Review of current years operations and clarification on qualified report.

- During the year, the Company has sanctioned and recovered amounting to Rupees 127.821 (2024: 162.773 million) and Rupees 77.482 respectively against gross investment in lease finance. Gross investment in finance leases as at 30 June 2025 stands at Rupees 510.094 million against Rupees 496.854 million on June 30, 2024, while the net investment stands at Rupees 442.616 million on 30 June 2025 against Rupees 419.328 million of the last year. The gross revenue from operations is Rupees 24.404 million against Rupees 30.515 million in 2024. The profit before and after tax for the current year is Rupees 6.042 million and Rupees 5.546 million as compared to profit before and after tax of preceding year which was Rupees 14.774 million and Rupees 7.762 million respectively. Decrease in interest rate during the current year resulted in decrease in the profitability of the company from last year, however the Shareholders' equity has increase from 71.153 million to 76.583 million.
- In their report to the Members, Auditors have stated that allowance for potential lease losses is made in these financial statements in accordance with the criteria for clarification and provisioning provided in Schedule X to the Non-Banking Finance Companies and Notified Entities Regulations, 2008. The provision against lease receivables should be made at higher of the amount determined in accordance with the Expected Credit Loss (ECL) Model of IRFS 9 and Schedule X to the Non-Banking Finance Companies and Notified Entities Regulations, 2008. Currently, the management is working on development of ECL model as per IFRS 9 so that allowance for potential lease losses could be calculated at higher of the amount determined in accordance with the Expected Credit Loss (ECL) Model of IRFS 9 and Schedule X to the Non-Banking Finance Companies and Notified Entities Regulations, 2008. It is pertinent to mention here that among the current running leases there is not even a single lease which is in overdue, while the bad portfolio (classified) has already been provided 100% therefore applicability of IRFS-9 will have no financial impact on current year's financial statements. However, we are still looking for a cheaper solution for development of ECL model, keeping in view the financial health of Company.

Future outlook.

- Since the KIBOR rate has been reduced from 22% (June 2024) to 11–12%, which is making financing including auto-leasing more attractive. With government policy allowing import of used cars (with duties) gradually easing, there's potential for growth in leasing/financing of used vehicles, though risk will be higher. Secondly restriction on banking sector of not to disburse more than 3 million in case of vehicles, will also help in generating the demand of leasing in the sector. However, hurdles like limited awareness among SMEs / general consumers about NBFC sector and narrower geographic presence of leasing companies has always been a challenge for the sector.

THANK YOU
