DIRECTORS' REPORT

On behalf of the Board of Directors of NETSOL Technologies Limited (NETSOL or the Company), we are pleased to present the unaudited condensed financial statements of your company together with its consolidated accounts for the period ended December 31, 2023.

GENERAL OVERVIEW

The half-year ended was a significant period for NETSOL Technologies. Developments that took place included the company's cloud services division being awarded the AWS Lambda Service Delivery designation by Amazon Web Services (AWS), signing of NFS Ascent® implementation contract by our Chinese associated company, new subscriptions and go-lives for products from the Appex Now marketplace, noteworthy contract signings for NETSOL's Professional Services, high-profile visits and continued participation at a number of industry-leading events across the world.

NETSOL Cloud Services achieved the AWS Lambda Service Delivery designation

NETSOL Cloud Services, the company's cloud services division, was awarded the AWS Lambda Service Delivery designation by Amazon Web Services (AWS). This esteemed recognition acknowledges NETSOL Cloud Services' proficiency and successful implementation of AWS Lambda, enabling organizations in the efficient building and deployment of scalable serverless applications.

AWS Lambda empowers businesses to run code without provisioning or managing servers, providing a flexible and scalable platform for developing contemporary applications. NETSOL Cloud Services has showcased its profound expertise in harnessing AWS Lambda to assist businesses in enhancing agility, lowering infrastructure costs, expediting the time-to-market for their applications and optimizing infrastructure management through the utilization of serverless computing.

Growing adoption of NETSOL's API-first products from the Appex Now marketplace in the UK

NETSOL introduced Appex Now as the world's first marketplace of API-first products specifically for the global credit, finance and leasing industry. It provides a suite of cloud-based API-first products that cater to a broad spectrum of needs. The API-first strategy enhances development efficiency, reduces complexity, mitigates risk and facilitates integration with diverse systems and platforms. During the half-year ended, the company attained new customers for its API-based calculation engine Flex and also had subscriptions for other products from the Appex Now marketplace.

Bibby Financial Services, a multinational financial services provider in the United Kingdom aiding over 8500 SMEs spanning across 300 industry sectors alongside United Trust Bank (UTB), a specialist bank offering various secured funding facilities to SMEs, property developers and consumers, both subscribed to and subsequently went live with Flex. The cloud-based calculation engine is a one-stop solution that guarantees precise calculations at all stages of the contract lifecycle through various calculation types.

Moreover, UTB also opted for a subscription to Dock, another product from the Appex Now marketplace. Dock is a centralized document generation tool which enables users to seamlessly create accurate and professional-looking documents in just seconds. With Dock's template-based configuration, users are enabled to set up placeholders for data, essentially simplifying the document creation process and reducing the chance of human error. Its API-first architecture ensures scalability, making it capable of handling any document generation task, from single documents to millions, with ease. The agility and swift onboarding of these API-first products has become a game-changer, empowering businesses to swiftly leverage these offerings and derive immediate value.

Awarding of NFS Ascent implementation contract

Our Chinese associated company successfully closed a multimillion dollar deal with an American automobile manufacturer for implementation of our flagship product NFS Ascent® at their auto finance company in China. The contract includes license to use the product, implementation and data migration services and a post go live support for three months period. Another contract for the long term maintenance support will be signed later. NETSOL's NFS Ascent® platform was chosen for its unrivaled capabilities and proven track record for success both in Asia-Pacific and globally. The company will directly benefit from this contract through provisioning of both license as well as implementation services to the sister concern. This will result in generating additional revenues for the Company which will be recognized over the life of the contract.

Contract signings for NETSOL's Professional Services

NETSOL strengthened its reputation as a reliable provider of professional services through the acquisition of several noteworthy contracts. A prominent digital transformation company based in the United States enlisted NETSOL for a three-year project focused on managing a Security Operation Center (SoC). Concurrently, a United Kingdom-based healthcare entity engaged NETSOL's expertise for a nine-month project aimed at developing a web application.

Additionally, a non-profit organization selected NETSOL to design and implement a comprehensive donor management system. Furthermore, NETSOL's proficiency in staff augmentation has been acknowledged, with

secured contracts for both project management and backend Java development. This diverse range of contracts highlights the company's adaptability, competence in meeting diverse industry requirements and ability to enable customers across various industries to meet their technology objectives.

Appointment of new Global Chief Marketing Officer

A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements are not prepared, in all material respects, in accordance with the accounting and reporting standards as applicable in Pakistan for interim financial reporting.
