MARI PETROLEUM COMPANY LIMITED

DIRECTORS' REVIEW

The Board of Directors of Mari Petroleum Company Limited (MPCL) is pleased to present the Directors' Review and condensed interim financial statements of the Company for the six months period ended on December 31, 2022.

A. EXECUTIVE SUMMARY

Key Achievements:

MPCL has achieved excellent financial results during the first half of the financial year 2022-23. The Company's net sales reached Rs. 61 billion, and net profit reached Rs. 23.8 billion, both 44% higher than the same period of the last year. In order to pass on the benefit of the Company's success to its shareholders, the Board has announced the highest-ever interim cash dividend of Rs. 89 (890%) per share.

The Company enhanced its hydrocarbon resource base and production by undertaking the following initiatives: (i) successful commissioning of Phase-II facilities of development project Sachal Gas Processing Complex (ii) drilling and commissioning of first-ever horizontal development well Mari-122H in HRL Reservoir of Mari Field (iii) signing of a framework agreement with fertilizer customers for installation of pressure enhancement facilities at Mari Field and (iv) subsequent to the period end, a gas discovery at exploratory well Mari Ghazij-1 in Mari Field. The company also added four new exploration blocks in portfolio via participation in the competitive bid round held in October 2022. Despite the challenging security and operational environment, the Company accomplished the above milestones, once again demonstrating excellence of its technical skills and agile decision making.

While endeavoring to achieve its operational objectives, the Company adhered to the highest standards of Health, Safety, and Environment (HSE) practices. All key HSE targets remained within the acceptable limits.

In addition to Rs 35 billion contributions to the government exchequer in the form of various levies, royalty and taxes, the Company made over Rs. 234 million financial contribution during the period and actively participated in the flood relief activities in the flood devastated provinces of Sindh, Balochistan and KP.

Key Challenges:

As of December 31, 2022, on-balance sheet receivables stuck up due to circular debt issue have reached Rs. 28 billion. Rising trade debts are a cause of concern as these can create cash flow issues for the Company and impact the Company's future investment plans and ultimately its growth. The Company has taken up this matter with the relevant authorities to achieve a quick resolution.

Due to the Country's dwindling forex reserves, the Company, like other businesses, is facing delays in opening of LCs for import of critical equipment. Shipments have arrived at port but delay in retiring LCs is resulting in significant demurrages. If continued, this situation will impact the sustainability of production from existing facilities, delay in development of new discoveries and on-going/planned development projects, and reputational damage on account of delay in payment to vendors. The Company is undertaking proactive engagement with relevant governmental bodies and working-up contingency plans to deal with the situation.

MPCL is operating under a high threat environment. Security situation has deteriorated in KP and Balochistan. So far, the Company has been able to continue its operations without any major incident mainly with the support of Law Enforcement Agencies (LEAs). The Company is enhancing its internal security capabilities. LEAs have assured their full support to MPCL in its projects of national importance.

Exploration & Production job market dynamics are also changing. Employability Index has improved in the Middle East market due to growth in Oil & Gas sector. This could lead to talent migration, increasing the risk of loss of key resources. The Company is proactively working on further improving its human resource policies to attract and retain its human capital.

B. <u>DETAILED REPORT</u>

HEALTH, SAFETY AND ENVIRONMENT (HSE)

The Company's HSE performance during the period remained consistent and sustainable, resulting in the achievement of all HSE-related targets.

Criteria	Threshold	Current
		Status
Fatality Accident Rate (FAR)	0.00	0.00
Lost Time Injury Rate (LTIR)	0.22	0.00
Total Recordable Injury Rate (TRIR)	0.43	0.13
Process Safety Event Rate (PSER) -Tier-I	0.12	0.00
Process Safety Event Rate (PSER) -Tier-II	0.35	0.00
Motor Vehicle Crash Rate (MVCR)	0.12	0.05

As part of the company's HSE performance and systems improvement strategy, the following initiatives were launched:

- HSE cultural enrichment initiative safety leadership workshops
- Multiple HSE trainings, awareness and auditing campaigns
- Launch and implementation of management system procedures on various activities
- Development of integrated HSE auditing tools for MPCL rigs and seismic units
- Fire mapping and quantification survey and augmentation plan for Mari Field firefighting and suppression systems along with fire and tactical drills
- Successful closure of CIM audits at various locations and updating of legal register
- Implementation of best practices for route hazard assessment related to challenging projects

More than 1,260 training sessions and 271 emergency drills, including more than 691 trainings and 122 emergency drills for Mari Services Division were conducted in the period.

