Responsibilities of Management and Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

KPMG Taseer Hadi & Co.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the board of directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the board of directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

KPMG Taseer Hadi & Co.

5 New or Amendments / Interpretations to Existing Standards,

There are new and amended standards and interpretations that are mandatory for accounting periods beginning 1 July 2023 that are considered not to be relevant or do not have any significant effect on the Company's financial statements and are therefore not stated in these financial statements.

5.1 Standards, amendments and improvements to the approved accounting standards that are not yet effective

The following International Financial Reporting Standards (IFRS Standards) as notified under the Companies Act, 2017 and the amendments and interpretations thereto will be effective for accounting periods beginning on or after 1 July 2023:

- Classification of liabilities as current or non-current (Amendments to IAS 1 in January 2020) apply retrospectively for the annual periods beginning on or after 1 January 2024 (as deferred vide amendments to IAS 1 in October 2022) with earlier application permitted. These amendments in the standards have been added to further clarify when a liability is classified as current. Convertible debt may need to be reclassified as 'current'. The standard also amends the aspect of classification of liability as non-current by requiring the assessment of the entity's right at the end of the reporting period to defer the settlement of liability for at least twelve months after the reporting period. An entity's expectation and discretion at the reporting date to refinance or to reschedule payments on a long-term basis are no longer relevant for the classification of a liability as current or non-current. An entity shall apply those amendments retrospectively in accordance with IAS 8.
- Non-current Liabilities with Covenants (amendment to IAS 1 in October 2022) aims to improve the information an entity provides when its right to defer settlement of a liability for at least twelve months is subject to compliance with conditions. The amendment is also intended to address concerns about classifying such a liability as current or non-current. Only covenants with which a company must comply on or before the reporting date affect the classification of a liability as current or non-current. Covenants with which the company must comply after the reporting date (i.e. future covenants) do not affect a liability's classification at that date. However, when non-current liabilities are subject to future covenants, companies will now need to disclose information to help users understand the risk that those liabilities could become repayable within 12 months after the reporting date. The amendments apply retrospectively for annual reporting periods beginning on or after 1 January 2024, with earlier application permitted. These amendments also specify the transition requirements for companies that may have early-adopted the previously issued but not yet effective 2020 amendments to IAS 1 (as referred above).
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2) – the Board has issued amendments on the application of materiality to disclosure of accounting policies and to help companies provide useful accounting policy disclosures. The key amendments to IAS 1 include:
 - requiring companies to disclose their material accounting policies rather than their significant accounting policies;
 - clarifying that accounting policies related to immaterial transactions, other events or conditions are themselves immaterial and as such need not be disclosed; and

Notes to the Financial Statements

For the year ended June 30, 2023

- clarifying that not all accounting policies that relate to material transactions, other events or conditions are themselves material to a company's financial statements.
- The Board also amended IFRS Practice Statement 2 to include guidance and two additional examples on the application of materiality to accounting policy disclosures. The amendments are effective for annual reporting periods beginning on or after 1 January 2023 with earlier application permitted.
- Definition of Accounting Estimates (Amendments to IAS 8) introduce a new definition for accounting estimates clarifying that they are monetary amounts in the financial statements that are subject to measurement uncertainty. The amendments also clarify the relationship between accounting policies and accounting estimates by specifying that an entity develops an accounting estimate to achieve the objective set out by an accounting policy. The amendments are effective for periods beginning on or after 1 January 2023, with earlier application permitted, and will apply prospectively to changes in accounting estimates and changes in accounting policies occurring on or after the beginning of the first annual reporting period in which the company applies the amendments.
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12) narrow the scope of the initial recognition exemption (IRE) so that it does not apply to transactions that give rise to equal and offsetting temporary differences. As a result, companies will need to recognize a deferred tax asset and a deferred tax liability for temporary differences arising on initial recognition of a lease and a decommissioning provision. For leases and decommissioning liabilities, the associated deferred tax asset and liabilities will need to be recognized from the beginning of the earliest comparative period presented, with any cumulative effect recognized as an adjustment to retained earnings or other components of equity at that date. The amendments are effective for annual reporting periods beginning on or after 1 January 2023 with earlier application permitted.
- Lease Liability in a Sale and Leaseback (amendment to IFRS 16 in September 2022) adds subsequent measurement requirements for sale and leaseback transactions that satisfy the requirements to be accounted for as a sale. The amendment confirms that on initial recognition, the seller-lessee includes variable lease payments when it measures a lease liability arising from a sale-and-leaseback transaction. After initial recognition, the seller-lessee applies the general requirements for subsequent accounting of the lease liability such that it recognizes no gain or loss relating to the right of use it retains. A seller-lessee may adopt different approaches that satisfy the new requirements on subsequent measurement. The amendments are effective for annual reporting periods beginning on or after 1 January 2024 with earlier application permitted. Under IAS 8, a seller-lessee will need to apply the amendments retrospectively to sale-and-leaseback transactions entered into or after the date of initial application of IFRS 16 and will need to identify and re-examine sale-and-leaseback transactions entered into since implementation of IFRS 16 in 2019, and potentially restate those that included variable lease payments. If an entity (a seller-lessee) applies the amendments arising from Lease Liability in a Sale and Leaseback for an earlier period, the entity shall disclose that fact.
- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28) – The amendment amends accounting treatment on loss of control of business or assets. The amendments also introduce new accounting for less frequent transaction that involves neither cost nor full step-up of certain retained interests in assets that are not businesses. The effective date for these changes has been deferred indefinitely until the completion of a broader review.

