# ESG AT TPL REIT FUND I

The Fund's strategic direction is firmly anchored in Environmental, Social, and Governance (ESG) principles. Working closely with various consultants, the Fund has designed and implemented an Environmental and Social Management System (ESMS) that spans its entire project portfolio. This system focuses on enhancing labor conditions, safeguarding the environment, and strengthening governance practices.

## OUR COMMITMENT TO UNSDGs

The Fund has strategically incorporated key United Nations Sustainable Development Goals (UNSDGs) into its vision and long-term strategy. This integration strengthens social responsibility, enhances reputation, opens new market opportunities, mitigates risks, fosters innovation, and generates sustainable long-term value.

As part of this commitment, we developed the Mangrove Biodiversity Park in collaboration with the Sindh Forest Department (SFD), supporting UNSDG 15: Life on Land, while contributing to climate change mitigation. This initiative raises awareness about the importance of mangroves in Korangi Creek, engages local communities through livelihood opportunities, and promotes sustainable practices.

Moreover, the Mangrove, the mixed-use residential tower exemplifies our commitment to sustainable urban development. This project integrates environmentally conscious design, green spaces, and community centric amenities, further promoting ecological preservation while delivering modern, high-quality living spaces.

Additionally, the development of One Hoshang, Pakistan's first ultra-luxury residential tower, demonstrates our dedication to heritage preservation. The project restores the 130-year-old façade of the Homie Katrak Chambers and incorporates a world-class museum that celebrates its historical significance.

# DIRECTORS' REPORT

The Board of Directors of TPL REIT Management Company Limited is pleased to present its report together with Financial Statements of TPL REIT Fund I (the Fund) for the quarter ended September 30, 2025.

## ECONOMIC REVIEW

Pakistan's GDP growth for FY25 has been revised upward from 2.68% to 3.04%, as per the 114th National Accounts Committee Meeting. For FY26, State Bank of Pakistan (SBP) has projected growth in the range of 3.25%-4.25%. The Large-Scale Manufacturing (LSM) Index has shown a growth of 4.44% YoY during Jul-Aug FY26. The main contributors to the overall growth have included Automobiles, Food, Tobacco, Garments, cement, electrical equipment and others. Due to the recent floods and torrential rains, the agriculture sector output is likely to come under stress in FY26. Headline inflation increased to 5.6% during Sep'2025 from 3.0% in Aug'2025, averaging 4.2% for Q1'FY26.

The current account deficit for Q1'FY26 was reported at USD 594 Million during Q1'FY26 compared to USD 502Mn during corresponding period last year. Exports rose by 7% to USD 7.9Bn, while imports grew 8% to USD 15.4Bn, resulting in a trade deficit of USD 7.5Bn. Workers' remittances increased by 8% YOY to USD 9.5Bn.

Fiscal consolidation efforts under the IMF program have been effective with fiscal account deficit standing at 5.4% of GDP in FY25, outperforming the target of 5.6%. The primary balance showed a surplus of 2.4% of GDP, being the highest surplus recorded in over two decades. However, with flood-related losses estimated at PKR 650Bn as per the Rapid Need Assessment (RNA) conducted across four provinces, fiscal performance could come under pressure if flood relief and reconstruction expenditure are not managed within program support allowances. In this regard, IMF and Government of Pakistan (GOP) are working on adjusting the fiscal targets for FY26.

The Pakistan Stock Exchange (KSE-100 Index) continued its upward trajectory, closing at 165,493 points as at 30th September 2026, reflecting a 32% gain during Jul-Sept FY26, driven by perceived stability in the macroeconomic situation. In the latest Monetary Policy Committee (MPC) meeting held in September 2025, SBP kept the policy rate unchanged at 11%.

## REAL ESTATE MARKET REVIEW

In the Budget FY26, the Government has introduced some incentives to support growth and formalization of the Real Estate sector, these include reduction in withholding tax on property purchase, withdrawing FED of 3-7% imposed in FY25, while tax credits have been reintroduced for house loans.

Going forward, prices are expected to show increase with the improvements in economic environment. The construction industry is poised to show recovery given the decline in inflation and interest rates. The average steel prices saw a decline from ~PKR 247,000/Ton in FY25 to ~PKR 240,000/Ton in 1QFY26, while cement prices largely remained range bound in between PKR 1300-1400/ 50KG Bag during 1QFY26.

5.2.1 This represents land parcel of 40 acres commercial property situated at Korangi Creek, Karachi. As of 30 June 2025, MYK Associates the independent valuer of the Fund determined the fair value of the development property at Rs. 29,855 million (30 June 2024: Rs. 28,675 million).

The valuation has been conducted in accordance with the International Valuation Standards (IVS), employing the residual value approach which is a hybrid of the market approach, the income approach and the cost approach that all comes under IFRS 13. This is based on the completed "gross development value" and the deduction of development costs and the developer's return to arrive at the residual value of the development property.