FINANCIAL PERFORMANCE

	Six month	Six months period ended December 31	
	2022	2022 2021	
Net Sales		42,418	44%
Profit Before Tax		36,152 24,528	
Income tax	(12,290)	(12,290) (7,958)	
Net Profit for the period	23,862	16,570	44%

Net Sales revenue has increased on account of higher oil and gas prices and exchange rate, despite slight decrease in production due to unplanned shutdowns and ATAs of fertilizer customers, production suspension from Bolan and Zarghun fields and suspension of gas supply to CPGCL and impact of super tax in the current period.

HYDROCARBON SALES

The hydrocarbon sales for the period is summarized below:

	Six months period ended December 31				Total	
	2022		2021		increase /	
	Total	Per day	Total	Per day	(decrease)	
Gas (MMSCF)

Other Fields	4,097	22	5,922	32	(31%)	
	135,035	734	139,195	756	(3%)	
Crude oil (barrels)						
Mari Field	10,542	57	10,018	54	5%	
Other Fields	150,924	820	252,578	1,373	(40%)	
	161,466	877	262,596	1,427	(39%)	

Total Net Sales in	17.50	05 002	18.33	00 505	(50/.)
equivalent BOEs	million	93,094	Million	99,393	(370)

This quarter had an unusually high number of annual turnaround of the fertilizer customers which were accounted for in Company's production targets. However, production was further curtailed by closure of Bolan, Zarghun and some unplanned shut-downs initiated by the fertilizer customers. Additionally, the Company decided to stop supply of gas to Central Power Generation Company Limited due to integrity issues of the gas transmission pipeline, non-payment of invoices and non-execution of gas sales agreement. All these factors impacted overall hydrocarbon production volumes negatively which was partially compensated by enhanced production from new projects as compared to the same period last year.

Production Operations at Mari Field

The Company successfully managed to maintain production from the HRL Reservoir above the incentive threshold of 577.5 MMSCFD for the greater part of the reporting period, through better production planning and proactive coordination with the customers by diverting undrawn volumes amongst the customers depending on their individual requirements. The Swing Gas Compressors installed at CMF-II also aided in this by allowing diversion of undrawn HRL gas volumes to SNGPL. Two additional compressors were installed at CMF to boost the swing gas capacity from 40 to 68 MMSCFD.

Production Operations at Other Fields

Production from Bolan East and Zarghun South fields in Balochistan had to be suspended in September due to unusual torrential rainfall and flash flooding. SSGC's pipeline infrastructure at Zarghun Field was damaged and partially swept away; road access to Bolan was also disconnected.

Timely execution of the Emergency Response Plan by the company ensured safety of its personnel and assets during these times of national calamity. The Company extended all possible support to SSGC and with close coordination, took all necessary measures to expeditiously complete repair and replacement of the damaged pipeline to restore Zarghun Field production on war footing.

Through these expeditious rehabilitation measures at both fields, oil production resumed from Bolan East in October 2022, while gas production from Zarghun Field was resumed in December 2022.

EXPLORATION, DEVELOPMENT AND OPERATIONAL ACTIVITIES

Drilling Activities

Exploratory Wells

The security situation in KP and Balochistan caused delays in planned exploration activities, however the Company proactively adjusted its plans and accelerated drilling of Mari Ghazij-1 exploratory well in the Mari Field area. The well was spudded-in on 24th November 2022 and successfully drilled down to the depth of 1,015 meters, to test the hydrocarbon potential of multiple limestone units within the Ghazij formation. During Drill Stem Test, the well flowed 5.1 MMSCFD (pre-acid) good quality natural gas with wellhead flowing pressure of 232 Psi at 64/64 inch choke size.

The post acid gas flow rate was 8.5 MMSCFD with a WHFP of 434 Psi at 64/64 inch choke. The well was further tested at 128/64 inch choke to establish its production potential; during the test period, it flowed 9.6 MMSCFD of gas with a WHFP of 292 Psi.