Notes to the Financial Statements

For the year ended June 30, 2023

- Supplier Finance Arrangements (amendments to IAS 7 and IFRS 7) introduce two new disclosure objectives for a company to provide information about its supplier finance arrangements that would enable users (investors) to assess the effects of these arrangements on the company's liabilities and cash flows, and the company's exposure to liquidity risk. Under the amendments, companies also need to disclose the type and effect of non-cash changes in the carrying amounts of the financial liabilities that are part of a supplier finance arrangement. The amendments also add supplier finance arrangements as an example to the existing disclosure requirements in IFRS 7 on factors a company might consider when providing specific quantitative liquidity risk disclosures about its financial liabilities. The amendments are effective for periods beginning on or after 1 January 2024, with early application permitted. However, some relief from providing certain information in the year of initial application is available.
- International Tax Reform – Pillar Two Model Rules (amendments to IAS 12) introduce following new disclosure requirements:
 - Once tax law is enacted but before top-up tax is effective:

Disclose information that is known or can be reasonably estimated and that helps users of its financial statements to understand its exposure to Pillar Two income taxes at the reporting date. If information is not known or cannot be reasonably estimated at the reporting date, then a company discloses a statement to that effect and information about its progress in assessing the Pillar Two exposure.
 - After top-up tax is effective: disclose current tax expense related to top-up tax.

6 SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of financial statements in conformity with approved accounting standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgments in the process of applying the Company's accounting policies. Estimates and judgments are continually evaluated and are based on historic experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

In the process of applying the Company's accounting policies, management has made the following estimates and judgments which are significant to these financial statements:

- (a) determining the impairment, residual values, revaluation of land, useful lives, method of depreciation of property, plant and equipment and intangible assets (notes 7.1, 9.1 & 10.1);
- (b) provision for expected credit loss of certain financial assets (note 7.10 & 13);
- (c) recognition of staff retirement benefits (note 7.9 & 24);
- (d) recognition of taxation and deferred tax (notes 7.6, 16 & 23);
- (e) estimation of net realizable value of stock in trade (note 7.4 & 12);
- (f) contingencies (note 7.20 & 29.1).
- (g) leases (note 7.18 & 22).
- (h) provisions (note 7.15)

7 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

7.1 Property, plant and equipment

Operating fixed assets are stated at cost less accumulated depreciation and accumulated impairment losses, if any, except for leasehold land, which is stated at revalued amounts less accumulated impairment losses, if any.

Depreciation is charged to statement of profit or loss using the reducing balance method at the rates specified in note 9 to the financial statements. Depreciation on additions are charged from the month the assets are available for use while no depreciation is charged for the month in which the asset is derecognized.

Maintenance and normal repairs are charged to statement of profit or loss as and when incurred. Major renewals and improvements are capitalized and the assets so replaced, if any, are retired.

Assets residual values, useful lives and method of depreciation are reviewed and adjusted prospectively, if appropriate at each reporting date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

An item of operating fixed assets is derecognized upon disposal or when no future economic benefit are expected to arise from continued use of asset. Gain or losses on disposal or retirement of an asset represent the difference between the sale proceed and the carrying amount is charged to statement of profit or loss.

