Directors' Report

We are pleased to present the unaudited financial statements of JS Bank Limited ("JSBL") for the quarter ended March 31, 2022.

Economy review

During 3QFY22 FBR collection continued to improve, taking 9MFY22 collection to PKR 4,382 billion, marking a growth of 29% YoY and surpassing the target by PKR 247 billion. As a result, 1HFY22 fiscal deficit was recorded at 2.1% of GDP. Primary balance also reported a surplus of 0.1% of GDP.

With the uptick in economic activity during 3QFY22, average headline inflation increased to 12.6% YoY as compared to 11.0% YoY in the previous quarter. Although increase in headline inflation has mainly been on account of higher food prices, non-food-non-energy inflation is also witnessing gradual rise. SBP, however, kept the policy rate unchanged during 3QFY22.

At the same time, pressure at the external front rose as the country's import bill increased by 49% YoY during 8MFY22 to US\$47.9 billion. Led by machinery imports, vaccine imports and higher commodity prices, mounting import bill overshadowed the 28% YoY growth in exports. During the same period, growth in remittances fell to single digit at 8% YoY. As a result, Current Account Deficit (CAD) accumulated to US\$12.1 billion for the 8MFY22 period, as compared to a surplus of US\$994 million during 8MFY21.

During 9MFY22, the country's foreign exchange reserves decreased by US\$5.3 billion to US\$18.56 billion as of 25 March 2022, where the decline was broadly witnessed by SBP foreign exchange reserves over higher CAD levels and scheduled debt repayments. The decline in forex reserves led to weak forex market sentiments, resulting in 16% depreciation in PKR against the US\$ during the period.

Banking sector review

After increasing the Policy Rate to 9.75% as of CY21 end, the Monetary Policy Committee (MPC) kept the Policy Rate unchanged during 1QCY22. During the same period (2MCY22), the average weighted average banking spreads slightly increased by 7bps YoY, reaching 4.44%.

The banking sector deposits touched PKR 19,914 billion, expanding by 15% YoY as of February 2022. Relatively a higher portion of deposits continued to be parked in investments, which increased 25% YoY to PKR 14,541 billion and taking the IDR up to 73%. Advances, on the other hand, increased by 17% YoY to PKR 9,961 billion, with ADR slightly increasing to 50%. Moreover, Non-Performing Loans as at Dec.21 clocked in at PKR 860 billion, keeping the sector's Infection ratio close to 8%.

Bank continued to focus on its long term strategy of reducing large-ticket high-cost (public and private sector) deposits, which declined by roughly 11% on QoQ basis. On the other hand, non-remunerative deposits increased by 5% QoQ and their share in total deposit also improved to 28% in March 2022 from 26% in December 2021. Therefore, while the aggressive shedding of expensive deposits led to 2%QoQ reduction in overall deposits, Bank is expected to continue plugging the gap with non-remunerative and retail deposits. Furthermore, reduction in public sector deposits is also expected to benefit us once Treasury Single Account (TSA) is fully implemented. Bank's efforts to increase its customer base also resulted in approximately 11% QoQ growth in number of depositors.

During the period under review, Gross advances were reported at PKR 253.81 billion while advances to deposits ratio stood at 56.3% with continued focus to increase small ticket lending. Gross Investments increased by 30%, which mostly consist of short-term government securities. In addition, the Bank remains satisfactorily capitalized with CAR at 13.61% at the close of the first quarter.

During the first quarter, Earnings witnessed a marginal uptick as the Bank reported a profit after tax of PKR 409.62 million as compared to a profit after tax of PKR 390.08 million in the

corresponding period last year. The Earnings Per Share (EPS) stands at PKR 0.32 (March 2021: PKR 0.30). On the revenue side, the Bank earned mark-up income of PKR 13,802.53 million compared to PKR 9,611.60 million in the corresponding period last year, an increase of 43.6%. Net interest income improved by 17.7% YoY on the back of increase in non-remunerative deposit mix and growth in mortgage financing and program lending. Non-markup income stood at PKR 1,209.52 million (up 12.1%) with major contributions from FX income and gain on sale of securities. Moreover, administrative expenses witnessed a growth of 13.1% as the we gear up customer onboarding on Zindigi and bring overall improvement in Bank's tech infrastructure.

