Subject: **OGDCL Brings Bobi Deep-1 into Production on Fast-Track Basis**

Dear Sir,

Referring to our earlier disclosure dated June 03, 2026 regarding the oil discovery at Bobi Deep-1 from the Massive Sand of the Lower Goru Formation, Oil & Gas Development Company Limited (OGDCL) is pleased to announce another significant milestone marked by the successful commencement of production from the well.

Located in Bobi and Dhamraki Mining Lease, District Sanghar, Sindh, Bobi Deep-1 is currently producing 2,000 Barrels of Oil Per Day (BOPD). For accelerated monetization of discoveries, OGDCL successfully completed the laying of a 4-inch, 1.5 km flowline from the well site to Bobi Plant within a short span, enabling early production from the discovery.

As Operator with 100% working interest in Bobi and Dhamraki Mining Lease, OGDCL continues to advance hydrocarbon resource monetization through indigenous capabilities. The commencement of production from Bobi Deep-1 will support domestic energy supplies and reduce reliance on imports.

The above information is submitted in compliance with Section 96 of the Securities Act, 2015 and Clause 5.6.1(a) of the PSX Regulations, for dissemination amongst your members.

Yours Sincerely,

(Wasim Ahmad)
Company Secretary