The well not only resulted in a discovery of good quality gas, but also added an additional reservoir horizon in the existing Mari field. The other significance of this discovery is that it has opened a new play concept, especially for infrastructure led exploration in mature basins. It is also pertinent to mention that before Ghazij, SUL/SML/PKL were the last discovered reservoir horizons in the Mari Field in 2005.

The Company plans to appraise the discovery to prove its extent and in parallel evaluate its development strategy.

Two exploratory wells, namely Sundha Thal-1 (Kalchas Block) and Shahpurabad-1 (Kohat Block), were drilled by our JV partners and were declared as dry.

Development Wells

The Company drilled its first ever horizontal well (Mari-122H) in the HRL reservoir of the Mari field and successfully commissioned to aid the declining delivery pressure and to sustain production plateau. The well was drilled to a total depth of 1,550 meters including a horizontal section of approximately 530 meters. After the acid stimulation job, the well was tested at a rate of around 21 MMSCFD of gas at a wellhead flowing pressure of 426 psig. This is a milestone for the Company as the deliverability of this horizontal well is much higher than the conventional vertical wells that it has historically drilled in the HRL Reservoir.

Detailed in-house technical work is ongoing to identify additional areas in the HRL reservoir to drill further horizontal wells.

In addition, a new development well, HRL121 was drilled and completed as a gas producer; workover of well MD-15 in the Mari Field was also successfully completed.

Seismic Data Acquisition

In Ziarat Block, MPCL's own seismic crew has acquired 228 km² 3D seismic data, which is being processed. Based on the processing, interpretation and integration of all available data, additional exploratory prospects and Bolan East discovery appraisal potential shall be firmed up.

In Wali West Block, MPCL's own seismic crew is engaged in acquisition of 482 line-km firm, and 164 line-km contingent, 2D seismic data. Currently, circa 100 line-km seismic data has been recorded and its processing is ongoing at Mari's own seismic processing center in parallel.

MPCL's Seismic Crew commenced third party 2D seismic data acquisition project of Musakhel Block operated by Pakistan Petroleum Limited.

Further, G&G studies and numerous others projects continued in different blocks to evaluate their hydrocarbon potential.

Gravity and Magnetic Survey

The Company's own Gravity & Magnetic Survey Unit completed the survey in Sharan Block, while its processing followed by interpretation is on-going. This is a cost effective method in frontier areas exploration and would help to identify subsurface anomalies.

Significant Development Projects

Significant Projects at Mari Field

Sachal Gas Processing Complex (SGPC)

The Company successfully completed the construction of Sachal Gas Processing Complex

(SGPC) Phase-II facilities to process the low BTU gas from Goru-B reservoir of Mari Gas Field, located in Daharki, Sindh. The phased commissioning and performance testing of the processing facilities is ongoing. After processing, 47.5 MMSCFD of pipeline specification gas is supplied to SNGPL via MPCL's own cross country gas transmission pipeline connecting SGPC to the SNGPL network, while the remaining 2.5 MMSCFD is consumed as fuel gas to operate the plant. The commissioning and performance testing of the remaining facilities continues at a reasonably good pace with an aim to maximize production to contribute towards the indigenous gas supply as well as save precious forex for the Country.

The SGPC project, upon reaching peak production, will save the national exchequer in excess of US\$ 600 million annually through LNG substitution.

The gas from SGPC is being supplied via MPCL's own 20 inch, 25 km long, cross country gas transmission pipeline connecting SGPC to SNGPL's valve assembly (QV-2) at Muhammadpur.

Supply of undrawn HRL Gas Volumes to SNGPL

The Company further enhanced its capacity of processing unutilized volume of HRL reservoir by 8 MMSCFD, which has allowed the Company to inject up to 68 MMSCFD dehydrated gas into national grid through SNGPL network.

Framework Agreement for Pressure Enhancement Facilities (PEF) Project

The Company has executed a Framework Agreement for the installation of Pressure Enhancement Facilities at Mari Field with Fauji Fertilizer Company Limited, Engro Fertilizers Limited and Fatima Fertilizer Company Limited. The PEF project is aimed at maintaining HRL reservoir gas production plateau for gas supplies to the fertilizer plants. The project involves debottlenecking of surface pipeline network and installation of compression facilities in the Mari Field lease area.

