Forward-looking statements: this presentation contains forward-looking statements reflecting management's current views and are not guarantees of future performance. The Company undertakes no obligation to update these statements.

SECTION 01

Company overview

- Incorporated as a private limited company in July 1997; listed on the Pakistan Stock Exchange since November 2008.
- A subsidiary of The Searle Company Limited, under the ultimate ownership of International Brands (Private) Limited.
- Engaged in the marketing and distribution of healthcare, nutrition and medical device products — not in-house manufacturing.
- An ~85% imported portfolio gives the business meaningful FX and commodity-cost exposure, managed through pricing and sourcing discipline.

FY2026 AT A GLANCE

A year of strategic refocus

The Company sharpened its focus onto two core verticals — Nutrition and Medical & Surgical Disposables (MSD) — and discontinued portfolios that no longer fit that direction.

PKR 4.61b	PKR 1.64b	PKR 401m	PKR 220m
▲ 7%	▲ 14% · margin 36%	▲ 6%	▲ 6% · EPS Rs 2.24

FY2026's headline growth is at the Company level absorbs the cost of exiting discontinued portfolios. The next slide unpacks the much stronger performance of our continuing business.

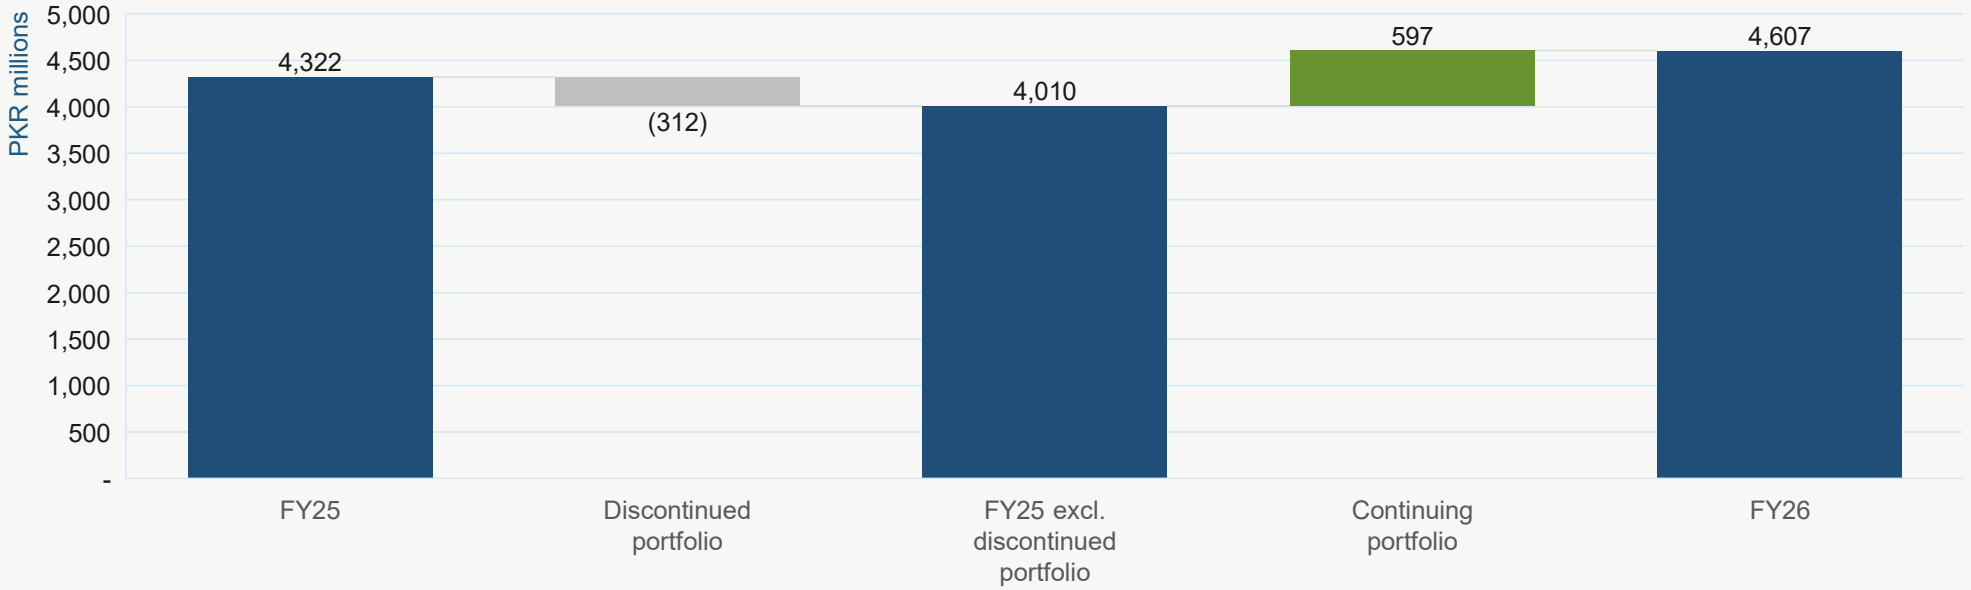

SECTION 02

Revenue by business line

Major product line (PKR m)	FY2025	FY2026
Nutrition	1,655	**1,696**

Total revenue	**4,322**	**4,607**

SECTION 02

Revenue growth, powered by our core business

Consolidated revenue grew 7% — but that number blends a **15% revenue increase** in our continuing Nutrition and MSD business against the planned wind-down of portfolios that no longer fit our strategy.

SECTION 02

Two verticals, sharper focus

SECTION 02

Investing in marketing to fuel Nutrition growth

Marketing and distribution expenses

+17%

PKR 1,006m in FY26, up from PKR 858m in FY25

Gross profit

+14%

PKR 1,645m in FY26 (35.7% margin), vs PKR 1,447m in FY25 (33.5%)

- Total marketing & distribution expense rose 17% to PKR 1,006m, deliberately ahead of revenue growth, as the Company invested behind brand-building and market development for the Nutrition portfolio.
- Gross margin still expanded to 35.7% (FY25: 33.5%) on better product mix, calibrated pricing and tighter trade-terms governance — giving room to invest without eroding underlying profitability.
- This is a forward-looking investment: the continuing benefit of FY26's marketing spend is expected to build growth momentum through FY27 and beyond.

SECTION 02

FY26 tax position: a profitability-driven improvement

Minimum tax regime (levy) — eliminated by higher profitability

Nil

Driven by stronger profitability: FY26's margin recovery pushed normal tax liability above the minimum-tax floor, eliminating the Section 148 levy that cost PKR 36.9m in FY25.

Levy as % of pre-levy profit (FY25 → FY26)

9.8% → 0%

This tracks profitability, not policy: the levy hit hardest in FY2024 (pretax margin of just 3.0%) and returned in FY2025; FY27 is expected to stay nil as long as margins hold near FY2026 levels.

One-off prior-year super tax (TY2022)

PKR 19.6m

Recognized following the Federal Constitutional Court's judgment of January 27, 2026, under Section 4C of the Income Tax Ordinance, 2001

Added to reported PAT margin

+0.4pp

Absent this one-off charge, FY26 PAT margin of 4.8% would have been about 0.4 percentage points higher
