Directors' Report

Operating Performance

In the quarter under review (Q1 FY2023), the company's revenue for the 3 months increased by 24.66% compared to the same period last year. This was primarily due to higher selling prices for the period, stemming from higher raw material cost compared to the same period last year.

Though rising prices led to an increase in revenue, our gross margins clocked in at 9.58%, compared to 11.12% same quarter last year, constraining the growth in our gross profits for period under review to 7.4%.

Over-all operating expenses increased by 8.91% for the period, with the selling and distribution costs declining marginally by 2.88% - mainly on account of lower provisioning for advertisement - and administrative costs increasing by 30.86%. Main reasons for the rise in administrative costs were higher salaries and increased conveyance charges. As a result, the operating profit increased by 3.59% for the period under review.

Finance costs increased significantly for the quarter, as the company used more bank facilities to finance increased working capital needs while interest rates were also higher for the period. Conversely, higher interest rates also contributed to a sharp rise in other income in the shape of higher earnings on bank deposits.

Higher financial expenses converted the increase in profits at the operating level to a 21.57% decrease in profit before tax recorded for the quarter compared to same period last year.

Although the pre-tax profit was lower, our tax provision was higher for the period, up by 24.67% due to minimum tax. As a result, the company posted a profit after tax of PKR 10.66 million for the 3 quarter under review.

Outlook for the Year

Our outlook for the remaining 3 quarters has not changed much from the annual review done one month ago. We are still anticipating a difficult business environment for the company as the international oil markets continue to be volatile and a high degree of economic uncertainty prevails, especially with regards to the exchange rate and country's balance of payments position; which has a profound effect on import reliant companies like us.

However, the international markets have come off their highs of this calendar year, and if the PKR remains stable and market volatility normalizes, this will contribute to a lowering of prices and bring some relief to our margins in the medium term.

Having said this, it must be pointed out that at this time with inflationary pressures and a bleak economic outlook, the spending power of consumers is being diverted to lower prices brands. As we are operating in the premium segment, this could affect our volumes going forward, and we may have to rethink our pricing strategy with consequent impact on our profitability.

Acknowledgements

We would like to take this opportunity to thank our customers, suppliers and bankers for their continued support and cooperation towards the progress of the company. We hope that this support would continue in the future as well.

We would also like to thank our dedicated and talented team of executives, staff and workers for the hard work put in during the period. We expect continued efforts from our employees to achieve better results in the next three months.

And last, but not the least, the management is thankful to the board for its strong support and guidance in executing the vision and objectives set for the company.

For & on behalf of the board

Usar al moles

(TAHIR JAHANGIR) CHAIRMAN