Capital work-in progress

Capital work-in progress is stated at cost less impairment in value, if any. It consists of expenditure incurred and advances made in respect of fixed assets in the course of their erection, acquisition and installation. The assets are transferred to relevant category of operating fixed assets or intangible assets when they are available for use.

7.2 Surplus on revaluation of property, plant and equipment

Property, plant and equipment are measured at fair value less accumulated depreciation and accumulated impairment losses recognised after the date of revaluation. Valuations are performed with sufficient frequency to ensure that the carrying amount of a revalued asset does not differ materially from its fair value.

A revaluation surplus is recorded in OCI and credited to the surplus on revaluation of property, plant and equipment in equity. However, to the extent that it reverses a revaluation deficit of the same asset previously recognised in profit or loss, the increase is recognised in the statement of profit or loss. A revaluation deficit is recognised in the statement of profit or loss, except to the extent that it offsets an existing surplus on the same asset recognised in the surplus on revaluation of property, plant and equipment.

Upon disposal, any revaluation surplus relating to the particular asset being sold is transferred to retained earnings.

Notes to the Financial Statements

For the year ended June 30, 2023

7.3 Intangible assets

Intangible assets are measured on initial recognition at cost. Costs that are directly associated with identifiable software products controlled by the Company and have probable economic benefit beyond one year are recognized as intangible assets. Subsequent to initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any.

Amortization on additions is charged from the month in which the assets are put to use while no amortization is charged in the month in which the assets are disposed off.

Assets residual values, useful lives and method of amortization are reviewed and adjusted prospectively, if appropriate at each reporting date.

7.4 Stock-in-trade

These are valued at the lower of net realizable value (NRV) or cost of the stock-in-trade which is determined using weighted average cost method.

Weighted average cost in relation to work in process and finished goods constitute average manufacturing cost including direct material, labour and proportionate share of related direct overheads.

NRV signifies the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Items in transit are valued at cost comprising invoice value plus other charges incurred thereon up to the reporting date.

Scraps are valued at estimated realisable value.

7.5 Stores and Spares

These are valued at weighted average cost except for items in transit which are stated at invoice value plus other charges incurred thereon till the reporting date. Provision for obsolete and slow moving stores, spare parts and loose tools is determined based on management's estimate regarding their future usability.

7.6 Taxation

Income tax expense comprises current and deferred tax. Income tax expense is recognized in the statement of profit or loss account, except to the extent that it relates to items recognized directly in the other comprehensive income or in equity, in which case it is recognized in the other comprehensive income or equity respectively.

Current

Provision for current taxation is based on taxability of certain income streams under final tax regime at the applicable tax rates and remaining income streams chargeable at current rate of taxation under the normal tax regime after taking into account tax credits and tax rebates available, if any. Provision of current tax is determined using the tax rate enacted at the reporting date.

Notes to the Financial Statements

For the year ended June 30, 2023

Deferred

Deferred tax is recognized using the balance sheet liability method, providing for temporary difference between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax recognized is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities using the tax rates enacted or substantively enacted at the reporting date.

The Company recognizes a deferred tax asset to the extent that it is probable that taxable profits in the foreseeable future will be available against which the assets can be utilized. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

7.7 Cash and cash equivalents

These are carried at cost. Cash and cash equivalents comprise of cash in hand and current and deposit accounts held with banks, which are subject to insignificant risk of change.

7.8 Impairment of non-financial assets

The carrying amounts of non-financial assets other than inventories and deferred tax asset are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. The recoverable amount of an asset or cash-generating unit is the greater of its value-in-use and its fair value less costs to sell. In assessing value-in-use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets ("the cash-generating unit, or CGU").

The Company's corporate assets do not generate separate cash inflows. If there is an indication that a corporate asset may be impaired, then the recoverable amount is determined for the CGU to which the corporate asset belongs. An impairment loss is recognized if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognized in statement of profit or loss.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

7.9 Staff retirement benefits

Defined benefit plan - staff gratuity scheme

The Company operates a defined benefit gratuity scheme for management and non-management staff which are unfunded. The gratuity plans are final salary plans. The contributions to the unfunded gratuity scheme are made in accordance with the independent actuarial valuation. The Company recognizes expense in accordance with IAS 19 "Employee Benefits".

