# Performance Scorecard

- Company remains committed to deliver on its long-term objective of sustainable growth and value creation. This is being achieved through continued focus on operational excellence, product portfolio diversification, cost reduction and a strong capital structure.
- Company's net turnover during the period under review remained Rs.1,302,943,379/- (2021: 1,087,044,667) showing increase of 20%, although during the period input costs remained high as the rupee weakened further against the US Dollar along with rise in Interest rates, energy and commodity prices.

## Future Outlook

Pakistan's economy is now facing various challenges with expected slowdown of economic growth in near future. The foremost challenges include Rupee devaluation, Cotton crop damage due to recent floods coupled with sharp rise in energy/commodity prices, high inflation and higher rates of borrowing in the country. The recent resumption of the IMF program has boosted prospects and guaranteed that external financing needs will be comfortably met. This, together with expected private and official inflows should continue to keep Pakistan's external position relatively stable. Accordingly, there is a need to strike an appropriate balance between supporting the economy, ensuring debt sustainability, and advancing structural reforms while maintaining social cohesion. Company believes that the fundamental attributes of business operations – sustainability and leadership – have attained more relevance than ever before. This was achieved on the back of the Company's ability to deliver efficient and accessible mobility solutions to the present and future generations
