### The Managing Director

Pakistan Stock Exchange Limited  
Stock Exchange Road, Karachi

### **Subject: Disclosure of Material/Price Sensitive Information**

Dear Sir,

In accordance with Section 96 of the Securities Act, 2015 and Clause 5.6.1 (a) of the PSX Regulations, we hereby convey the following information:

### **Allocation and pricing of gas from Mari Field to Fertilizer Plants**

We are pleased to inform you that the Government has approved allocation of gas from Ghazij / Shawal discoveries in Mari field located in Daharki, District Ghotki, Sindh to the following fertilizer plants:

S. No	Fertilizer Plants	Raw gas allocation (MMscfd)	Processed gas supply (MMscfd)
1	FFC (Port Qasim), Karachi	104	80
2	Fatimafert. (Sheikhupura)	68	52
3	Agritech (Daud Khel)	50	38

The raw gas will be delivered to the respective fertilizer customers within Mari gas field (delivery point). The gas price at delivery point shall be equal to the applicable wellhead price as notified by OGRA from time to time. The respective fertilizer customers shall enter into bilateral gas sale and purchase agreements with MariEnergies.

The customers shall install gas processing and compression facilities for injection of processed gas in Sui companies' network. Accordingly, the customers shall also enter into third party access arrangements with Sui companies for transportation of gas to their respective plant sites under Third Party Access (TPA) Rules, 2018 and the Pakistan Gas Network Code. In case of supply of gas to FFC(PQ), SNGPL and SSGC shall also make gas swap arrangements.

In addition, MariEnergies may supply any available volumes from the above reservoirs to any of its customers, including SNGPL/SSGCL, as swing gas on an as-and-when-available basis. In case of natural depletion of the HRL gas reservoir supplying fertilizer plants, MariEnergies may backfill the depleted volumes of its existing consumers from the Ghazij/Shawal reservoir.

The Government also approved the de-allocation of 110 MMscfd gas from HRL reservoir in Mari field previously allocated to GENCO-II. Further, current allocation of 26 MMscfd to Engro Fertilizer base plant from HRL reservoir has been enhanced to 105 MMscfd.

**Mari Energies Limited**

Additionally, the earlier allocation of up to 110 MMCFD gas to SNGPL from Mari Deep, which expired in June 2024, has also been regularized and reallocated to SNGPL.

You may disseminate this information to the TRE certificate holders of the Exchange, accordingly.

For and on behalf of Mari Energies Limited

**Brig Sumair Ashraf Sheikh (Retd.)**

Company Secretary
