DIRECTORS' REVIEW

Dear Shareholders

The Directors present the unaudited condensed interim unconsolidated financial statements for the quarter ended March 31, 2022.

Economy:

Pakistan's economy continues to recover albeit the unfolding domestic and international scenario causing macroeconomic imbalances, elevated risks and inflation. The geo political tensions and future market trends suggest international commodity prices to rise further, impacting inflation outlook. Though a pass-through to CPI may remain contained due to regulatory relief measures and packages. The State Bank of Pakistan announced a 250 bps increase in policy rate on April 7, 2022. The proactive announcement ahead of the schedule, is targeted to safeguard external sector and price stability. Additional regulatory actions, including rise in interest rate on export refinance scheme and widening the set of import items subject to cash margin, are also indicated to further dilute pressures on inflation and current account. The performance of domestic economy continues on a track and appears aligned with the growth target of ~5 percent for the current fiscal. As the cyclical position returns to a more sustainable neutral stance, the economic growth will be driven primarily by the expansion of the manufacturing capacity. The intensity of internal and external risks has not been fully realized yet and may adversely affect domestic economic activities. Though a reduction in domestic political uncertainty and prudent fiscal policies, will help ensure that Pakistan's robust economic recovery post Covid-19 remains sustainable.

Financial Performance:

The financial results of Askari Bank for the quarter ended March 31, 2022 are summarized as under:

	(Rupees in million

Provisions reversals - net	175	170	
Profit before taxation	6,100	4,492

Net aggregate revenues increased by 7.6 percent to Rs 11.0 billion during the current quarter mainly due to net mark-up income that increased by 11 percent delivered mostly by volumetric growth. Non-mark-up income declined by 2.6 percent due to lesser gain on securities, though fee commissions, dividend income,

foreign exchange and other income increased by 32 percent offsetting the decline in gain on securities. Non-mark-up expenses for the current period declined by 14 percent mainly due to a reduction in compensation expense upon complete implementation of human capital strategy during the period. Other operating expenses increased by 15 percent over the corresponding quarter reflecting impact of inflation, rupee devaluation and branch expansion. Customer deposits are reported at Rs 997.5 billion; current and saving accounts constituted 81 percent of the total deposit as at March 31, 2022. Gross advances stood at Rs 496.2 billion, a decline of 2.3 percent during the quarter. Non-performing loans registered a slight decline while provision coverage ratio improved from 97 to 98 percent at the quarter end.

The Bank's entity rating was reaffirmed at 'AA+' (Double A Plus) for the long-term by Pakistan Credit Rating Agency Limited (PACRA), with outlook assigned as 'Stable'. The Bank's strong brand and affiliation with Fauji Foundation are recognized as the key rating drivers, supported by strengths in terms of market penetration, customer confidence, sustainable funding sources and avenues for generating mark-up and non-mark-up based income stream. The short-term rating was maintained at 'A1+' (A One Plus).

Looking ahead, Askari Bank is well positioned for sustainable growth and enhanced value proposition for the long-term shareholders. The Bank will continue to drive business growth supported by enhanced governance, compliance, credit and effective risk management. The Bank plans to grow its market share in retail segment, particularly low-cost deposits and consumer products. Emphasis will remain on boosting trade volumes and increasing penetration in cash management with a focus on SME and commercial clients. The Bank is expanding branch network to widen outreach and better serve its customers. Alongside, investing in human capital and creating a caring culture, process improvement and automation, remains a key priority.

To cope with changing business, Askari Bank has enhanced focus on harnessing digital solutions to ensure customers' banking needs are fully met in a technologically advanced, secure and convenient manner. To this end, the Bank has embarked upon a digital transformation strategy to support world-class digital finance in partnership with Din Global, an international fintech venture. The partnership is set out to create a product that will offer progressive financial services and impact the grassroots of our country by bringing them into the fold of formal economy.

Acknowledgment:

On behalf of the Board, we would like to place on record our gratitude to our valued customers and shareholders for their continued patronage to the Askari brand; our profound thanks to the State Bank of Pakistan, Securities and Exchange Commission of Pakistan and other regulatory authorities for their guidance and assistance. 33. FAIR VALUE MEASUREMENTS

The fair values of traded investments are based on quoted market prices. The fair values of unquoted equity investments are estimated using the break-up value of the investee company.