Notes to the Financial Statements

For the year ended June 30, 2023

An actuarial valuation of defined benefit scheme is conducted every year. The valuation uses the Projected Unit Credit method. Actuarial gains and losses are recognized in full in the period in which they occur in other comprehensive income.

All past service costs are recognized at the earlier of when the amendment or curtailment occurs and when the Company has recognized related restructuring or termination benefits.

7.10 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

7.10.1 Financial assets

a) Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade debts are measured at the transaction price determined under IFRS 15.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- i) Financial assets at amortised cost (debt instruments);
- ii) Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments);
- iii) Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments); and
- iv) Financial assets at fair value through profit or loss.

Notes to the Financial Statements

For the year ended June 30, 2023

i) Financial assets at amortised cost (debt instruments)

The Company measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in the statement of profit or loss when the asset is derecognised, modified or impaired.

ii) Financial assets designated at fair value through OCI (debt instruments)

The Company measures debt instruments at fair value through OCI if both of the following conditions are met:

- The financial asset is held within a business model with the objective of both holding to collect contractual cash flows and selling; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt instruments at fair value through OCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in the statement of profit or loss and computed in the same manner as for financial assets measured at amortised cost. The remaining fair value changes are recognised in other comprehensive income. Upon derecognition, the cumulative fair value change recognised in OCI is recycled to statement of profit or loss.

The Company does not have any debt instruments at fair value through OCI investments during the current and last year and as of reporting date.

iii) Financial assets designated at fair value through OCI (equity instruments)

Upon initial recognition, the Company can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under IAS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to statement of profit or loss. Dividends are recognised as other income in the statement of profit or loss when the right of payment has been established, except when the Company benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in other comprehensive income. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

The Company does not have any equity instruments at fair value through OCI investments during the current and last year and as of reporting date.

Notes to the Financial Statements

For the year ended June 30, 2023

iv) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortised cost or at fair value through OCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

c) Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Company's statement of financial position) when:

- The rights to receive cash flows from the asset have expired; or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership.

When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Notes to the Financial Statements

For the year ended June 30, 2023

d) Impairment of financial assets

The Company recognises an allowance for expected credit losses for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For trade debts and other receivables, the Company applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

7.10.2 Financial liabilities

a) Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include long term financing, short term borrowings, due to related parties, accrued mark-up and trade and other payables.

i) Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Gains or losses on liabilities held for trading are recognised in the statement of profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Company has not designated any financial liability as at fair value through profit or loss.

ii) Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss.

Notes to the Financial Statements

For the year ended June 30, 2023

b) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

7.10.3 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

7.11 Short Term Investment

Investments in Pakistan Term Deposit Receipts are classified at amortized cost and are initially measured at fair value. Transaction costs directly attributable to the acquisition are included in the carrying amount.

7.12 Trade Debts

These are classified at amortized cost and are initially recognised when they are originated and measured at fair value of consideration receivable. These assets are written off when there is no reasonable expectation of recovery. Actual credit loss experience over past years is used to base the calculation of expected credit loss.

7.13 Trade and other payables

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

7.14 Revenue recognition

The Company is in the business of manufacturing packing products. The revenue is recognized on delivery of the products to the customers. The Company has generally concluded that it is the principal in its revenue arrangements because it typically controls the goods or services before transferring them to the customer.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the rendering of services, the Company considers the effects of variable consideration, the existence of significant financing components, non cash consideration, and consideration payable to the customer (if any).

Notes to the Financial Statements

For the year ended June 30, 2023

Performance obligations

Information about the Company's performance obligations are summarized below:

The performance obligation is satisfied when the product is delivered to the customer.

Interest on bank deposits are recognized on effective interest rate basis.

Miscellaneous income, if any, is recognised on an accrual basis.

Contract liabilities

A contract liability is recognised if a payment is received or a payment is due (whichever is earlier) from a customer before the Company transfers the related goods or services. Contract liabilities are recognised as revenue when the Company satisfies the performance obligation under the contract (i.e., transfers control of the related goods to the customer).

7.15 Provisions

Provisions are recognized when the Company has present legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of obligation. The amount recognized as a provision reflects the best estimate of the expenditure required to settle the present obligation at the end of reporting date. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

7.16 Foreign currency transactions

Transactions in foreign currencies are accounted for in Pakistani Rupees at the rates prevailing on the date of transaction. Monetary assets and liabilities in foreign currencies are reported using the exchange rate as of the reporting date, except where forward exchange purchases have been made for payment of liabilities, in that case the contracted rates are applied. Exchange gains and losses on transactions are included in statement of profit or loss in the year in which it occurs.