Consolidated Financial Statements

On consolidated basis, JS Bank along with its subsidiaries JS Global Capital and JS Investments earned a profit before tax of PKR 889.8 million (profit after tax of PKR 617.6 million) for the first quarter period ended March 31, 2022, as compared to a profit before tax of PKR 850.2 million (profit after tax of PKR 527.6 million) in the corresponding period last year. The earnings per share stood at PKR 0.45 for the first quarter ended March 31, 2022.

35. FAIR VALUE OF FINANCIAL INSTRUMENTS

IFRS 13 "Fair Value Measurement" defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of quoted securities other than those classified as held to maturity, is based on quoted market price. Fair value of fixed term loans, other assets, other liabilities and fixed term deposits cannot be calculated with sufficient reliability due to absence of current and active market for assets and liabilities and reliable data regarding market rates for similar instruments. The provision for impairment of loans and advances has been calculated in accordance with the Bank's accounting policy as stated in note 4.6 to the annual unconsolidated financial statements for the year ended December 31, 2021.

In the opinion of the management, the fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since assets and liabilities are either short term in nature or in the case of customer loans and deposits are frequently repriced.

Fair value hierarchy

IFRS 13 requires the Bank to classify fair value measurement using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has following levels:

- **Level 1:** Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- **Level 2:** Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: Fair value measurements using unobservable inputs for the asset or liability.

35.1 Valuation techniques used in determination of fair values within level

Item	Valuation approach and input used
Financial Instruments- Level 1	
Shares of listed companies	Fair values of investments in listed equity securities are valued on the basis of closing quoted market prices available at the Pakistan Stock Exchange.
Financial instruments - Level 2	
Units of mutual funds	Fair values of investments in units of mutual funds are determined based on redemption prices disclosed at the Mutual Funds Association of Pakistan (MUFAP) as at the close of the business days.
Market Treasury Bills(MTB) / Pakistan Investment Bonds(PIB), and GoP Sukuks (GIS)	Fair values of Pakistan Investment Bonds and Market Treasury Bills are derived using PKRV and PKFRV rates (Reuters page).
Debt Securities (TFCs) and Sukuk other than Government	Investments in debt securities (comprising of Term Finance Certificates, Bonds and any other security issued by a company or a body corporate for the purpose of raising funds in the form of redeemable capital) are valued on the basis of the rates announced by the Mutual Funds Association of Pakistan (MUFAP) in accordance with the methodology prescribed by the SECP.
Overseas Government Sukuks, Overseas and Euro Bonds	The fair value of Overseas Government Sukuks, and Overseas Bonds are valued on the basis of price available on Bloomberg.
Forward foreign exchange contracts	The valuation has been determined by interpolating the foreign exchange revaluation rates announced by the State Bank of Pakistan.
Derivatives	The fair values of derivatives which are not quoted in active markets are determined by using valuation techniques. The valuation techniques take into account the relevant underlying parameters including foreign currencies involved, interest rates, yield curves, volatilities, contracts duration, etc.

Financial instruments in level 3

Currently, no financial instruments are classified in level 3.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

Non- financial assets- Level 3

Non- Illiancial assets- Level 5	
Fixed assets - Land and building	Fixed assets and Non-banking assets under satisfaction of claims are carried at
	revalued amounts determined by professional valuers based on their assessment of
	the market values as disclosed in note 11 and 13 in the annual unconsolidated
	financial statements. The valuations are conducted by the valuation experts appointed
	by the Bank which are also on the panel of State Bank of Pakistan. The valuation
Non-banking assets under satisfaction of claims	experts used a market based approach to arrive at the fair value of the Bank's
Inon-banking assets under satisfaction of claims	properties. The market approach used prices and other relevant information
	generated by market transactions involving identical or comparable or similar
	properties. These values are adjusted to reflect the current condition of the properties.
	The effect of changes in the unobservable inputs used in the valuations cannot be
	determined with certainty, accordingly a qualitative disclosure of sensitivity has not
	been presented in these financial statements.

- **35.2** The Bank's policy is to recognise transfers into and out of the different fair value hierarchy levels at the date the event or change in circumstances that caused the transfer occurred. There were no transfers between levels 1 and 2 during the period.
- **35.3** The following table provides an analysis of financial assets that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

These condensed interim consolidated financial Statements do not include all the information and disclosures required for annual consolidated financial statements and should be read in conjunction with the consolidated financial statements for the year ended December 31, 2021.

The SBP has deferred the applicability of International Accounting Standard (IAS) 39, 'Financial Instruments: Recognition and Measurement' and International Accounting Standard (IAS) 40, 'Investment Property' for banking companies vide BSD Circular Letter No. 10 dated August 26, 2002 till further instructions. Accordingly, the requirements of these standards have not been considered in the preparation of these consolidated financial statements. However, investments have been classified and valued in accordance with the requirements prescribed by the SBP through various circulars.