Safety and Asset Integrity Improvement Projects

The Company has undertaken two projects, namely Kill Lines Upgrade Project to allow the ability for wells to be shut-in safely in case of any leak and Valves Pits and Cellar Uplift Project to uplift sub-grade valves and cellar assemblies to enhance safety and improve asset integrity. Engineering for both has been completed, and execution activities on Valve Pits and Cellar Uplift project are in progress.

Maintenance & Asset Integrity

Corporate level Asset Integrity Management System (AIMS) framework and procedures have been developed and rolled-out. Multiple R&D pilot projects are undertaken with the objective to employ advanced analytical tools and artificial intelligence. SGPC AIMS Phase-I is completed while Phase-II and III CTRs development is in progress. Multiple initiatives have

been kicked-off including, development of control system manual, ECDA survey of underground pipelines and Risk Based Inspection Study of Mari Field.

Well Integrity Management System (WIMS)

The framework has been developed and the implementation is in progress. Data analysis for defining wells operating envelops has been completed for satellite fields except Mari Field, where it is in progress. Two corrosion logging campaigns were undertaken on older wells and results were found satisfactory.

Significant Projects at other Fields

Early Production from Shewa-1 (previously known as Bannu West-1) Discovery

The Government has approved the Company's request to change the name of the Bannu West Block and it has been renamed as Waziristan Block. Additionally, the name of Bannu West-1 well has been changed to Shewa-1.

Expeditious efforts are underway to bring the Shewa-1 online as early as practicable. The Company is undertaking high level collaboration with SNGPL for pipeline connectivity and with equipment suppliers to establish processing facilities and connectivity with the national grid. Installation and commissioning of gas processing equipment is expected to be completed during the current calendar year, depending on conducive security environment. The Government also approved the Company's request for early production and has also allocated this gas to SNGPL.

Expansion of Exploration Portfolio

Provisional Award of New Exploration Blocks

The Company remained focused on organic growth and added four new exploration blocks in its portfolio via participation in the bid round held in October 2022. These blocks were awarded after competitive bidding on the basis of work units committed by various E&P companies in Pakistan. Details of the awarded blocks are as under:

بلوچتان میں بولان ایسٹ اور زرغون ساؤتھ فیلڈز کی پیداوار ستمبر میں غیر متوقع طوفانی بارشوں اور سیلاب کی وجہ سے تعطل کی شکار رہی۔زرغون فیلڈ میں ایس ایس جی سی کی پائیپ لائن کے انفراسٹر کچر کو نقصان پہنچااور اس کا کچھ حصہ سیلا بی پانی میں بہہ گیا، اس کے علاوہ بولان کے لئے سڑک کارابطہ بھی منقطع ہو گیا تھا۔

کمپنی کی جانب سے ایمر جنسی رسپانس پلان پر بروقت عمل درآمد کی وجہ سے اس قومی سانحہ کے وقت اپنے اہلکاروں اور اثاثوں کی حفاظت کو یقینی بنایا گیا۔ کمپنی نے زرغون فیلڈ کی پیداوار کی جلد سے جلد بحالی کے لئے تباہ شدہ پائپ لائن کی مرمت اور مکمل تبدیلی کے لیے تمام ضروری اقد امات اٹھاتے ہوئے SSGC کو ہر ممکن تعاون اور معاونت فراہم کی۔

دونوں فیلڈزسے پیداوار کی بحالی کے ان تیزترین اقدامات کی وجہ سے بولان ایسٹ سے تیل کی پیداوار اکتوبر 2022 جبکہ زرغون فیلڈ سے گیس کی پیداوار دسمبر 2022 میں بحال کی گئی۔