The fair value of unquoted debt securities, fixed term advances, fixed term deposits and borrowings, other assets and other liabilities cannot be calculated with sufficient reliability due to the absence of a current and active market for such assets and liabilities and reliable data regarding market rates for similar instruments.

In the opinion of the management, the fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since they are either short-term in nature or, in the case of customer advances, deposits and certain long term borrowings, are frequently repriced.

All assets and liabilities for which fair value is measured or disclosed in these consolidated financial statements are categorized within the fair value hierarchy based on the lowest level input that is significant to the fair value measurement.

The Bank measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

33.1 Fair value of financial assets

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets (Pakistan Stock Exchange) for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices) available at MUFAP and Reuters page.
- Level 3: Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

Valuation techniques used in determination of fair values within level 2 and level 3

	·
Federal Government Securities	The fair values of Federal Government Securities are determined on the basis of rates / prices sourced from Reuters.
Non Government Debt Securities	Non Government Debt Securities are valued on the basis of rates announced by Mutual Fund Association of Pakistan (MUFAP).
Foreign Government Debt Securities	Foreign Government Debt Securities are valued on the basis of rates taken from custodian of the securities which are usually drawn from Bloomberg.
Unit of Mutual Funds	Fair values of mutual funds are determined based on their net asset values as published at the close of reporting period.
Forward foreign exchange contracts and Forward Government securities transactions	The fair values of forward foreign exchange contracts and forward Government securities transactions are determined using forward pricing calculations.
Fixed Assets and Non Banking Assets Acquired in Satisfaction of Claims	Land and Non Banking assets acquired in satisfaction of claims are valued on a periodic basis using professional valuers. The valuation is based on their assessments of the market value of the assets. The effect of changes in the unobservable inputs used in the valuations cannot be determined with certainty. Accordingly, a qualitative disclosure of sensitivity has not been presented in these condensed interim unconsolidated financial statements.

The following table provides the fair values of those of the Bank's financial assets and liabilities that are recognized or disclosed at fair value in these unconsolidated condensed interim financial statements:

33. FAIR VALUE MEASUREMENTS

The fair values of traded investments are based on quoted market prices. The fair values of unquoted equity investments are estimated using the break-up value of the investee company.

The fair value of unquoted debt securities, fixed term advances, fixed term deposits and borrowings, other assets and other liabilities cannot be calculated with sufficient reliability due to the absence of a current and active market for such assets and liabilities and reliable data regarding market rates for similar instruments.

In the opinion of the management, the fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since they are either short-term in nature or, in the case of customer advances, deposits and certain long term borrowings, are frequently repriced.

All assets and liabilities for which fair value is measured or disclosed in these consolidated financial statements are categorized within the fair value hierarchy based on the lowest level input that is significant to the fair value measurement.

The Group measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

33.1 Fair value of financial assets

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets (Pakistan Stock Exchange) for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices) available at MUFAP and Reuters page.
- Level 3: Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

Valuation techniques used in determination of fair values within level 2 and level 3

	-
Federal Government Securities	The fair values of Federal Government Securities are determined on the basis of rates / prices sourced from Reuters.
Non Government Debt Securities	Non Government Debt Securities are valued on the basis of rates announced by Mutual Fund Association of Pakistan (MUFAP).
Foreign Government Debt Securities	Foreign Government Debt Securities are valued on the basis of rates taken from custodian of the securities which are usually drawn from Bloomberg.
Unit of Mutual Funds	Fair values of mutual funds are determined based on their net asset values as published at the close of reporting period.
Forward foreign exchange contracts and Forward Government securities transactions	The fair values of forward foreign exchange contracts and forward Government securities transactions are determined using forward pricing calculations.
Fixed Assets and Non Banking Assets Acquired in Satisfaction of Claims	Land and Non Banking assets acquired in satisfaction of claims are valued on a periodic basis using professional valuers. The valuation is based on their assessments of the market value of the assets. The effect of changes in the unobservable inputs used in the valuations cannot be determined with certainty. Accordingly, a qualitative disclosure of sensitivity has not been presented in these consolidated condensed interim financial statements.