However, State Bank of Pakistan (SBP) has extended the effective date of applicability of IFRS 9 on or after January 01, 2022 through its BPRD Circular No. 24 dated July 05, 2021. The said circular contained instructions only for quarterly parallel run reporting of IFRS 9 from March 31, 2021 and onwards of which the Bank is adequately complied. Whereas it was stated that final instructions will be issued based on the results of parallel reporting, which are yet to be issued.

As of reporting date, the guidelines and instructions on the application of IFRS 9 for the banking sector of Pakistan has not been issued by the State Bank of Pakistan (SBP), therefore, the Bank has not considered the impact of IFRS 9 for its domestic operations in these unconsolidated financial statements. FAIR VALUE OF FINANCIAL INSTRUMENTS 35.

IFRS 13 "Fair Value Measurement" defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of quoted securities other than those classified as held to maturity, is based on quoted market price. Fair value of fixed term loans, other assets, other liabilities and fixed term deposits cannot be calculated with sufficient reliability due to absence of current and active market for assets and liabilities and reliable data regarding market rates for similar instruments. The provision for impairment of loans and advances has been calculated in accordance with the Bank's accounting policy as stated in note 4.6 to the annual consolidated financial statements.

In the opinion of the management, the fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since assets and liabilities are either short term in nature or in the case of customer loans and deposits are frequently repriced.

Fair value hierarchy

IFRS 13 requires the Bank to classify fair value measurement using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has following levels:

- Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Fair value measurements using unobservable inputs for the asset or liability. Level 3:

Valuation techniques used in determination of fair values within level 35.1

Item	Valuation approach and input used
Financial Instruments- Level 1	
Shares of listed companies	Fair values of investments in listed equity securities are valued on the basis of closing quoted market prices available at the Pakistan Stock Exchange.
Financial instruments - Level 2	
Units of mutual funds	Fair values of investments in units of mutual funds are determined based on redemption prices disclosed at the Mutual Funds Association of Pakistan (MUFAP) as at the close of the business days.
Market Treasury Bills(MTB) / Pakistan Investment Bonds(PIB), and GoP Sukuks (GIS)	Fair values of Pakistan Investment Bonds and Market Treasury Bills are derived using PKRV and PKFRV rates (Reuters page).
Debt Securities (TFCs) and Sukuk other than Government	Investments in debt securities (comprising of Term Finance Certificates, Bonds and any other security issued by a company or a body corporate for the purpose of raising funds in the form of redeemable capital) are valued on the basis of the rates announced by the Mutual Funds Association of Pakistan (MUFAP) in accordance with the methodology prescribed by the SECP.
Overseas Government Sukuks, Overseas and Euro Bonds	The fair value of Overseas Government Sukuks, and Overseas Bonds are valued on the basis of price available on Bloomberg.
Forward foreign exchange contracts	The valuation has been determined by interpolating the foreign exchange revaluation rates announced by the State Bank of Pakistan.
Derivatives	The fair values of derivatives which are not quoted in active markets are determined by using valuation techniques. The valuation techniques take into account the relevant underlying parameters including foreign currencies involved, interest rates, yield curves, volatilities, contracts duration, etc.

Financial instruments in level 3

Currently, no financial instruments are classified in level 3.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

Non- financial assets- Level 3

Non- illianciai assets- Level s	
Fixed assets - Land and building	Fixed assets and Non-banking assets under satisfaction of claims are carried at revalued amounts determined by professional valuers based on their assessment of the market values as disclosed in note 11 and 13 of these annual consolidated financial statements. The valuations are conducted by the valuation experts appointed by the Bank which are also on the panel of State Bank of Pakistan. The valuation experts used a market based approach to arrive at the fair value of the Bank's properties. The market approach used prices and other relevant information generated by market
Non-banking assets under satisfaction	transactions involving identical or comparable or similar properties. These values are adjusted to
of claims	reflect the current condition of the properties. The effect of changes in the unobservable inputs used in the valuations cannot be determined with certainty, accordingly a qualitative disclosure of sensitivity has not been presented in these financial statements.

- 35.2 The Group's policy is to recognise transfers into and out of the different fair value hierarchy levels at the date the event or change in circumstances that caused the transfer occurred. There were no transfers between levels 1 and 2 during the year.
- The following table provides an analysis of financial assets that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.
