DIRECTORS' REPORT

We are pleased to present the reviewed financial statements of JS Bank Limited for the half-year ended June 30, 2023.

Economy Review

Economic environment continued to remain challenging. Owing to supply disruptions and passthrough from PKR depreciation, average headline inflation peaked to 33.1% in 1H2023 from 14.4% in the same period last year. Rupee has witnessed a considerable slump in June 2023 as it depreciated 27% vs. December 2022, and 40% year-on-year. External account has been showing some respite primarily owing to 38% YoY decline in trade deficit. Nevertheless, this is mainly the result of economic slowdown as Large-Scale Manufacturing recorded 10% YoY contraction during the first 11 months of FY23 as compared to a growth of 12% during the same period last year.

Owing to a sticky inflation, especially core inflation, Central Bank continued to follow a hawkish monetary policy as it increased the Policy Rate by another 100 bps to 22% in June 2023. Current increase in the Policy Rate has taken cumulative increase to 500bps since December 2022, and 825bps since June 2022.

On a positive note, authorities have secured IMF's Stand-By Arrangement to the tune of USD 3 billion. First tranche of the Arrangement (USD 1.2 billion) was immediately made available while the remaining amount will be released subject to two quarterly reviews ahead. The release of first tranche, coupled with deposits from UAE and Saudi Arabia, saw country's foreign exchange reserves increasing to approximately USD 8.7 billion in July 2023 from USD 4.4 billion at the end of FY23 (June).

Banking Sector Review

Owing to monetary tightening, banking sector's spreads also increased from 6.27% in December 2022 to 7.73% in June 2023. Sector's Deposits were recorded at PKR 25.5 trillion in June 2023 vs PKR 22.5 trillion in December 2022 (up 14%), while Advances were reported at PKR 12.2 trillion in June 2023 against PKR 11.9 trillion in December 2022 (up 2%). Higher growth in Deposits has led to Sector's ADR falling to 48% in June 2023 from 53% in December 2022. Sector's Gross Non-Performing Loans stood at PKR 999.8 billion for 1Q2023 translating into a Gross Infection Ratio of 8.4%.

Performance Review

For the half year ended June 30, 2023, the Bank reported a Profit Before Tax of PKR 3,209 million (Profit After Tax of PKR 1,508 million), as compared to a Profit Before Tax of PKR 971 million (Profit After Tax of PKR 426 million) during the corresponding period last year. During the period, Bank's Net Interest Income increased by 57% YoY primarily owing to improvement in deposit mix. Term Deposits have strategically been reduced by 32% YoY, while Non-Remunerative Deposits increased by 17% YoY resulting in share of Non-Remunerative in Total Deposits increasing to 36% from 30% in the same period last year.

Bank's Non-Markup Income also increased by 63% YoY to PKR 4,012 million with larger impetus coming from foreign exchange income followed by Fee Income and Dividends. On the other

hand, Operating Expense has increased by 30% YoY to PKR 10,155 million owing to a record high inflation during 1H2023 and Rupee depreciation. This increase also includes the impact of higher compensation for junior staff, hiring at Zindigi & Retail Banking, and marketing expenses to create demand for our products. However, despite higher Opex, Bank's cost to income ratio has improved to 70.9% from 87.3% in the corresponding period last year. NII to Operating Cost Ratio has also increased from 83.6% to 101.9% during the period under review. Improvement in both ratios depicts enhanced intermediation efficiency of the Bank.

Considering a precarious economic environment, Bank has been following a cautious lending approach. Gross Advances therefore reduced to PKR 210 billion from PKR 239 billion in December 2022. Non-performing loans have also decreased to PKR 14.0 billion from PKR 16.3 billion in December resulting in Gross Infection Ratio to slightly fall to 6.7% from 6.8% in December 2022. Moreover, Stronger profitability has also allowed the Bank to improve Coverage Ratio to 56.8% as compared to 41.3% in the corresponding period last year. Bank's capital strength has also improved with Capital Adequacy Ratio increasing to 15.42% as compared to 13.26% in December 2022.

The Bank has continued improving the digital infrastructure of legacy bank. Multiple digitization initiatives pertaining to Robotic Process Automation have been rolled out, which will result in bringing cost efficiencies going forward. Bank's digital channels have also witnessed substantial growth as customer penetration on JS Mobile App, JS Bot and JS Blink has increased 35% YoY, 79% YoY and 175% YoY respectively. Digitization of the account opening process has also been rolled out across 91 branches of the Bank, with 100% coverage targeted for 2023. Owing to these improvements, JS Bank was awarded the 'Most Innovative Digital Banking Service Provider' at the International Finance Awards 2023. Moreover, Bank's Roshan Digital Account (RDA) business has also recorded significant growth. Since its inception in 2022, Bank's RDA channel has added 16,000 new-to-bank accounts and attracted USD 19.5 million remittances. Under the Open Banking business, Bank have formulated several collaborations with FINTECHs and Startups, which are expected to enhance our digital footprint and improve Bank's Non-Funded Income going forward.

