Directors' Review

For the first quarter ended 31 March 2023

The Directors are pleased to present their review report for the first quarter ended 31 March 2023 together with the un-audited condensed interim financial information of the Company as at and for the first quarter ended 31 March 2023.

BUSINESS OVERVIEW

The current state of the economy is worrisome as it is facing multiple challenges such as low foreign reserves, a weakening currency, and soaring inflation. Moreover, the CAD (Current Account Deficit) has narrowed more than previously expected, primarily due to significant import curtailment measures. Although progress has been made towards completing the 9th review under the IMF's EFF program, recent strains in the global banking system have further tightened global liquidity and financial conditions. Dwindling foreign reserves, import restrictions, flood impacts, high fuel costs, policy uncertainty, and the slowdown in domestic and global demand have affected industry and service sector activity in the Country.

The year commenced with Crude Oil (WTI) prices rebounding due to an optimistic demand outlook from OPEC and the International Energy Agency (IEA) amidst Chinese economic recovery. Prices were also supported by elevated consumption on account of holiday mobility in the U.S. and Europe. However, the remainder of the quarter saw bearishness in prices as intractable inflation led to further increments in interest rates which raised concerns of global economic deceleration. Furthermore, supply remained ample as indicated by consecutive inventory builds in the U.S, while Russian production also remained more resilient than expected despite various sanctions. The Crude Oil prices plummeted towards the quarter-end following the default of two western banks exacerbating recession concerns which may reduce fuel demand. Nevertheless, the prices eventually stabilized due to prompt and effective interventions by the governments to avoid a contagion. The average price for the quarter was US\$ 76.34 per barrel, down by 8.3% from the previous quarter.

Paraxylene (PX) prices exhibited bullishness at the start of the quarter in-line with the Crude Oil market, however, as the quarter progressed, the PX market maintained the uptrend in contrast to the upstream Oil prices. Uptick in demand ahead of the Lunar New Year Holiday coinciding with removal of COVID-19 restrictions in mainland China ignited the market sentiment, boosting prices for prompt supply. However, as the quarter progressed, demand from downstream PTA market declined as lack of recovery in the downstream polyester sector resulted in weak market fundamentals. Plant shutdowns in the region as well as diversion of feedstock to produce gasoline blends kept spot PX availability tight, elevating the PX-Naphtha spread to above US\$ 400 per tonne mark. The average PX price for the quarter was US\$ 1,033.64 per metric tonne while the PX-Naptha spread averaged at US\$ 344 per tonne.

The PTA prices tracked the movement of the upstream PX prices but were unable to match the gains as polyester demand failed to recover to seasonal high levels due to depressed consumerism and poor export-related demand. Additionally, inventory pressure, and inability to pass down costs to downstream buyers resulted in PTA-PX spread to remain below US\$ 100 per tonne for most of quarter, thereby forcing producers to rationalize operations. However, the PTA prices rallied towards the end of the quarter following the price hike in the feedstock PX market, spurt in polyester demand due to peak summer season, and unexpected shutdowns, thereby supporting the PTA-PX spread. The average PTA price for the quarter was US\$ 775.14 per metric tonne, whereas the average PTA margin over PX for the quarter was US\$ 93 per metric tonne.

The domestic polyester market operated at the rate of 63% during the first quarter of 2023. Producers were forced to curtail operations due to reduced availability of major Raw Material PTA through domestic as well as imported supply due to operational constraints caused by limited availability of Foreign Exchange for establishing Letter of Credits. However, demand remained relatively resilient as the market geared up for the peak season demand ahead of the holy month of Ramadan.

OPERATIONS

Due to the current economic situation prevalent in the country in relation to the foreign exchange reserves and its impact on the ability of banks to open letter of credit for import of raw materials, the Company had to temporarily suspend its Plant operations for 17 days in March 2023.

As a result, Production volume during the quarter at 82,874 tonnes was 25% lower than the corresponding period last year while Sales volume, comprising of domestic sales only, at 91,372 tonnes was 18% lower than the corresponding quarter last year.

Directors' Review

For the first quarter ended 31 March 2023

FINANCIAL PERFORMANCE

Despite the economic instability in the Country, the Management made all the efforts for continuation of plant operations and to minimize the impact on the business performance.

Revenue for the quarter was 9% higher than the corresponding period last year mainly due to higher PTA price. This coupled with lower non-PX conversion cost resulted in a gross profit of Rs 4,439 million for the quarter as compared to gross profit of Rs 4,010 million during the same period last year.

