Subject: Disclosure of Material Information - Commissioning of automatic ampule washing machine

Dear Sir / Madam,

In accordance with Clause 5.6.1(a) of PSX Regulations and Section 96 of the Securities Act, 2015, we hereby inform you of the following material information.

Liven Pharma Limited has successfully commissioned a new Automatic Ampule Washing Machine at its manufacturing facility. The machine is now fully operational and has been integrated into the company's existing production line. The commissioning of this automated equipment is expected to result in an approximate 20-25% increase in production efficiency, primarily through faster processing, enhanced consistency standards in the ampoule preparation process. The installation of the Automatic Ampule Washing Machine is also anticipated to reduce manual intervention, minimize rejection rates, and improve overall operational reliability, thereby supporting higher throughput and better compliance with quality standards. This development constitutes a material change in the company's manufacturing / operational capacity, which may materially affect the company's future production volume, operational performance, and potentially investor expectations and share trading dynamics.

You may please inform the TRE Certificate Holders of the Exchange accordingly.

Yours sincerely,

For and on behalf of
Liven Pharma Limited

Company Secretary
