

Dost Steels Limited – Corporate Update

Dost Steels Limited (DSL) is pleased to inform its shareholders and the market that, as part of its strategic realignment, the Company will be expanding its operations to include the trading and supply of construction materials in addition to its existing principal line of business of manufacturing steel re-rolling products.

DSL has initiated an arrangement under which it will act as a primary source of construction materials for ZKB, one of Pakistan's largest infrastructure development groups. This initiative will provide a stable and recurring demand pipeline and will allow DSL to participate directly in the supply chain of major nationwide infrastructure projects executed by ZKB.

This strategic expansion is aligned with DSL's future growth plans and will operate alongside the Company's ongoing manufacturing activities.

The Company remains committed to enhancing shareholder value through operational expansion, improved business integration, and long-term sustainable growth.
