in order to achieve their illicit goals. That time and again certain front-man have been deployed to maliciously acquire shares of TSPL through cross trades and / or issue such unwarranted disclosures in order to create chaos, artificially tamper with the stock prices and diminish confidence of the stakeholders in TSPL. It has been observed that malevolent market practices have been undertaken by the perpetrators whereby, the shares as acquired by the initial acquirer are the same shares that have been internally transferred through fictitious trades between the associated companies including Crescent Star Insurance Ltd., and Weavers Pakistan (Pvt) Ltd., and by all purported acquirers acting in concert with each other who have been believed to be involved in the illegal activities.

4. The maliciously motivated persons, acting in concert with one another have resorted to vehemently illegal tactics / practices, including;

- i. **Pumping and Dumping of Shares:** The acquirers have engaged in activities aimed at artificially inflating the price of the Company's shares, including the dissemination of misleading or false information, in violation of market conduct regulations.

- iv. **Member-to-Member Financing:** The record of sale and purchase of TSPL shares clearly depicts a pattern of member-to-member financing arrangements that appear to facilitate the acquisition of shares in contravention of and by circumventing market regulations.
- v. **Margin Pricing:** It has been observed that the Acquirers and their masters have engaged in margin trading activities and price-setting strategies that create an artificial market for the Company's shares. Margin pricing, as implemented by the Acquirers, aims to manipulate the price of shares and unduly influence market conditions to facilitate the hostile takeover. Such tactics are prohibited under market conduct regulations and represent a form of price manipulation.
- vi. **Artificial Selling and Speculation:** The Acquirers have been involved in artificial selling and speculative trading designed to destabilize the Company's share price. These activities aim to create panic in the market and encourage other investors

to sell their shares under duress, thereby benefiting the Acquirer's takeover strategy at the expense of other shareholders. By creating an environment conducive to the hostile takeover through varying the stock prices to be in their own favor.
