DIRECTORS' REPORT

We are pleased to present the unaudited financial statements of JS Bank Limited ("JSBL") along with the consolidated financial statements for the nine months period ended September 30, 2022.

Economy Review

During 1QFY23 FBR collection continued to improve, taking tax collection to PKR 1,635 billion and surpassing the target by PKR 26 billion. On the other hand, average Consumer Price Index (CPI) during 1QFY23 increased to 25.1%, mainly driven by food and energy inflation. The higher inflation led to uptick in Policy Rate by 125 basis points (bps) during the quarter, taking it to 15%.

Pressures on the external front started easing as trade deficit began to reduce with 11% YoY contraction in 2MFY23. Exports increased by 11% YoY to US\$ 5.1 billion, while Imports declined by 2% YoY to US\$ 11.1 billion. Decline in import bill was led by lower commodity prices and tighter administrative controls on imports. Although remittance inflow declined by 3% YoY, improvement in trade account has led to overall Current Account Deficit (CAD) falling to US\$ 1.9 billion in 2MFY23 from USD\$2.4 billion during the same period last fiscal year. SBP FX Reserves also received support from US\$ 1.2 billion IMF disbursements in August 2022, increasing to US\$ 8.8 billion. This slightly improved import cover-up from 6 to 7 weeks.

Banking Sector Review

During 7MCY22, the weighted average banking spreads increased by 47 bps YoY, reaching to 4.84% amidst hawkish monetary policy environment. Banking sector deposits touched PKR 22,152 billion in August (up 15% YoY). Similarly, Total Investments increased 31% YoY to 18,183 billion (IDR 82%), while Advances increased 22% YoY to 10,922 billion (ADR 49%). Moreover, Non-Performing Loans as at 2QCY22 clocked in at PKR 878 billion, keeping the sector's Infection Ratio close to 8%.

Performance Overview

Bank continued its journey of gradual improvement as profit before tax is recorded at PKR 1,808.3 million for the nine months ended September 30, 2022 (up 6.7% YoY). The higher profitability emanated from improvement in core income as net interest income increased by 16% YoY to PKR 10,534.8 million. Moreover, net interest margins also increased to 1.86% in 9M2022 as compared to 1.81% in the same period last year. Bank's non-markup income also increased by 16.26% YoY to PKR 4,325.6 million during the said period.

This increase in revenue helped the bank record better (before tax) profitability during the period, despite operating expenses increasing by roughly 25.6% owing to higher marketing and technology expenditure related to the launch of bank's digital brand 'Zindigi'. Nonetheless, upward revision in tax rates in the current fiscal year resulted in 43.5% higher taxation expense, thereby causing bank's profit after tax to decline by 18% YoY to PKR 820.58 million.

September 2022 also witnessed bank's non-remunerative deposits increasing to PKR 129.4 billion as compared to PKR 123.3 billion in September 2021. Moreover, share of non-remunerative deposits in total has also increased to ~27% in September 2022 as compared to 25% in the same month last year. On the assets side, total advances have declined to PKR 241 billion in September 2022 (down 6% YoY), which is part of bank's wider strategy to reduce low-spread advances while

focusing more on small-ticket high-margin loans, especially in the SME segment. Furthermore, Bank's gross infection ratio stands at 6.9% as compared to industry average of around 8.4%.

Consolidated Financial Statements

On a consolidated basis, JS Bank along with its subsidiaries JS Global Capital and JS Investments earned a profit before tax of PKR 1,994 million (profit after tax of PKR 962 million) for the nine months ended September 30, 2022, as compared to a profit before tax of PKR 1,855 million (profit after tax of PKR 1,057 million) in the corresponding period last year. The earnings per share stood at PKR 0.73 for the nine months ended September 30, 2022, and the Group remains satisfactorily capitalized with CAR at 14.07%.

NOTES TO THE CONDENSED INTERIM UNCONSOLIDATED FINANCIAL STATEMENTS

FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2022

35. FAIR VALUE OF FINANCIAL INSTRUMENTS

International Financial Reporting Standard (IFRS 13) 'Fair Value Measurement' defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of quoted securities other than those classified as held to maturity, is based on quoted market price. Quoted securities classified as held to maturity are carried at cost. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements. Fair value of unquoted debt securities, fixed term loans, other assets, other liabilities and fixed term deposits cannot be calculated with sufficient reliability due to absence of current and active market for assets and liabilities and reliable data regarding market rates for similar instruments.

In the opinion of the management, the fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since assets and liabilities are either short term in nature or in the case of customer loans and deposits are frequently repriced.

Fair value hierarchy

IFRS 13 requires the Bank to classify fair value measurement using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has following levels:

- Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the Level 1:
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either
- Level 3: Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).
- 35.1 Valuation techniques used in determination of fair values within level:

Item	Valuation approach and input used
Financial Instruments - Level 1	
Shares of listed companies	Fair values of investments in listed equity securities are valued on the basis of closing quoted market prices available at the Pakistan Stock Exchange.
-	