7.17 Dividends

Dividend distribution to the Company's shareholders is recognized as a liability in the period in which the dividends are declared / approved. However, if these are approved after the reporting period but before the financial statement are authorized for issue, disclosure is made in the financial statements.

7.18 Leases

The Company assess at contract inception whether a contract is, or contains a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Company acts as a lessee and applies a single recognition and measurement approach for all the leases except for short-term leases of 12 months or less and leases of low value assets (if any). The Company recognises lease liability to make lease payments and right-of-use assets (ROU assets) representing the right to use the underlying assets.

Notes to the Financial Statements

For the year ended June 30, 2023

i) Right-of-use assets (ROU assets)

The Company recognises ROU assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). ROU assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of ROU assets includes the amount of lease liabilities recognised, initial direct costs incurred (if any), and lease payments made at or before the commencement date less lease incentives received (if any). Unless the Company is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised ROU assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. ROU assets are subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option (if any) reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses the incremental borrowing rate at the lease commencement date. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Company has the option, under its lease arrangements to lease the assets for additional terms.

The Company applies judgement in evaluating whether it is reasonably certain to exercise the option to renew. That is, it considers all relevant factors that create an economic incentive for it to exercise the renewal. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise (or not to exercise) the option to renew (e.g., a change in business strategy). Any change is accounted for change in estimate and applied prospectively with corresponding change in ROU assets and lease liabilities.

iii) Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases of assets (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of assets that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Notes to the Financial Statements

For the year ended June 30, 2023

7.19 Earnings per share

The Company presents basic and diluted earnings per share (EPS) for the shareholders. Basic EPS is calculated by dividing the profit after tax attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year.

Diluted EPS is calculated by adjusting basic EPS by the weighted average number of ordinary shares that would be issued on conversion of all dilutive potential ordinary shares into ordinary shares and post-tax effect of changes in profit or loss attributable to ordinary shareholders of the Company that would result from conversion of all dilutive potential ordinary shares into ordinary shares.

7.20 Contingent liabilities

A contingent liabilities is disclosed when the Company has a possible obligation as a result of past events, whose existence will be confirmed only by the occurrence or non-occurrence, at one or more uncertain future events not wholly within the control of the Company; or the Company has a present legal or constructive obligation that arises from past events, but it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation, or the amount of the obligation can not be measured with sufficient reliability.

24.8 Description of the risks to the Company

The defined benefit plan exposes the Company to the following risks:

Mortality risks – The risk that the actual mortality experience is different. The effect depends on the beneficiaries' service/age distribution and the benefit.

Final salary risks – The risk that the final salary at the time of cessation of service is greater than what was assumed. Since the benefit is calculated on the final salary, the benefit amount increases similarly.

Withdrawal risks – The risk of higher or lower withdrawal experience than assumed. The final effect could go either way depending on the beneficiaries' service/age distribution and the benefit.

29 CONTINGENCIES AND COMMITMENTS

29.1 Contingencies

29.1.1 In the year 2017, sales tax audit for the tax year 2012-2014 of the Company was selected and an order was passed by the Deputy Commissioner Inland Revenue dated October 23, 2017 for a demand of Rs. 3,897,611/- against the Company. An appeal against the above order has been filed before the Commissioner Inland Revenue - Appeals II by the Company and during the year, the Commissioner Inland Revenue Authority (CIRA) has set aside the issues pertaining to sales tax amounting to Rs. 766,794/- and forward the same for further examination to Deputy Commissioner Inland Revenue.

Since then, no sales tax demand stands payable as of today unless re-examined / reassessed by the DCIR as per the direction of CIRA. Therefore, company based on advice of its tax consultants has not made any provision in these financial statements.

