FUTURE OUTLOOK

We have a clear strategy and our focus for the year ahead remains on expanding our position in the textile sector with ongoing investment in textile sector businesses as we continue to build path ways towards future, sustainable and long-term growth and by shifting towards alternate energy source during the year and as a part of this step the Company is in the process of installing solar panels at its premises.. Because of PKR appreciation against U.S Dollar during the year, the textile outlook is expected to remain favorable; however, high energy and fuel prices are creating pressure on textile industry. Moreover, sustained growth requires consistent reforms. An educated Pakistan, energy and water security, alongside permanent improvement in security is critical to economic growth in Pakistan. Management of your company is closely watching the textile current outlook for timely procurement and investment focusing efforts on minimizing cost by enhancing capacity, improving efficiencies to achieve the favorable financial results for forthcoming financial year.

Q & A SESSION