In its second year of operations, JS Bank's digital banking platform **Zindigi** has solidified its position as a robust contender in mobile banking. Banking transactions worth PKR 66.8 billion (up 44%) were carried out across multiple Zindigi channels including International Remittance, Bill Payments, Mobile Bundles, Ticketing, and investment in Stocks & Mutual Funds. Zindigi's Social Entrepreneurship Program 'Z-Prize', which aims to foster startups selected from 200+ universities, is also progressing well. Recognizing its progress, Zindigi has also been honored with the Best Digital Startup Award at the Pakistan Digital Awards 2023.

Management is responsible for the preparation and presentation of these condensed interim unconsolidated financial statements in accordance with accounting and reporting standards as applicable in Pakistan for interim financial reporting. Our responsibility is to express a conclusion on these condensed interim unconsolidated financial statements based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed interim unconsolidated financial statements are not prepared, in all material respects, in accordance with accounting and reporting standards as applicable in Pakistan for interim financial reporting.

KPMG Taseer Hadi & Co.

35. FAIR VALUE OF FINANCIAL INSTRUMENTS

International Financial Reporting Standard (IFRS) 13, 'Fair Value Measurement' defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of quoted securities other than those classified as held-to-maturity, is based on quoted market price. Quoted securities classified as held-to-maturity are carried at cost. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements. Fair value of unquoted debt securities, fixed term loans, other assets, other liabilities and fixed term deposits cannot be calculated with sufficient reliability due to absence of current and active market for assets and liabilities and reliable data regarding market rates for similar instruments.

In the opinion of the management, the fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since assets and liabilities are either short term in nature or in the case of customer loans and deposits are frequently repriced.

Fair value hierarchy

Item

IFRS 13 requires the Bank to classify fair value measurement using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has following levels:

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: Fair value measurements using unobservable inputs for the asset or liability.

35.1 Valuation techniques used in determination of fair values within level:

	··
Financial instruments - Level 1	
Shares of listed companies	Fair values of investments in listed equity securities are valued on the basis of closing quoted market prices
oriares or listed companies	available at the Pakistan Stock Eychange / Bloomherg

Valuation approach and input used

Financial instruments - Level 2

Mutual fund units	Fair values of investments in mutual fund units are determined based on redemption prices disclosed at the Mutual Funds Association of Pakistan (MUFAP) as at the close of the business days.
Market Treasury Bills (MTB), Pakistan Investment Bonds (PIB) and GoP Sukuks	Fair values of Pakistan Investment Bonds, Market Treasury Bills and GoP Sukuks are derived using PKRV, PKFRV and PKISRV rates.
Debt Securities (TFCs) and Sukuks other than Government	Investments in debt securities (comprising of Term Finance Certificates, Bonds and any other security issued by a company or a corporate body for the purpose of raising funds in the form of redeemable capital) are valued on the basis of the rates announced by the Mutual Funds Association of Pakistan (MUFAP) in accordance with the methodology prescribed by the SECP.
Overseas Government Sukuks, Overseas and Euro Bonds	The fair value of Overseas Government Sukuks, and Overseas & Euro Bonds are valued on the basis of price available on Bloomberg.
Forward foreign exchange contracts	The valuation has been determined by interpolating the foreign exchange revaluation rates announced by the State Bank of Pakistan.
Derivatives	The fair values of derivatives which are not quoted in active markets are determined by using valuation techniques. The valuation techniques take into account the relevant underlying parameters including foreign currencies involved, interest rates, yield curves, volatilities, contracts duration, etc.

Financial instruments - Level 3

Currently, no financial instruments are classified in level 3.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and, unavailability of reliable data regarding market rates for similar instruments.

Non-Financial assets - Level 3

Fixed assets - Land and building	Fixed assets and Non-banking assets under satisfaction of claims are carried at revalued amounts determined by professional valuers based on their assessment of the market values. The valuations are conducted by the valuation experts appointed by the Bank which are also on the panel of State Bank of Pakistan. The valuation experts used a market based approach to arrive at the fair value of the Bank's properties. The market approach used prices and other relevant information generated by market transactions involving identical or comparable
Non-banking assets acquired in	or similar properties. These values are adjusted to reflect the current condition of the properties. The effect of changes in the unobservable inputs used in the valuations cannot be determined with certainty, accordingly a qualitative disclosure of sensitivity has not been presented in these condensed interim unconsolidated financial statements.