Residual value approach is applicable to determine the fair value of the development property as it indicates the residual amount after deducting all known or anticipated costs required to complete the development from the anticipated value of the project when completed after consideration of the risks associated with the completion of the project.

The fair value measurement for the development property has been categorised within Level 3 of the fair value hierarchy based on the inputs to the valuation technique used.

The significant unobservable inputs used in the valuation are:

- Estimated cost of construction
- Other contingencies
- Developer profit margin

Other valuation methods were not considered, as they are not applicable to the current state of the property. The market approach requires comparable properties, the cost approach is suitable for completed properties, and the income capitalisation approach is applicable to income-generating properties. Since the property is currently under development, neither fully constructed nor generating income, these methods were deemed inappropriate for valuation.

### Sensitivity Analysis

Any significant movement in the assumption used for the valuation of development property such as estimated cost of construction, other contingencies and developers profit margin would result in a significantly lower/higher fair value of the asset.

### Fair Value Hierarchy

The development property under construction is classified within Level 3 of the fair value hierarchy because it is valued using significant unobservable inputs. The residual approach is applied, but significant adjustments are made according to condition, characteristic and location, which are not directly observable in the market.

5.4.1 This represents land located in an Open Industrial Plot No. 25-B, measuring 10,002 square yards, situated at Sector 30, Korangi Industrial Area, Karachi. As of 30 June 2024, Savills Pakistan (Private) Limited, the independent valuer of the Fund determined the fair value of the property at Rs. 2,505.19 million. The valuation was carried out on the basis of present market values for similar properties in the vicinity of the land and replacement values of similar types of land based on the present cost, and adjustments are applied on such similar properties based on reasonable qualitative and quantitative factors to determine the valuation of the investment property. The valuation has been conducted in accordance with the International Valuation Standards (IVS), employing the market approach as outlined under IFRS 13 to determine the property's value.

The other valuation methods were not considered as they are not applicable to the current state of the property. The valuation under Cost Approach requires a completed property, while the Income Capitalisation Approach is suitable for income-generating properties. Since the property is currently under development and neither fully constructed nor generating income, these methods were deemed inappropriate for this valuation.

The significant unobservable inputs used in the valuation are:

- Market price per square yard for comparable properties
- Discount for size

Other adjustments:

- Discount for access, visibility, and location
- Discount for the irregularity in shape
- Discount for the uneven surface
- Discount for cleaner land titles
- Discount for availability for sale

### Fair Value Hierarchy

During the prior year, the investment property was classified within Level 3 of the fair value hierarchy because it is valued using significant unobservable inputs. The market approach is applied, but significant adjustments are made according to condition and location, which are not directly observable in the market.

5.4.2 These investments have been made in shariah compliant companies.

### 21 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

IFRS 13, 'Fair Value Measurements' requires the Fund to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

## 2 BASIS OF PREPARATION

### 2.1 Statement of compliance

These consolidated financial statements of the Fund for the year ended 30 June 2025 have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards as applicable in Pakistan comprise of:

- International Financial Reporting Standards (IFRSs) issued by International Accounting Standards Board (IASB) as are notified under the Companies Act, 2017;

## NOTES TO AND FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2025

### 2.4 Use of judgements and estimates

In preparing these condensed interim financial statements, management has made judgements and estimates that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates. The significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those described in the annual audited financial statements for the year ended 30 June 2025.

### 3 Basis of Consolidation

#### 3.1 Subsidiaries

Subsidiaries are the Companies controlled by the Group. The Group controls the Companies when it is exposed to, or has rights to, variable returns from its involvement with the Companies and has the ability to affect those returns through its power to direct the activities of the Companies. The financial statements of subsidiaries are included in these consolidated financial statements from the date on which control is transferred to the Group until the date when control is lost. The financial statements of the subsidiaries have been consolidated on a line-by-line basis and all intra-group balances and transactions have been eliminated.

#### 3.2 Non-controlling interest (NCI)

NCI are measured at their proportionate share of the acquiree's identifiable net assets at the date of acquisition. Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as transactions with equity owners of the Group.

##### 3.1.3 Loss of control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any resulting gain or loss is recognised in the consolidated statement of profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

##### 3.1.4 Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated. Unrealised gains arising from transactions with associates are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

### 4. SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES, JUDGMENTS AND RISK MANAGEMENT POLICIES

The accounting policies adopted and the methods of computation of balances used in the preparation of these consolidated condensed interim financial statements are the same as those applied in the preparation of the consolidated financial statements of the Group for the year ended June 30, 2025.

## NOTES TO AND FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2025

### 26 FAIR VALUES OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Group is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

IFRS 13, 'Fair Value Measurements' requires the Group to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).
