# **FUTURE OUTLOOK**

- The Company continues to build on the strategic advantage of BFS and Telco verticals in the new geographies. The Company believes that the economic environment is expected to remain stable in MEA and other key geographies during 2023 and the Company can capitalize on the opportunities available in these markets
- The Company has entered into a few multiyear and multiscale deals with renowned banks in the MEA region promising a reasonable revenue trajectory for 2023 and beyond.
- The Company entered APAC region in 2022 with service offerings in line with the market demand. The team
  has successfully closed a couple of good deals and continues to build a healthy sales pipeline. The
  Company has received a positive response from the market and sees an opportunity to grow and scale in
  that market.
- The Company has ventured into the African region last year and continues to get traction, not just in South Africa but also in East and West Africa and has developed a strong pipeline.
- The Company is witnessing slower growth in Europe and the US in the first half of the year, which is expected to improve in the second half.
- The Company made an investment in SAP last year and achieved the first objective of building a solid team and developing solid references in the domestic market by doing multiple implementations and upgrades. The Company has obtained varied levels of experience in all SAP modules. The next goal is to get the business outside of Pakistan using these skilled resources and the references that the Company has cultivated by delivering successful projects in the domestic market. The investment is done and the Company expects a return on investment around the second half of the year.
- The domestic market is going to be challenging this year due to high inflation and lower rates. The
  Company continues to build capability through domestic projects and prepare resources for export
  contracts. However profitability has been challenged as the rupee has depreciated considerably and the
  rates have not been revised. The domestic market profitability is under stress and the Company expects to
  improve this by signing new deals at better margins.
- The Company expects to continue the momentum in the MEA region especially in KSA where the Company sees a healthy pipeline.
- The Company continues to evaluate businesses that are aligned with the strategy, structure and culture of the Company.

# 19. FINANCIAL RISK MANAGEMENT

# 19.1 Financial risk factors

There is no change in the Group's objectives, policies, procedures for measuring and managing the financial risks including capital management risk, since the preceding annual financial year ended 31 December 2022.

#### 19.2 Fair values of financial assets and liabilities

The carrying values of all financial assets and liabilities reflected in financial statements approximate to their fair values. Fair value is determined on the basis of objective evidence at each reporting date. Accordingly, detailed disclosure with reference to fair value has not been given in this condensed interim financial information.

# Fair value hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable either, directly or indirectly

Level 3: techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data

- During the three months period ended 31 March 2023, there were no transfers between Level 1 and Level 2 fair value measurements.
