## BUSINESS RISK & UNCERTAINTIES

- The Volatile crude oil and product prices.
- Negative outlook with downgraded credit rating of the country and top tier banks by International credit rating agencies.
- Risk of devaluation of Pak Rupee against US Dollar.
- Volatile Sale Pattern.
- Increasing utilities cost.

## FUTURE OUTLOOK

- High Sulphur Furnace Oil problem to be addressed by producing Very Low Sulphur Furnace Oil due to market demand.
- Oil Refining policy has been approved and future projects are under consideration.
- Deteriorating economic situation of the Country being major concern.

## FUTURE PROJECTS

- Company along with other refineries had jointly undertaken a study for feasibility of a joint hydrocracker plant, however, the project is not considered feasible. The Company is considering and evaluating other options for reducing production of furnace oil and converting it to value added products.
- Company is considering installation of a CCR (Continuous Catalyst Regeneration) Platforming unit along with other associated units.