Distribution and selling expenses were 5% lower than Q1 2022 while Administrative and general expenses were 21% higher than the corresponding period last year due to overall impact of inflation. The taxation charge for the quarter is based on statutory income tax rate and tax under Final Tax Regime (FTR) as adjusted by the movement in the deferred tax account. The taxation charge is higher due to imposition of Super tax at the rate of 4% for Tax year 2023.

Earnings per share (EPS) for the quarter stood at Rs 1.68 per share as compared to Rs 1.73 per share for Q1 2022.

POST BALANCE SHEET EVENT

The Board of Directors in its meeting held on 13 April 2023 has approved an interim cash dividend of Rs 2 per share for the year ending 31 December 2023.

FUTURE OUTLOOK

Moving forward, Crude Oil (WTI) prices are expected to trend upwards as IEA and OPEC have forecasted a notable surge in demand going forward in 2023, mostly driven by boost in economic activity in China. Furthermore, the recent supply disruption of Iraqi Crude from the Kurdistan region following a legal dispute, and the proposed supply cut by OPEC+ of around 1.66 million barrels per day is likely to drive the price higher. However, threat of potential recession is anticipated to weigh on the market sentiment.

Paraxylene (PX) prices are likely to trend upwards in the next quarter supported by increased demand against the start up of new downstream PTA capacities as well as the diversion of product into gasoline blends ahead of the driving season in the West. Furthermore, upcoming scheduled maintenance shutdowns may cause the market to tighten.

PTA market is expected to pick-up due to the improved seasonal demand for the downstream polymer chain which may support PTA prices. However, new PTA capacities coming online in the next quarter may undermine the price trend. Nonetheless, recessionary concerns will continue to play a crucial role in determining the price direction.

The domestic Polyester market is expected to continue its struggle in such turbulent economic times. Depressed consumerism due to unprecedented inflation and the uncertain economic situation of the country going forward poses a threat to domestic industrial operations in the entire chain. However, the market may find intermittent strength on the back of peak season demand as well as the optimistic view of a global demand recovery.

1.3 The Company is a subsidiary of Lotte Chemical Corporation, South Korea ("LCC Korea") and its ultimate parent company is South Korean Conglomerate Lotte.

2. BASIS OF PREPARATION

2.1 Statement of compliance

These condensed interim financial statements of the Company for the three months period ended 31 March 2023 have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan for interim financial reporting. The accounting and reporting standards as applicable in Pakistan for interim financial reporting comprise of:

- International Accounting Standard (IAS) 34, Interim Financial Reporting, issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017; and
- Provisions of and directives issued under the Companies Act, 2017.

Where the provisions of and directives issued under the Companies Act, 2017 differ with the requirements of IAS 34 or IFAS, the provisions of and directives issued under the Companies Act, 2017 have been followed.

2.1.1 These condensed interim financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the financial statements of the Company for the year ended 31 December 2022. However, selected explanatory notes are included to explain events and transactions that are significant to understanding of changes in Company's financial position and performance since the last annual financial statements.

2.2 Basis of measurement

These condensed interim financial statements have been prepared under the historical cost convention except for retirement benefit obligations and lease liability, which have been measured at present value.

2.3 Functional and presentation currency

The condensed interim financial statements are presented in Pak Rupee which is also the functional currency of the Company and rounded off to the nearest thousand, unless otherwise stated.

3. ACCOUNTING POLICIES, ESTIMATES, JUDGEMENTS AND FINANCIAL RISK MANAGEMENT

The accounting policies and the methods of computation adopted in the preparation of these condensed interim financial statements are the same as those applied in the preparation of the annual audited financial statements for the year ended 31 December 2022.

Notes to the Condensed Interim Financial Statements (Un-audited)

For the first quarter ended 31 March 2023

Amounts in Rs '000

The preparation of these condensed interim financial statements, in conformity with accounting and reporting standards as applicable in Pakistan requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectation of future events that are believed to be reasonable under the circumstances. Actual results may differ from the estimates. During the preparation of these condensed interim financial statements, the significant judgements made by management in applying the Company's accounting policies and the key sources of estimation and assumptions are consistent with those that were applied to the annual audited financial statements of the Company for the year ended 31 December 2022.

The Company's financial risk management objectives and policies are consistent with those disclosed in the annual audited financial statements for the year ended 31 December 2022.

23 FAIR VALUE OF FINANCIAL INSTRUMENTS

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Inputs for the asset or liability that are not based on observable market data (i.e., unobservable inputs).

23.1 Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy for financial instruments measured at fair value. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.