29.1.2 In August 2015, Sui Southern Gas Company (SSGC) increased rates of natural gas on the basis of notification dated 31 August 2015 issued by Oil and Gas Regulatory Authority (OGRA) whereby prices for natural gas for industrial sector have increased from Rs. 488 to Rs. 600 per MMBTU whereas those for the captive power sector have been increased from Rs. 573 to Rs. 600 per MMBTU and the Company falls in the category of captive power. The Company challenged the OGRA notification and filed writ petition in the HCS in Suit No. 2419 of 2015. Thereafter, HCS vide its order dated May 18, 2016, decided the case in Company's favor and concluded that the OGRA notification lacks the sanctity of law and it cannot be validated in terms of Section 7 and 8 of the Oil and Gas Regulatory Authority Ordinance 2002. SSGC filed an appeal in the HCS which was dismissed on August 15, 2017. Subsequently, SSGC has taken the matter to the Supreme Court of Pakistan and filed petition to appeal against the order dated August 15, 2017.

Notes to the Financial Statements

For the year ended June 30, 2023

Further, OGRA in suppression of its Notification No. SRO 876(1)2015 dated August 31, 2015 notified the sale price and minimum charges, in respect of natural gas to industrial customers with effect from December 15, 2016 being flat rate of Rs.600 per MMBTU. The Company challenged the impugned notification dated December 30, 2016 before the HCS. HCS has passed ad-interim orders dated January 20, 2017 suggesting stay on the rates aforementioned, while ordering plaintiffs to deposit the differential amount in terms of impugned notification as security till further orders. Accordingly, the Company has deposited the security to Nazir of High Court as disclosed in note 15 to financial statements.

However, due to the inherent uncertainties involved in the matter, the management based on the opinion of their legal advisor, has not accounted for increase in tariff rate amounting to Rs. 8.33 million as of 30 June 2018 as the management is confident that the decision of the case will be in their favor.

29.1.3 The Deputy Commissioner Inland Revenue had passed an order under Section 11 of Sales Tax Act, 1990. An appeal against the above order has been filed before the Commissioner Inland Revenue - Appeals II (CIRA) by the Company and an order was passed by the CIRA dated August 31, 2022 wherein tax demand of Rs.21,344,007/- had been upheld and remaining tax demand of Rs.291,477,683 has been remanded back by CIRA with specific directions. The company had filed an appeal before the Appellate Tribunal Inland Revenue (ATIR) against the demand upheld in aforesaid order of the CIRA. Main hearing of the appeal has been heard by the Appellate Tribunal Inland Revenue (ATIR) and the case has been reserved for order.

The concerned Deputy Commissioner Inland Revenue had initiated the remand back proceeding and confirmed the demand as established earlier without following the direction of the CIRA through its Order-in-Original No.14/2022-2023 dated 24 June 2023. The company also filed an appeal before CIRA against aforesaid remand back order which has been heard by CIRA and the case has been reserved for order.

On the basis of factual and legal position in above pending appeals with the Commissioner Inland Revenue - Appeals II (CIRA) and the Appellate Tribunal Inland Revenue (ATIR), our tax consultant's anticipate a favorable outcome of such appeals in favor of the company. Therefore, company based on aforesaid position has not made any provision in these financial statements.

29.1.4 The Deputy Commissioner Inland Revenue had issued demand of penalty of Rs.8,503,141/- and default surcharge of Rs.1,305,330. An appeal against the above order has been filed before the Commissioner Inland Revenue - Appeals II (CIRA) by the Company and an order was passed by the Commissioner Inland Revenue - Appeals II (CIRA) dated April 11, 2023 decided the appeal against such order and deleted the demand. The department had filed an appeal before the Appellate Tribunal Inland Revenue (ATIR) against appellate order of Commissioner Inland Revenue - Appeals II. The hearing against aforesaid appeal has not been fixed by the Appellate Tribunal Inland Revenue as yet. Therefore, company based on advice of its tax consultants has not made any provision in these financial statements.

29.1.5 Income Tax Returns upto Tax Year 2022, corresponding to Financial Year ended upto June 30, 2022 have been submitted, which are construed as deemed assessment orders under Section 120 of the Income Tax Ordinance, 2001 [the Ordinance].

29.1.6 Tax Year 2016; Income Tax Audit has been selected by the Commissioner Inland Revenue under Section 214C read with Section 177 in terms of Clause 72B, Part IV, Second Schedule to the Ordinance. However, no final Show Cause Notice has been served on the Company till 30 June 2023 and has now been barred by time in terms of Section 122 read with Section 174 of the Ordinance.

