# **Financial Highlights**

## **Financial Highlights**

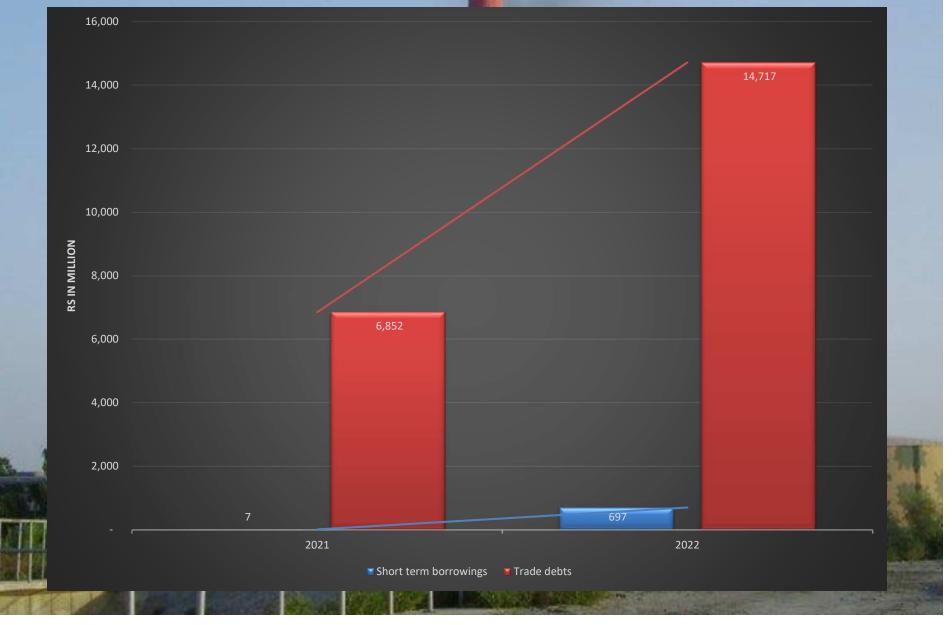

The profit in current year has increased because in comparative year, the Company did not issue Capacity Purchase Price invoices amounting to Rs.2.429 billion started from 05-05-21 to 07-10-21, pursuant to PPA Amendment Agreement with CPPA-G.

# Strategic/Operational Developments

In response to load demanded by CPPA-G, the Pakgen plant operated at capacity factor of 36.7% with a load factor of 78.3% and availability of 95.4% and dispatched 1,123.721 GWh of electricity during the year. Continuous efforts are being made to improve the plant performance and to ensure its long term integrity and maximum availability for its customer CPPA-G.

# Challenges

## Challenges

Our sole customer, CPPA-G remains unable to meet its obligations in accordance with the Power Purchase Agreement (PPA) which are secured under a sovereign guarantee of Government of Pakistan. As on 31 December 2022, an amount of Rupees 14.717 billion was outstanding against CPPA-G.

## **Business Outlook**

 Due to induction of new power generation plants based on hydel energy, coal, renewable and RLNG at a lower price, it is expected that Pakgen will be dispatched in peak demand seasons, in case of interruption in supply of RLNG or in low water months only. This will help Company minimize its fuel losses.