خیبر پختونخوااور بلوچستان میں سیکیورٹی کی خراب صور تحال کی وجہ سے ایمسپلوریش سر گرمیاں تاخیر کا شکار ہوئیں تاہم کمپنی نے اپنے منصوبوں پر فعال انداز میں عمل در آمد کرتے ہوئے ماری فیلڈ ایریامیں ماری غاز تج – 1 ایمسپلوریٹری ویل کی ڈرلنگ پر کام کو تیز کیا۔ اس ویل کو 42 نومبر ، 2022 کو Spud کیا گیا اور غاز تج فار میشن کے اندر ایک سے زائد لائم سٹون یو نٹس کی ہائیڈروکار بن کی صلاحت کو جانچنے کے لئے 1,015 میٹرز کی گہر ائی تک کامیابی سے ڈرلنگ کی گئی۔ ڈرل اسٹیم ٹیسٹ کے دوران کنویں سے 232Psi کے ویل اپٹر کے ساتھ ریکارڈ ہوئی۔

پوسٹ ایسڈ گیس فلو کی شر 64/64 اپنج چوک پر 434Psi کے ویل ہیڈ فلونگ پریشر پر 8.5MMSCFD تھی۔ویل کو 64/128 تھی۔ویل کو 64/64 اپنج چوک پر مزید ٹیسٹ کیا گیا تا کہ اس کی پیداداری صلاحت کو مستخکم کیا جاسکے؛ ٹیسٹ پیریڈ کے دوران اس نے 292Psi کے ویل ہیڈ فلونگ پریشر کے ساتھ 9.6MMSCFD گیس کا بہاؤر یکارڈ اس کنویں سے نہ صرف اچھی اور معیاری گیس دریافت ہوئی بلکہ موجو دہ ماری فیلڈ میں ایک اضافی ذخیر سے کا اضافہ بھی ہوا۔ اس دریافت کی ایک اور اہمیت یہ بھی ہے کہ اس سے خاص طور پر انفر اسٹر کچرکی ترقی کی بنیاد پر تیل و گیس کی تلاش کے تصور کی نئی راہ ہموار ہوئی ہے۔ یہ بات بھی قابل ذکر ہے کہ غاز تیج سے پہلے 2005 میں SUL/SML/PKL ماری فیلڈ میں دریافت ہونے والے آخری ذخائر تھے۔

کمپنی منصوبہ بندی کر رہی ہے کہ اس ویل میں گیس کی دریافت کی گنجائش کی قدر پیمائی کی جائے اور متوازی طور پر اس کی ترقیاتی حکمت عملی کا جائزہ لیا جائے۔

ہمارے JV پارٹنر زنے دوایس پلوریٹری ویلز سندھاتھل - 1 (کلچاس بلاک) اور شاہ پور آباد - 1 (کوہاٹ بلاک)میں ڈرل کیے، کیکن بعد ازاں ان کو Dry Wells قرار دے دیا گیاہے۔

وويليمنث ويلز

کمپنی نے ماری فیلڈ کے HRL ریزروائر میں اپنا پہلا افقی ویل (Mari-122H) ڈرل کر کے کمیشن کیا تا کہ تیزی ہے کم ہوتے ڈیلیوری پریشر میں معاونت ہو اور پیداواری سطح کو ہر قرار رکھا جائے۔ویل کو تقریبا 530 میٹر کے افقی حصے سمیت 1,550 میٹرز کی گہرائی تک ڈرل کیا گیا تھا۔ ایپڈ اسٹیمولیشن جاب کے بعد کنویں کے ٹیسٹ سے 426psig کے ویل ہیڈ فلو مُنگ پریشر پر گیس کا بہاؤ تقریبا 21MMSCFD تھا۔ یہ ویل کمپنی کے لئے ایک سنگ میل کی حیثیت رکھتاہے کیونکہ اس افقی ویل کی ڈیلیورل ببلٹی حالار میں ڈرل کئے گئے روایتی عمودی ویلز کی نسبت بہت زیادہ ہے۔

مزید افقی ولیز کوڈرل کرنے کے لئے HRLریزروائر میں مزید مکامات کی نشاندہی کرنے کے لئے تکنیکی امور پر کام جاری ہے۔

اس کے علاوہ ایک نئے ڈویلپہنٹ ویل HRL121 کو ڈرل کرنے کے بعد اسے گیس پروڈیو سر کے طور پر مکمل کیا گیا؛ ماری فیلڈ میں MD-15 ویل پرورک اوور کاکام کامیابی سے مکمل کرلیا گیاہے۔