Notes to the Financial Statements

For the year ended June 30, 2023

29.1.7 Tax Year 2020, 2021 and 2022; The Income Tax Assessment under Section 120 of the Ordinance is subject to amendment in terms of Section 122(5A) and a show cause notice has been issued under Section 122(9) of the Ordinance. The company has submitted legal response to the notice, however, a reply on the rebuttal is awaited from him. The company is gathering the desired information to comply with the above Notice.

29.1.8 Tax Year 2022; The Notice for the payment of super tax of Rs.15,897,889/- is issued by the Deputy Commissioner-IR to the company who identified the computational error therein. As a result of such error, the super tax worked out to Rs. 7,766,794/- which the company requested him to adjust from the tax refunds for the Tax Year 2022. Hence, no super tax is stand payable and no provision is required to be made in the Financial Statements.

29.1.9 MACPAC filed a Constitutional petition No. 3407 of 2014 before the High Court of Sindh to restrain the Federal Government from coercing MACPAC to transfer 5% of its profits to the Workers' Profit Participation Fund. The High Court of Sindh granted an ad interim order in favour of MACPAC, which is still in operation. The petition is still pending before the High Court of Sindh and MACPAC has a reasonable probability of success in this petition.

29.1.10 MACPAC filed a Suit No. 798 of 2016 before the High Court of Sindh and impugned the insertion of Tariff Heading 9830.0000 in the Second Schedule to the Sindh Sales Tax on Services Act, 2011 through the Finance Act, 2013 and subsequent show cause notice dated 03.12.2015 issued by the Sindh Revenue Board on the basis of this tariff heading and said heading reads "Services provided in the matter of manufacturing or processing for others on toll basis. The High Court of Sindh granted an ad interim order in favour of MACPAC, which is still in operation. The suit is still pending before the High Court of Sindh and MACPAC has a reasonable probability of success in this suit.

42 FINANCIAL INSTRUMENTS			
FINANCIAL RISK MANAGEMENT			
<p>The main risks arising from the Company's financial instruments are market risks, credit risk and liquidity risk. The Board of Directors of the Company has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company has exposure to the following risks from its use of financial instruments.</p>			

Notes to the Financial Statements

For the year ended June 30, 2023

42.1 Credit risk

Credit risk is the risk which arises with the possibility that one party to a financial instrument will fail to discharge its obligation and cause the other party to incur a financial loss. The Company attempts to control credit risk by monitoring credit exposures, limiting transactions with specific counterparties and continually assessing the creditworthiness of counterparties.

Concentrations of credit risk arise when a number of counter parties are engaged in similar business activities or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations of credit risk indicate the relative sensitivity of the Company's performance to developments affecting a particular industry.

The maximum exposure to credit risk at the reporting date is:

	Note	2023 (Rupees)	2022
Long-term deposits	11	12,776,285	20,026,285
Trade debts	13	860,411,242	654,943,026

		<u>1,458,052,408</u>	<u>885,544,130</u>

Quality of financial assets

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings or the historical information about counterparty default rates as shown below:

Bank balances		
A1+ (PACRA)	76,671,865	32,242,718

A-2 (JCR VIS)	4,228	4,228
	<u>262,311,364</u>	<u>78,408,779</u>

42.2 Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rate and foreign exchange rates. The objective of market risk management is to manage and control market risk exposures with an acceptable range.

Notes to the Financial Statements

For the year ended June 30, 2023

(i) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk in respect of Company's short-term financing arrangements at floating interest rates to meet its business operations and working capital requirements.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, on the Company's profit before tax (through impact on floating rate borrowings). This analysis excludes the impact of movement in market variables on non-financial assets and liabilities of the Company. Further, interest rate sensitivity does not have a symmetric impact on the Company's result.

		Increase / decrease in basis points	Effect on loss before tax (Rupees)

	-	100	<u>(3,028,022)</u>
30-Jun-22	+	100	5,757,521
	-	100	<u>(5,757,521)</u>

(ii) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign currency exchange rates primarily relates to the Company's operating activities. The Company manages its currency risk by effective fund management and timely repayment of its current liabilities. The Company, however, has not hedged its foreign currency liabilities as the management has assessed that it will not be cost beneficial.

The Company's exposure to foreign currency risk in major currencies at their gross values is as follows:

	2023 (US Dollar)	2022
Creditors	<u>2,231,553</u>	<u>2,551,198</u>
	(EURO)	
Creditors	<u>287,889</u>	<u>221,634</u>

Following is the demonstration of the sensitivity to a reasonably possible change in exchange rate of all currencies applied to assets and liabilities as at 30 June 2023 represented in foreign currencies, with all other variables held constant, of the Company's loss before tax.

