	-

Above exposure is payable by the Company in Rupees at the rate on which these are settled by the Company.

Following are the significant exchange rates applied during the year:

	Average rates		Reporting date rate

Euro	191.13	175.06	188.71	189.73
CNY	24.21	22.51	24.76	24.00

Sensitivity analysis

A five percent strengthening / (weakening) of the Rupee against US Dollar at 30 June 2021 would have increased / (decreased) equity and statement of profit or loss account by profit / loss of Rs. 6.78 million (2020: Profit / loss of Rs. 3.87 million). This analysis assumes that all other variables, in particular interest rates, remaining constant. The analysis was performed on the same basis for 2020.

The sensitivity analysis prepared is not necessarily indicative of the effects on profit or loss for the year and assets / liabilities of the Company.

36.3.2 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Majority of the interest rate exposure arises from borrowings from the banks. At the reporting date the interest rate profile of the Company's interest-bearing financial instrument was as follows:

	Carrying amount	
	2021	2020
	(Rupees in '000)	
Fixed rate instruments		
Financial assets	5,697	5,218
Financial liabilities	354,572	190,159
Variable rate instruments		
Financial liabilities	2,955,362	2,005,330
Financial assets	17,960	19,209

Fair value sensitivity analysis for fixed rate instruments

The Company does not account for fixed rate financial assets at fair value through profit and loss. Therefore, a change in interest rates at the reporting date would not affect the statement of profit or loss account and the equity of the Company.

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have increased / (decreased) profit as of 30 June 2021 by Rs. 4.19 million (2020: Rs. 4.86 million). This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis for 2020.

The sensitivity analysis prepared is not necessarily indicative of the effects on profit for the year and assets / liabilities of the Company.
