Dear Investor,

On behalf of the Board of Directors, I am pleased to present Alhamra Islamic Income Fund's accounts review for the period ended March 31, 2025.

#### **Economy Review**

The fiscal year commenced on a strong footing as the government secured a staff-level agreement (SLA) with the IMF for a 37-month Extended Fund Facility (EFF) totaling approximately USD 7.0 billion. Over the course of the period, Pakistan demonstrated fiscal and external discipline, successfully meeting key IMF program targets and benchmarks. Consequently, in March 2025, the IMF team reached an SLA with Pakistani authorities for the first review of the EFF, along with a new 28-month Resilience and Sustainability Facility (RSF), unlocking an additional USD 1.3 billion in funding.

The country posted a current account Surplus of USD 0.7 billion in the first eight months of the fiscal year 2025 (8MFY25) compared to a deficit of USD 1.7bn in the corresponding period last year. The major contributor towards improving current account was the remittances inflows which skyrocketed by 32.5% to USD 24.0bn. Trade Deficit increased by 17.4% YoY as exports rose by 7.2% while imports increased by 11.4% from a low base. The county's external position improved with SBP's foreign exchange reserves increasing to USD 10.7bn as of Mar-25 end compared to USD 9.4bn at the end of last fiscal year. This was on account of current account surplus and flows from IMF and multilateral sources. The local currency remained broadly stable as the USD/PKR depreciated by 0.7% to 280.2 during the period under review.

Headline inflation represented by CPI averaged 5.4% during 9MFY25 compared to 27.2% in the corresponding period last year. This sharp decline was driven by the currency's stability over the past one year, which led to stable food and energy prices. Additionally, the large decline in wheat prices and base effect further contributed to the lower inflation figures.

The country's GDP grew by 1.7% in the second quarter of the financial year 2024-25 as compared to 1.7% in the corresponding period last year. Agriculture grew by 1.1%, Services sector grew by 2.6% while industrial sector witnessed a decline of 0.2%. Historic high interest rates and political uncertainty were the major culprits behind the subdued industrial output. On the fiscal side, FBR tax collections rose by 26.8% in the first nine months of FY25, reaching PKR 8,452 billion—falling short of the target by PKR 716 billion. The shortfall is largely attributed to reduced tax collection from imports due to a slowdown in trade, sluggish growth and low inflation.

#### FUND PERFORMANCE

During the period under review, the fund generated an annualized return of 15.39% as against its benchmark return of 10.74% and old benchmark return of 10.14%.

The allocation of fund was towards GOP Ijara Sukuk and Cash with the exposures standing at 74.3% and 11.3% respectively.

The Net Assets of the Fund as at March 31, 2025 stood at Rs. 26,617 million as compared to Rs. 12,298 million as at June 30, 2024 registering an increase of 116.43%.

The Net Asset Value (NAV) per unit as at March 31, 2025 was Rs. 116.0804 as compared to opening NAV of Rs. 104.0607 per unit as at June 30, 2024 registering an increase of Rs. 15.7101 per unit.

#### Economy & Market - Future Outlook

Pakistan's GDP growth is projected to clock around 2.5% in FY25, similar level compared to 2.5% last year. The industrial and services sectors are expected to expand by 2.5% and 2.8%, respectively, driven by a gradual recovery in demand and the base effect. However, agricultural growth is likely to remain modest at 1.8%, constrained by the high base effect and flood-related damage to the cotton crop.

The continuation of the IMF program is a key positive as it will allow us to tap funding from bilateral and multilateral sources. We expect SBP reserves to increase to USD 12.5-13.0 billion by year end on the back of flows from friendly countries, IMF and multilateral agencies. Pakistan is on track to record the first annual surplus since FY11 on the back of rebound in exports and remittances along with controlled imports. We expect a current account surplus of USD 1.0bn (0.3% of GDP) in FY25 compared to deficit of USD 681mn (0.2% of GDP) in FY24. We are of the view comfort on the external will keep currency relatively stable in the near term. We expect marginal currency depreciation this year with USD/PKR expected to close June 25 around 285.0.

The inflation reading has come down sharply mainly due to base effect and stable currency. The headline inflation number in March 2025 clocked in at 0.7% compared to a high of 38.0% in May 2023. This was the lowest reading since December 1965 (0.58%). The core inflation clocked at 9.0% similar to last month. We expect some uptick in inflation from this low base by the end of fiscal year. We anticipate CPI to average around 5.1% in FY25 compared to 23.4% in FY24.

Since June 2024, the State Bank of Pakistan (SBP) has reduced interest rates by a cumulative 1,000 basis points, bringing the policy rate down from a peak of 22.0% to 12.0%. Recently US

has announced and implemented a series of sweeping tariffs aimed at reducing the U.S. trade deficit and promoting domestic manufacturing which has caused global uncertainty. We expect SBP to closely monitor these evolving dynamics and make policy decisions aimed at balancing macroeconomic stability and growth. Despite weak inflation, Monetary Policy committee may maintain status quo as external account continues to remain uncertain. A sustained weakness in global commodity prices and a positive nudge in external account may open space for easing in the later part of the calendar year.

For debt holders, we expect Money Market Funds to continue to seamlessly mirror policy rates throughout the year.

#### Mutual Fund Industry Review

The Net Assets of the open-end mutual funds industry increased by about 44.5% during 9MFY25 to PKR 3,718bn. Total money market funds grew by about 35.2% since June 2024. Within the money market sphere, conventional funds showed a growth of 44.4% to PKR 909bn while Islamic funds increased by 26.8% to PKR 861bn. In addition, the total fixed Income and Fixed Rate funds increased by about 44.9% since June 2024 to PKR 1,393bn while Equity and related funds increased by 86.4% to PKR 476bn.

In terms of the segment share, Money Market funds were the leader with a share of around 47.6%, followed by Income and fixed return funds with 37.5% and Equity and Equity related funds having a share of 12.8% as at the end of March 2025.

#### Mutual Fund Industry Outlook

Money market funds should benefit from higher liquidity as they are ideal for investors with a short-term horizon and low risk profile. As economic recovery gains further traction and becomes broader based, the interest in capital markets particularly equities will continue to remain strong. Our operations remained seamless and given our competitive edge in digital access and online customer experience, we are prepared to get benefits of the growing number of investors available online.

#### ACKNOWLEDGMENT

The Board is thankful to the Fund's valued investors, the Securities and Exchange Commission of Pakistan and the Trustees of the Fund for their continued cooperation and support. The Directors also appreciate the efforts put in by the management team.

#### 15 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradeable in an open market are revalued at market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### 15.1 Fair value hierarchy

International Financial Reporting Standard IFRS 13 - "Fair Value Measurement" requires the fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: quoted prices in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for the assets or liability that are not based on observable market data (i.e. unobservable inputs).

#### 16 GENERAL

- 16.1 Figures have been rounded off to the nearest thousand Rupees unless otherwise stated.
- 16.2 Certain prior period's figures have been re-arranged / re-classified, wherever necessary, to facilitate comparison in the presentation in the current period. However, there were no material reclassifications to report.