Notes to the Financial Statements

For the year ended June 30, 2023

	Change in exchange rate (%)	Effect on loss before tax (Rupees)
30-Jun-23	+10%	72,829,229

30-Jun-22	+10%	56,938,592
	-10%	(56,938,592)

(iii) Other price risk

Other price risk is the risk that the fair value of future cash flows of the financial instruments will fluctuate because of changes in market prices such as equity price risk. Equity price risk is the risk arising from uncertainties about future values of investment securities. As at the reporting date, the Company is not exposed to other price risk as the Company does not have any investment in equity shares.

42.3 Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulties in meeting obligations associated with financial liabilities. Prudent liquidity risk management implies maintaining sufficient cash, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The management believes that it will be able to fulfill its financial obligations.

Table below summarizes the maturity profile of the Company's financial liabilities based on contractual undiscounted payments. Balances due within 12 months equals to their carrying balances as the impact of discounting is not significant:

43 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability; or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefit by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Notes to the Financial Statements

For the year ended June 30, 2023

Level 1: Quoted market price

Level 2: Valuation techniques (market observable); and

Level 3: Valuation techniques (non-market observables)

As of reporting date, the Company has no financial assets carried at fair value other than as disclosed in note 9.2 to these financial statements.

44 CAPITAL RISK MANAGEMENT

The Company's objective when managing capital is to safeguard the Company's ability to remain as a going concern and continue to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The Company monitors capital using a debt equity ratio, which is net debt divided by total capital plus net debt. Equity comprises of share capital and reserves. The gearing ratio as at 30 June 2023 and 30 June 2022 are as follows:

کل منافع:

رواں سال کمپنی کا مجموعی منافع 1,311.5 ملین روپے رہا جبکہ گذشتہ سال 610.8 ملین روپے تھا جو کہ 114.7 فیصد کا اضافہ ہے۔

خالص منافع:

زیر جائزہ سال کیلئے قبل از ٹیکس منافع (پی بی ٹی) 700.7 ملین روپے ہے جو کہ گذشتہ سال کی اسی مدت کے دوران 262.6 ملین روپے تھا۔ گذشتہ سال کے 76.9 ملین روپے زیر مبادلہ خسارہ کے مقابلے میں، موجودہ سال میں 168.2 ملین روپے کے زیر مبادلہ کے خسارہ کا سامنا کرنے کے باوجود، کمپنی اپنے قبل از ٹیکس منافع (پی بی ٹی) کو 166.8 فیصد تک بڑھانے میں کامیاب رہی۔ اسی طرح، موجودہ سال میں 10 فیصد سپر ٹیکس کے اثرات کے بعد، بعد از ٹیکس خالص منافع 379.2 ملین روپے رہا، جو کہ گذشتہ سال 184.2 ملین روپے تھا۔

کمپنیز ایکٹ 2017 کے سیکشن (3) 134 کے تحت بیان:

یہ بیان خصوصی کاروبار سے متعلق مادی حقائق کا تعین کرتا ہے جیسا کہ اوپر ایجنڈا آئٹم نمبر 4 میں درج ہے:

سیکیورٹیز اینڈ ایکسچینج کمیشن آف پاکستان (ایس ای سی پی) نے SRO 389(1)/2023 مورخہ 21 مارچ 2023 کے ذریعے فہرست شدہ کمپنیوں کو QR کوڈ اور ویب لنک کا استعمال کرتے ہوئے اپنے ممبران کو سالانہ بیلنس شیٹ، نفع و نقصان کے اکاؤنٹ، آڈیٹر کی رپورٹ، اور ڈائریکٹرز رپورٹ وغیرہ (سالانہ آڈٹ شدہ مالیاتی گوشوارے) فراہم کرنے کی اجازت دی ہے، یہ عام اجلاس میں شیئر ہولڈرز کی منظوری پر منحصر ہے بشرط یہ کہ:

(a) کمپنیز ایکٹ کے مطابق میٹنگ کانوٹس شیئر ہولڈرز کو ان کے رجسٹرڈ پتے پر بھیجا جائے گا جس میں QR کوڈ اور ویب لنک ایڈریس موجود ہوگا۔
