Dear Sir,

Re: Gambat South GPF-II Capacity and Production Enhancement

We are pleased to announce enhancement in gas processing capacity at the Gambat South Gas Processing Facility (GPF-II), located in Gambat South Block, Sanghar district of Sindh Province. The Company is the operator of the Gambat South Block with 65% working interest, along with joint venture partners Government Holdings (Private) Limited (GHPL) and Asia Resources Oil Limited (AROL) with 25% and 10% working interests respectively.

The GPF-II Plant, originally commissioned in 2016 with a design capacity of 50 MMscfd of raw gas containing 26% CO₂, was previously optimized during 2021–22 to handle 55 MMscfd of raw gas through operational improvements. As part of Company's continuous process optimization and feed enhancement initiatives, the facility has now successfully increased its processing capacity to 60 MMscfd of raw gas.

This milestone has been achieved through Amine sweetening process optimization by introducing a proprietary additive to the existing MDEA solvent system — accomplished without any hardware modification. As a result, the enhancement has translated into an incremental production gain of approximately 5 MMscfd of gas, 35 barrels per day of condensate, and 1 metric ton of LPG, reflecting Company's commitment to operational excellence and resource maximization.

This achievement is a result of continuous production enhancement efforts to maximize domestic hydrocarbon output from existing fields in a cost-effective manner. The above milestone has been realized with bare minimum cost, underscoring Company's focus on efficiency, innovation, and value creation for its stakeholders.

The foregoing information is submitted in compliance with Section 96 of the Securities Act, 2015 and Clause 5.6.1 of the Pakistan Stock Exchange Limited Regulations, for dissemination amongst your members.

Yours truly,

Ali Jaffar
Company Secretary
