**Subject: Appraisal of Existing Discovery of Hydrocarbons in TAL Block at Bilitang-1 (ST-1) Exploratory Well , Khyber Pakhtunkhwa Province Pakistan**

Dear Sir,

We are pleased to announce that the TAL Joint Venture comprising Oil & Gas Development Company Limited (OGDCL) (30% working interest), MOL Pakistan Oil & Gas Co, B.V. (the Operator) (10%), Pakistan Petroleum Limited (PPL) (30%), Pakistan Oilfields Limited (POL) (25%) and Government Holdings Private Limited (GHPL) (5%) have appraised the existing discovered gas and condensate ( in traces) from Lumshiwai Formation in the Bilitang-1- ST-1 Exploratory well, located in district Kohat, Khyber Pakhtunkhwa Province.

The Well was spudded-in on August 10, 2025 and was sidetracked to chase better reservoir quality and has been successfully drilled down to 4004 mTVD. Based on interpretation of LWD/Wireline logs data, **Lumshiwai formation was tested successfully at rate of around 26.5 Million Standard Cubic Feet per day (MMscfd) gas** at 32/64" choke, against wellhead flowing pressure (WHFP) 4214 Pounds per Square Inch (Psi).

This appraisal of existing discovery has de-risked further exploration play in TAL Block, leading to new upside opportunities. The said discovery will also help & contribute towards improving energy security of the country from indigenous resources and add to the hydrocarbon reserves base of MOL, its Joint Venture Partners and the Country.

The above information is being submitted in compliance with Section 96 of the Securities Act, 2015 and Clause 5.6.1(a) of the PSX Regulations for dissemination among your members.

Yours Sincerely,

(Wasim Ahmad)  
Company Secretary