Financial instruments - Level 2

i ilialiciai ilisti ullicitts - Level 2	
Units of mutual funds	Fair values of investments in units of mutual funds are determined based on redemption prices disclosed at the Mutual Funds Association of Pakistan (MUFAP) as at the close of the business days.
Market Treasury Bills (MTB) / Pakistan Investment Bonds (PIB), and GoP Sukuks	Fair values of Pakistan Investment Bonds and Market Treasury Bills are derived using PKRV, PKFRV and PKISRV rates (Reuters page).
Debt Securities (TFCs) and Sukuk other than Government	Investments in debt securities (comprising of Term Finance Certificates, Bonds and any other security issued by a company or a body corporate for the purpose of raising funds in the form of redeemable capital) are valued on the basis of the rates announced by the Mutual Funds Association of Pakistan (MUFAP) in accordance with the methodology prescribed by the SECP.
Overseas Government Sukuks, Overseas and Euro Bonds	The fair value of Overseas Government Sukuks, and Overseas Bonds are valued on the basis of price available on Bloomberg.
Forward foreign exchange contracts	The valuation has been determined by interpolating the foreign exchange revaluation rates announced by the State Bank of Pakistan.
Derivatives	The fair values of derivatives which are not quoted in active markets are determined by using valuation techniques. The valuation techniques take into account the relevant underlying parameters including foreign currencies involved, interest rates, yield curves, volatilities, contracts duration, etc.

Financial instruments - Level 3

Currently, no financial instruments are classified in level 3.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments

Non- financial assets - Level 3

Fixed assets - Land and building	Fixed assets and Non-banking assets under satisfaction of claims are carried at revalued amounts determined by professional valuers based on their assessment of the market values as disclosed in note 11 and 13 in the unconsolidated financial statements for the year ended December 31, 2021. The valuations are conducted by the valuation experts appointed by the Bank which are also on the panel of State Bank of Pakistan. The valuation experts used a market based approach to arrive at the fair value of the Bank's properties. The market
	approach used prices and other relevant information generated by market transactions involving identical or comparable or similar properties. These values are adjusted to reflect the current condition of the properties. The effect of changes in the unobservable inputs used in the valuations cannot be determined with certainty, accordingly a qualitative disclosure of sensitivity has not been presented in these financial statements.

- 35.2 The Bank's policy is to recognise transfers into and out of the different fair value hierarchy levels at the date the event or change in circumstances that caused the transfer occurred. There were no transfers between levels 1 and 2 during the period.
- 35.3 The following table provides an analysis of financial assets that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

35. FAIR VALUE OF FINANCIAL INSTRUMENTS

International Financial Reporting Standard (IFRS) 13, 'Fair Value Measurement' defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of quoted securities other than those classified as held to maturity, is based on quoted market price. Quoted securities classified as held to maturity are carried at cost. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements. Fair value of unquoted debt securities, fixed term loans, other assets, other liabilities and fixed term deposits cannot be calculated with sufficient reliability due to absence of current and active market for assets and liabilities and reliable data regarding market rates for similar instruments.

In the opinion of the management, the fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since assets and liabilities are either short term in nature or in the case of customer loans and deposits are frequently repriced.

Fair value hierarchy

Item

IFRS 13 requires the Bank to classify fair value measurement using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has following levels:

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Valuation approach and input used

Level 3: Fair value measurements using unobservable inputs for the asset or liability.

35.1 Valuation techniques used in determination of fair values within level:

Financial Instruments - Level 1	
Shares of listed companies	Fair values of investments in listed equity securities are valued on the basis of closing quoted market prices available at the Pakistan Stock Exchange.
Financial instruments - Level 2	
Units of mutual funds	Fair values of investments in units of mutual funds are determined based on redemption prices disclosed at the Mutual Funds Association of Pakistan (MUFAP) as at the close of the business days.
Market Treasury Bills (MTB) / Pakistan Investment Bonds (PIB), and GoP Sukuks	Fair values of Pakistan Investment Bonds and Market Treasury Bills are derived using PKRV and PKFRV rates (Reuters page).
Debt Securities (TFCs) and Sukuk other than Government	Investments in debt securities (comprising of Term Finance Certificates, Bonds and any other security issued by a company or a body corporate for the purpose of raising funds in the form of redeemable capital) are valued on the basis of the rates announced by the Mutual Funds Association of Pakistan (MUFAP) in accordance with the methodology prescribed by the SECP.
Overseas Government Sukuks, Overseas and Euro Bonds	The fair value of Overseas Government Sukuks, and Overseas Bonds are valued on the basis of price available on Bloomberg.
Forward foreign exchange contracts	The valuation has been determined by interpolating the foreign exchange revaluation rates announced by the State Bank of Pakistan.
Derivatives	The fair values of derivatives which are not quoted in active markets are determined by using valuation techniques. The valuation techniques take into account the relevant underlying parameters including foreign currencies involved, interest rates, yield curves, volatilities, contracts duration, etc.

Financial instruments - Level 3

Currently, no financial instruments are classified in level 3.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

Non - financial assets - Level 3

11011 11110110101100010 201010	
Fixed assets - Land and building	Fixed assets and Non-banking assets under satisfaction of claims are carried at revalued amounts determined by professional valuers based on their assessment of the market values as disclosed in note 11 and 13 of these annual consolidated financial statements. The valuations are conducted by the valuation experts appointed by the Bank which are also on the panel of State Bank of Pakistan. The valuation experts used a market based approach to arrive at the fair value of the Bank's properties. The market approach used prices and other relevant information generated by
Non-banking assets under satisfaction of claims	market transactions involving identical or comparable or similar properties. These values are adjusted to reflect the current condition of the properties. The effect of changes in the unobservable inputs used in the valuations cannot be determined with certainty, accordingly a qualitative disclosure of sensitivity has not been presented in these financial statements.