- **35.2** The Bank's policy is to recognise transfers into and out of the different fair value hierarchy levels at the date the event or change in circumstances that caused the transfer occurred. There were no transfers between levels 1 and 2 during the period.
- **35.3** The following table provides an analysis of financial assets that are measured subsequent to initial recognition at fair value, grouped into levels 1 to 3 based on the degree to which the fair value is observable.

35. FAIR VALUE OF FINANCIAL INSTRUMENTS

International Financial Reporting Standard (IFRS) 13, 'Fair Value Measurement' defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of quoted securities other than those classified as held-to-maturity, is based on quoted market price. Quoted securities classified as held-to-maturity are carried at cost. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements. Fair value of unquoted debt securities, fixed term loans, other assets, other liabilities and fixed term deposits cannot be calculated with sufficient reliability due to absence of current and active market for assets and liabilities and reliable data regarding market rates for similar instruments.

In the opinion of the management, the fair value of the remaining financial assets and liabilities are not significantly different from their carrying values since assets and liabilities are either short term in nature or in the case of customer loans and deposits are frequently repriced.

Fair value hierarchy

IFRS 13 requires the Bank to classify fair value measurement using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has following levels:

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: Fair value measurements using unobservable inputs for the asset or liability.

35.1 Valuation techniques used in determination of fair values within level:

Item Valuation approach and input used		
Financial instruments - Level 1		
Shares of listed companies	Fair values of investments in listed equity securities are valued on the basis of closing quoted market prices available at the Pakistan Stock Exchange / Bloomberg.	

Financial instruments - Level 2

Mutual fund units	Fair values of investments in mutual fund units are determined based on redemption prices disclosed at the Mutual Funds Association of Pakistan (MUFAP) as at the close of the business days.
Market Treasury Bills (MTB), Pakistan Investment Bonds (PIB) and GoP Sukuks	Fair values of Pakistan Investment Bonds, Market Treasury Bills and GoP Sukuks are derived using PKRV, PKFRV and PKISRV rates.
Debt Securities (TFCs) and Sukuks other than Government	Investments in debt securities (comprising of Term Finance Certificates, Bonds and any other security issued by a company or a corporate body for the purpose of raising funds in the form of redeemable capital) are valued on the basis of the rates announced by the Mutual Funds Association of Pakistan (MUFAP) in accordance with the methodology prescribed by the SECP.
Overseas Government Sukuks, Overseas and Euro Bonds	The fair value of Overseas Government Sukuks, and Overseas & Euro Bonds are valued on the basis of price available on Bloomberg.
Forward foreign exchange contracts	The valuation has been determined by interpolating the foreign exchange revaluation rates announced by the State Bank of Pakistan.
Derivatives	The fair values of derivatives which are not quoted in active markets are determined by using valuation techniques. The valuation techniques take into account the relevant underlying parameters including foreign currencies involved, interest rates, yield curves, volatilities, contracts duration, etc.

Financial instruments - Level 3

Currently, no financial instruments are classified in level 3.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and, unavailability of reliable data regarding market rates for similar instruments.

Non-Financial assets - Level 3

Fixed assets - Land and building	Fixed assets and Non-banking assets under satisfaction of claims are carried at revalued amounts determined by professional valuers based on their assessment of the market values The valuations are conducted by the valuation experts appointed by the Bank which are also on the panel of State Bank of Pakistan. The valuation experts used a market based approach to arrive at the fair value of the Bank's properties. The market approach used prices and other relevant information generated by market transactions involving identical or
Non-banking assets acquired in satisfaction of claims	comparable or similar properties. These values are adjusted to reflect the current condition of the properties. The effect of changes in the unobservable inputs used in the valuations cannot be determined with certainty, accordingly a qualitative disclosure of sensitivity has not been presented in these condensed interim consolidated financial statements.

- **35.2** The Group's policy is to recognise transfers into and out of the different fair value hierarchy levels at the date the event or change in circumstances that caused the transfer occurred. There were no transfers between levels 1 and 2 during the period.
- **35.3** The following table provides an analysis of financial assets that are measured subsequent to initial recognition at fair value, grouped into levels 1 to 3 based on the degree to which the fair value is observable.
