Indicative from the figures above, total sales of the company decreased by nearly 5.25% as compared to corresponding period. Loss after tax of the company in quarter ended September 30, 2022 is Rs. 83.988 million (corresponding period profit after tax: Rs. 3.682 million). The main reason for loss is due to global economy slowdown, increase in the cost of raw material, fuel prices and squeezing of margin in the sale price of the products.

### Review of Operations and Future prospects

The overall economic situation of Pakistan is under severe pressure like increased prices of energy, continued economic volatility, fierce competition in international markets and rising cost of doing business over the last several years has hampered the export growth, turnover and market competitiveness.

Bold steps, (including but not limited to) such as the formalization of textile policy, reduced tax rates for the industry, immediate measures for the availability of electricity and rationalization of its cost need to be taken by the Government; for they will provide the much needed support to the local industry.

### Acknowledgement

We are grateful to the management and employees of the Company for their hard-work and dedication. We also express our gratitude to our shareholders, bankers, suppliers and valued customers who cooperated with us throughout the period.

For and on behalf of the Board
